Teacher answers.

Starter · all routes.

1. Is a baked house brick natural or made by people?

Cue · Clay · baked by people.

Answer 1 · A brick is made by people from natural clay.

2. People heat sand until it melts. What clear material does it become?

Answer 2 · Hot melted sand cools to become glass.

We do decision reveal.

A. To make it hard and strong. Wet clay would squash under a heavy wall.

Card answers and next steps.

Card.	Answer and next step.
A.	Soft clay becomes hard and strong for walls.
B.	Grainy sand becomes a clear, solid sheet.
C.	Hard wood becomes thin, flat paper for writing.
D.	Loose fleece becomes a warm, stretchy hat.
E.	Crushed rock becomes a paste that sets hard.
F.	Sticky sap becomes a tough, bouncy ring.

Made by Matt

Mark scheme.

Today I can.

- I can name a raw start.
- I can name the made item.
- I can fill in a table.

Route.	Accept at Exit.
Supported.	Points to clay and states that baked brick is hard.
Independent.	Names a valid pair (clay/brick, sand/glass, wood/paper) and a feature change.
Aspire challenge: choose.	Explains that loose sand falls apart and blocks light, while glass is a solid clear sheet.
Choice.	Shows one valid raw-to-made pair and a changed feature.

Pupil voice accepted answer.

What feedback did you get, and what did you change?

“The adult checked my columns. I swapped clay and brick to the right boxes.”

What helped you most today, or what would you change next time?

Accept the pupil’s own example or a pass. Record their own words and actual support.

Completed table linking natural raw materials to made products.
