Year A | Autumn 2 · Week 2 | 9 November 2026

I can update two score variables when the player touches a pickup or a hazard.

I added a rule that changes the pickup score by 1 on contact.

I added a rule that changes hazard hits by 1 on contact.

I used change blocks for events and kept set blocks for start.

I tested both events and the start reset with a partner.

I reopened my saved file and checked both event scripts.

Use change blocks inside touching checks so each contact adds to the score. Keep set-to-zero blocks on the start event so every turn begins fairly.
