Teacher answers.

Starter · all routes.

1. Why does slate work well on a roof?

Cue · Flat sheets · keeps water out.

Answer 1 · Slate splits into flat sheets and keeps rain out.

2. A builder wants to make a strong step. Should they pick granite or chalk?

Answer 2 · Pick granite because it is hard and will not crumble.

We do decision reveal.

A. It is too hard and scratches the board. Board writing needs a soft rock that leaves dust.

Card answers and next steps.

Card.	Answer and next step.
A.	Granite fits (hard). Chalk fails (crumbles).
B.	Slate fits (flat, dry). Sandstone fails (soaks).
C.	Chalk fits (soft dust). Granite fails (scratches).
D.	Marble fits (smooth, firm). Chalk fails (powders).
E.	Granite fits (tough). Soft clay rock fails (breaks).
F.	Limestone fits (carves well). Wet mud fails (slumps).

Made by Matt

Mark scheme.

Today I can.

- I can pick the best rock.
- I can give a feature clue.
- I can say why a rock fails.

Route.	Accept at Exit.
Supported.	Points to granite for a step and chalk as the rock that crumbles.
Independent.	States granite is hard and strong while chalk is soft and breaks.
Aspire challenge: choose.	Explains that chalk is great for marking boards but fails as a step or roof.
Choice.	Shows one valid fit and one valid failure reason in the chosen mode.

Pupil voice accepted answer.

What feedback did you get, and what did you change?

“The adult asked what would go wrong. I wrote that chalk would crumble.”

What helped you most today, or what would you change next time?

Accept the pupil’s own example or a pass. Record their own words and actual support.

Comparison table showing which rock fits and which fails for two jobs.
