Teacher answers.

Starter · all routes.

1. Name one job that bones do in the body.

Cue · Support · protect · move.

Answer 1 · Bones support the body, protect organs, and help movement at joints.

2. A claim says chalk is bad for a roof. What water check backs up that claim?

Answer 2 · A water drop soaks straight into chalk instead of staying on top.

We do decision reveal.

A. One band pulls to bend and one pulls to straighten. A muscle can only pull, not push.

Card answers and next steps.

Card.	Answer and next step.
A.	Clue · Rigid model bars surround the chest space.
B.	Clue · Top band pulls to bend; bottom band straightens.
C.	Clue · Plate card includes grains, fruit, veg, and beans.
D.	Clue · Water stays on slate but soaks into chalk.
E.	Clue · People melt natural sand to make solid glass.
F.	Clue · Only the rock changes when drops match.

Made by Matt

Mark scheme.

Today I can.

- I can back up a body claim.
- I can back up a rock claim.
- I can name one next step.

Route.	Accept at Exit.
Supported.	Points to the elastic strip model for the joint and the water drop on slate for the roof.
Independent.	States that one muscle bends and one straightens, and granite did not scratch in the mark test.
Aspire challenge: choose.	Explains that an unfair test cannot prove which rock property caused the result.
Choice.	Shows one valid claim with supporting evidence and one reflection in the chosen mode.

Pupil voice accepted answer.

What feedback did you get, and what did you change?

“The adult asked for a test clue. I added that granite got no scratch.”

What helped you most today, or what would you change next time?

Accept the pupil’s own example or a pass. Record their own words and actual support.

Completed claim-and-clue summary across skeletons, food, and rocks.
