Teacher and cover plan

Tuesday 8 December 2026 | P6 | 40 minutes

Lesson

An accessible presentation | Tuesday 8 December 2026 | Tuesday P6 | 40 minutes
LAUNCH pair. Year A. Formative; Week 7 is assessing.

Aim

I can make three slides easier to read and navigate.

Theme

Identity & Belonging: make a fictional shared kit explanation usable by more people. Do not ask for personal access needs.

Careers

Office and support roles use clear slides to explain information. Describing one access change gives evidence of a communication skill for an application.

Prepare

Open the fourteen-slide lesson or HTML page and Presentation_Practice.pptx in presentation software. The three-slide practice deck contains deliberate issues for repair; it is not a finished model. Make an adult demo copy and a fresh copy for each pupil. Print the brief, chosen route and evidence prompts; offer pink paper. Use books, pens and up to two devices.

Participation

Model first, private answers, no cold calling or required reading aloud. Offer pointing, typing, book work or quiet conversation. No live presentation is required. Keep pupil answers off the shared display.

Success

I used clear titles and readable text.
I described the chart and checked the reading order.
I explained one change, then saved and reopened my slides.

Lesson sequence

Tuesday 8 December 2026 | P6 | 40 minutes

0 to 3 minutes Arrival

Slides 1-2. Check the final Week 5 values: 12, 10 and 8 points.

3 to 7 Starter

Slide 3. Identify audience, one main point and useful titles.

7 to 10 Model text

Slide 4. Repair slide 1 in an adult copy: clear title, larger dark text.

10 to 13 Model meaning

Slide 5. Replace colour-only directions with item names and values.

13 to 15 Words

Slide 6. Model useful alternative text with the checked 12, 10, 8 dataset.

15 to 20 Together

Slide 7. Check slide 2 object order: title, chart, comparison. Add a meaningful description.

20 to 23 Hinge

Slide 8. A file name is not an image description. Re-model if needed; parallel check tests colour-only meaning.

23 to 35 Task

Slides 9-13. Repair three slides, explain one change, preview and save. One device: six minutes each.

35 to 40 Exit

Slide 14. Transfer check, reopen and one private next-step response.

Modelling and adaptations

Tuesday 8 December 2026 | P6 | 40 minutes

Deliberate practice issues

Slide 1: vague title Kit; pale body text at size 22. Slide 2: vague title Points; image has no alternative text and is stored before the title. Slide 3: vague title Checks and generic statements. These are the repair task, not accidental defects in the teacher lesson.

Exact demonstration

Use a disposable copy. Rename slide 1, set dark body text at least 28 and retain the facts. Demonstrate a meaningful image description using the checked values 12, 10, 8. Use the order tool to put title, chart and comparison in sequence. Do not infer order from screen position alone.

Cognition and learning

Chunk to one repair at a time. Keep the brief visible. Fade from a complete model to a location prompt and then an independent check. Use a clear title layout where the software offers it.

Communication and EAL

Use I changed ... so ... . Allow planning in any language. Let the pupil point to before and after before writing or speaking quietly. Staff may read privately on request.

SEMH and physical access

Use predictable stages, quiet time and no comparison between learners. Offer a brief pause within stage time, pink paper, zoom and uncluttered views. Allow exact adult typing with support recorded.

Checks and limits

Use the software checker if available, then inspect manually. If description or order controls cannot be used, record that part not yet checked. No screen-reader playback is claimed by the supplied previews.

Evidence and next steps

Tuesday 8 December 2026 | P6 | 40 minutes

Core evidence

Inspect three useful titles, correct facts, readable text and contrast, a meaningful chart description and checked object order. Retain the pupil access-change reason, preview and reopen observation. Record support actually used.

Task facts

Paper 12 points; card 10; fasteners 8. Paper uses 2 more points than card and 4 more than fasteners. Whole total 30 is not a fourth item. The chart does not show preference, pack count or price. Keep its data unchanged.

Saving and turn-taking

Use ICT_Practice/W06_Presentation. Save as Slides_A_v1 or Slides_B_v1 with the presentation extension. One device: each pupil has their own file and six-minute turn; the other plans in their book. Aspire keeps v1 and saves v2.

Feedback

Give one success and one NS. Record VF, WS or I accurately. The pupil responds in the same colour, on the same page or usual mode. Use R only after the response and an adult audience have both happened.

Paper fallback

Plan three slides and an image description in the book. This shows content and reasoning. Mark digital editing, description settings, order and reopening not yet observed; complete later on a device.

Progression

Week 7 is the independent assessing task with a paragraph frame. Keep the checked files available. Avoid claiming independence from an adult-made model or a finished file without observation.
