Trip cost challenge cards

Thursday 5 November 2026 | 12:50–14:10 | Year A

Planning allowances

Use these proposal allowances for the task. They are planning figures, not confirmed prices or a request for payment. The group has ten pupils and four adults: fourteen travellers. The visit is to the open-air museum.
Owner to fill by hand only: _____

The shared costs

Pupil entry: 10 × £15 = £150.
Adult entry: 4 × £20 = £80.
Lunch and drink: 14 × £6 = £84.
Pupil shop reserve: 10 × £5 = £50.
Shared subtotal: £150 + £80 + £84 + £50 = £364.
The shop reserve is money kept available. Each pupil can spend £0 to £5. Buying nothing is valid. No adult shop spending is included.

Transport options

Option A planning allowance: £150.
Option B planning allowance: £450.
Option C planning allowance: £650.
These are whole-group transport figures. Add one option once. An adult must check the return journey, capacity for fourteen travellers, access and the actual quote. No transport is booked or confirmed by this task.

The order of the check

1. Start with £364.
2. Add one transport option.
3. Find ten per cent of that whole planning total.
4. Add that ten per cent as a reserve.
5. Divide the final total by ten pupil places.

FINISH: a checked total and one-line team budget pitch.

Staff check figures

Option A: £364 + £150 = £514. Ten per cent is £51.40. Final total £565.40. Per pupil place: £565.40 ÷ 10 = £56.54.
Option B: £364 + £450 = £814. Ten per cent is £81.40. Final total £895.40. Per pupil place: £895.40 ÷ 10 = £89.54.
Option C: £364 + £650 = £1,014. Ten per cent is £101.40. Final total £1,115.40. Per pupil place: £1,115.40 ÷ 10 = £111.54.

Aspire comparison

An optional comparison divides by fourteen travellers instead. It answers a different question. Rounded to the nearest penny: A £40.39; B £63.96; C £79.67 per traveller. Label this comparison clearly. Keep the required per-pupil-place answer divided by ten. Neither figure sets a family charge.

Buying nothing

A pupil can choose to spend £0 while the plan still holds the £5 reserve. If the whole group removes all ten shop reserves before the ten per cent check, subtract £50 first. New final totals are A £510.40; B £840.40; C £1,060.40. Keep the chosen assumption clear and recalculate the reserve.

Our pitch and open checks

We propose option __. With the shop reserve, our checked total is £__. The planning cost per pupil place is £__. We still need an adult to check __.
Keep actual prices, permission, booking and any funding decision unconfirmed until the adult checks them. No cold calling; show the line, pass or share privately.
