Science · BUILD · Autumn 2 · Week 1 · SCI_BUILD_A2_W01_P1

TA Brief

Lesson goal: I can describe how to care for a place by using less, using safe items again, and sorting waste for recycling.

Weekly arc: Lesson 1 of 2 · Introduce and explore (Lesson 2 will build on this to show what pupils know).

No cold calling: Nobody is asked to read difficult text aloud without agreement. Invite a response, give thinking time, and accept a pass.

Prompt ladder: Give time to start → point to Reference A or B → rephrase → offer a two-word bank → reduce to a binary choice. Never jump straight to telling the answer.

Late arrival or absence? Use the Arrival picture cue and Reference A, never extra workload.

During You do: Mark **I** (independent), **S** (supported), or **C** (choice) beside each task in the book to show the level of independence, not effort. Report the specific barrier (reading, vocabulary, processing, regulation, writing, or science idea) to the teacher.

Stage-by-stage TA cues

Stage	Focus check	Adult move
Arrival (5 min)	Q1 picture cue: Box A holds pencils in a clean tub (Reuse)	Check picture access on Q1 before giving a science prompt
Starter (4 min)	Washing a tub for pencils is reuse, not recycle	Wait for every pupil to commit by point, voice, or book before reveal
I do (6 min)	Step model comparing reduce, reuse, and recycle	Point to Reference A columns as the teacher steps the model
We do (7 min)	Inspector + refilled water bottle claim repair	Hear the pupil's reason before clicking Check
You do (10 min)	Supported / Independent / Choice + Aspire challenge	Support only the blocked step; fade support on the next item; mark I · S · C
Review & Exit (6 min)	Self-edit // and 3 exit checks	Say back the science heard so the pupil can confirm or amend

Teacher answers and topic guidance

Accept any scientifically equivalent wording in spoken, signed, pointed, drawn, or written form.

Starter answer

Option A (Reuse). Washing a plastic tub and keeping pencils in it uses the same tub again without melting or remaking the plastic.

Arrival · Supported

1. Tray B shows a clean tub holding pencils.
2. Animals get food from what they eat.
3. Muscles pull on bones to help us move.
4. Yes. We can write on the blank back to use less paper.

Arrival · Independent

1. Tray A shows a paper sheet with a blank back.
2. Animals get food from what they eat, while green plants make their own food using light.
3. The skeleton holds the body up and muscles pull on bones so we can move.
4. Using the clean tub again holds pencils without needing to buy or make a new tub.

Arrival · Aspire

1. Tray A uses the blank back so we take no new paper, and Tray B reuses a clean tub so we need no new pot.
2. Animals cannot make their own food, so they must eat to get energy and materials for their bodies.
3. A muscle can contract and pull a bone across a joint, so another muscle pulls it back.
4. We must check that the tub is clean and has no sharp or broken edges.

You do · Supported mark scheme

1. The paper with a blank back matches Reduce (use less). *(Up to 2 marks)*
2. We can reuse the clean tub to hold pencils, or reuse the cloth bag to carry books. *(Up to 2 marks)*
3. I can use the tub again because it is clean and safe. *(Up to 2 marks)*

You do · Independent mark scheme

1. Reduce: sheet with blank back. Reuse: clean tub and cloth bag. Recycle: empty metal can (after checking local bin rules). *(Up to 3 marks)*
2. Using the cloth bag again is reuse. It saves new material because we do not need to make a fresh bag. *(Up to 3 marks)*
3. First check that the item is clean and has no sharp edges. Second check the local bin label to see if that material is accepted. *(Up to 2 marks)*

You do · Choice mark scheme

1. 1. Reduce (use less). 2. Reuse (use again). *(Up to 2 marks)*
2. 3. Metal. 4. Local bin label. *(Up to 2 marks)*
3. Use a clean cloth bag again because it is clean and needs no new material. *(Up to 2 marks)*

You do · Aspire challenge mark scheme

1. Reusing keeps the same clean tub and uses it again without changing it. Recycling breaks the old plastic down at a factory to make a new item. *(Up to 2 marks)*
2. Using less and reusing a safe item stop waste right away without needing lorries and factory energy to melt and remake the material. *(Up to 2 marks)*

Exit ticket · Supported

1. That is Reduce (use less).
2. Yes. That is reuse.
3. We check the local bin label.

Exit ticket · Independent

1. Reduce: write on the blank back of a sheet. Reuse: fill a clean tub with pencils or use a clean cloth bag again.
2. Material means what a thing is made of, such as metal in a can or paper in a sheet.
3. Different places accept different materials, and the wrong item can spoil the recycling load.

Exit ticket · Aspire

1. Reuse uses the same clean item again as it is, while recycle processes old material into a new product.
2. Refilling reduces the number of new bottles made and avoids the energy needed to collect and reprocess five bottles.
3. An unchecked waste item could be dirty or have sharp edges that could hurt someone.

Topic guidance and common misconceptions

- **Reuse vs recycle:** Pupils often call any positive environmental action 'recycling'. Emphasise the object test: if the bottle or tub stays the same object, it is **reuse**; if a factory melts or pulps the material to make a new thing, it is **recycle**.
- **Why reduce and reuse come first:** Recycling still uses collection trucks, heat, water, and electricity. Reducing and reusing save both raw materials and factory processing energy.
- **Clean and dry sorting:** Food or liquid left inside containers can spoil a whole load of paper or card in a recycling bin.
