Exit · Supported

Tell an adult what you saw.

Read it back: I am learning to test a rock in two ways.

My feedback was… I showed…

Next I need to… try one small fix.

How I know: I can show a safe mark test. I can watch where drops go. I can tell what I saw.

Tell your teacher. They will pick our next start.

Take one quiet minute before the next lesson.

My confidence: □ I need help □ I can try □ I can show it

Starter

Think back. Say, sign or point.

1. How can we sort two rocks?
2. What can we do with a clean tub?
3. Name one body part that helps protect organs.

Today I will check:

I can show a safe mark test.

I can watch where drops go.

I can tell what I saw.

I do · word help

Watch two safe tests.

Word	It means	Example
hardness	how hard a thing is to mark	The tool marks this rock.
absorb	take in a liquid	Water soaks in.
water	a liquid used in our test	I add three drops.
test	a check to find out	I test two rocks.

Test rock hardness and water

Today I can… ☐ show a safe mark test ☐ watch where drops go ☐ tell what I saw

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R ☐ [//] ☐ [?] _____

I do · picture model

Check the path. Drops may stay on top, go through or run round the edge. These are models, not test results. Not to scale.

Picture colours: brown rocks, pale blue tools and trays, blue drops. Colour does not give a test result.

Watch: Adult uses one blunt tool. A gets a mark. Three drops stay on top.

Show me: Is a wet top proof that water went right through?

We do · sort the clues

Test two safe rocks.

Our turn: Mark B. Add three drops. The drops ____.

Talk, then sort.

Groups: Mark test. Water test.

Clue	Pick a group
Use an adult-held blunt tool	Mark test / Water test
Add three drops	Mark test / Water test
Look in the tray below	Mark test / Water test

Supported: Watch one drop. Point to the top or tray.

Independent: Try the safe test. Say what happened.

Aspire: Why must each rock get the same drops?

Made by Matt · © Matt Roper · CC BY-NC-SA 4.0: free for classroom use, share and adapt with credit, no resale

Test rock hardness and water

Feedback: □ VF □ WS □ I □ NS □ E □ R □ [//] □ [?] _____

We do · try it with kit

Guess first: Will drops pass through?

Kit: Two safe rocks. Adult-held blunt tool. Dropper and tray.

1. Guess first.
2. Adult tests a mark on each rock.
3. Add three drops to A. Check the edge and below.
4. Do the same on B. Record the route seen.

Copy these headings in your book. Add a row for each rock.

Rock	Mark?	Water route seen

Risk: Tools or rough rocks may hurt skin. Spills may be slippery.

Safe: Let staff use the tool. Keep drops in the tray. Do not taste. Wash hands after.

We do 2 · check the step

All of us show one choice.

What must you check to say water passed through?

A. Drops in the tray below

B. Only a wet top

C. The rock name

Say why. Check the route the drops took.

Made by Matt · © Matt Roper · CC BY-NC-SA 4.0: free for classroom use, share and adapt with credit, no resale

Test rock hardness and water

Feedback: □ VF □ WS □ I □ NS □ E □ R □ [//] □ [?] _____

We do 2 · check the test

The tray under a new rock C is wet before the water test. What should the class do first?

A. Call C porous from the wet tray.

B. Call C hard from the wet tray.

C. Skip the test and guess from colour.

D. Dry the tray, then repeat the test.

Show it: Point. Symbol card. Whiteboard. Finger vote. Thumbs.

Say why. Take one quiet minute to reset.
