Staff answers

These are invented scenario guides, not learner observations.

Exact weekly outcome

Health & safety at work.

A The walking route

Hazard: An empty box is in the walking route. Harm: A worker using the route could trip over the box and fall.

Immediate response: Keep clear of the route and tell the supervisor. Warn someone approaching if you can do so safely.

Control: The supervisor arranges safe removal of the box and checks the route is clear.

B Beside the packing table

Hazard: Water is spilled on the floor beside the table. Harm: A worker walking there could slip and fall.

Immediate response: Stay clear and report the spill to the supervisor. Do not step into it or clean an unknown spill yourself.

Control: The supervisor arranges suitable cleaning and drying, keeps people clear and checks the floor before reuse.

Worked model check

A box is the hazard; trip/fall is possible harm. Report to supervisor, keep clear, safe removal/check arranged by supervisor. If learner confuses cause and harm, point to box then describe what could happen. Do not imply a real route has been cleared.

Scene and sign guidance

C The high shelf

Paper packs lean over the edge of a high shelf. A worker below could be struck if packs fall; reaching or climbing could add a fall risk.

Keep away from below the stack and tell the supervisor. Do not climb, reach up or try to catch falling packs. The supervisor arranges safe restacking at a suitable height, away from edges, and checks storage.

D Controls in place

No deliberate hazard is shown in this comparison scene. It is not proof every risk is absent. Clear routes, a dry floor and stable reachable packs reduce the pictured trip, slip and falling-pack risks.

Keep these controls in place and report any change. Ask about anything that remains unclear. Keep access clear, floor dry and packs secure; the supervisor checks changes and storage.

Signs

Warning triangle alerts to hazard. Prohibition circle with diagonal bar forbids an action. Mandatory circle states an action to take. Safe-condition square/rectangle points to safe route/help. Use words and symbol as well as shape; colour alone is insufficient. Simplified diagram is a teaching aid, not approved installation artwork.

Keys

Model: box, not fall, is hazard. Main B: warning helps alert but spill still needs appropriate control/check. Parallel A: pause/ask about unclear instruction rather than guess. Re-model then recheck privately. Pass is unobserved.

Reports assessment and access

Report examples

B: “There is a spill beside the packing table. Someone could slip. I am keeping clear. Please arrange for it to be dealt with and checked.” C: “Packs lean at the edge of the high shelf. They could fall on someone. I am keeping clear. Please arrange for the stack to be made secure.” Accept shorter clear messages or a selected card with access logged.

Judgement and feedback

Look for cause of harm, who/how, a relevant control with responsible role and a report to supervisor/adult. Keep one card each. A sign alone is not enough to remove risk. Unknown facts remain unknown; D is not a real inspection. Record normal access separately from supplied thinking. One NS/reply; E actual saved work; R after Voice, Audience, NS/reply in usual mode. Offer to Communication portfolio; staff confirm mapping.

Access and boundaries

Supported choices/frames/model; Standard linked explanation/report; Stretch compares controls and remaining risk. Same card goal, normal aids, exact scribe, readback, adult partner and plan in any language. No public questioning or personal accident account. Pictures only; learners do not clean, move hazards, climb or use equipment. Actual concerns follow school/workplace procedures; seek another responsible adult if first unavailable. Private help, pass/pause/return.

Source and continuity

B89/C89 exact; row 88 context generic. Friday 15 January 2027 P1, pair, forty minutes formative. Same invented business as Week 1. W3–W6 one per return; later tasks not authored. No real employer, product, regulator or place named. Further GROW Careers paused.
