Choose a rock for a job

Today I can… I can name one rock use. I can check one rock feature. I can say why the feature helps.

Feedback: □ VF □ WS □ I □ NS □ E □ R □ [//] □ [?] _____

TA brief

Before the lesson

Prepare clean blunt adult-checked rocks, job cards and stable tray. A small board is for a teacher-approved marking check. Check edges and school risk assessment. No tasting, dust or forced touch. Wash hands. A picture or pointing route is valid. This is optional model rehearsal, not a claimed core practical.

No cold calling. A learner may pass. Read an inaccessible line privately. Record adult prompts separately from the learner's response.

Prompt ladder

1. Point to the relevant place / instruction.
2. Ask one short question: "What is it asking you to find?"
3. Rephrase the instruction in simpler language.
4. Provide a scaffold or limited choice.
5. Model the first step only, then return the task to the pupil.

Arrival · 5 min

Offer a safe kit choice and short first–then cue.

Starter · 3 min

Hear the three attempts before answers: mark and water-through tests; look/feel; muscles. Confirm actual taught coverage.

I do · 5 min

Pre-teach the four words. Ask "Watch my first step. What do you see?" Thin slate can form a roofing slate; check actual samples and hear each show-me response.

TA brief · teach and hand over

We do · 7 min

Ask “What step is missing? Show it with the kit.” Preserve card and option order. Hand over the missing job after the observed mark. Offer support or stretch without supplying the answer.

We do 2 · 5 min

Keep the three-choice step check separate from the four-choice hinge. First step-check choice and second hinge choice are correct. Hear all responses together. Re-model if needed and use the parallel hinge in Staff Answers. Include the source quiet-minute reset.

Independent · 8 min

Use one chosen route for the full 8 minutes. Ask “What can you do first on your own?” Agree actual adult roles and swap across the week. If only one adult attends, follow that staffing plan. Keep each learner’s individual evidence and record the deepest prompt separately.

Review and improve · 4 min

Give VF and one precise NS(+). Invite a true edit // or requested read-back ?. Include a quiet-minute reset.

Exit · 3 min

Hear why the match fits in the valid response mode. Pass on deepest prompt and what was independent; choose the next starter from the response. Include a quiet-minute reset.

Task cues within the held ladder

Use least prompt first and no physical prompting. Wait/count five; point to the object or model; ask “What will you check next?” Model one step, then return the turn. Finish one example together only as needed and invite a fresh try.

Regulation

Agree a quiet supervised pause, give one short cue, and return to the last completed step. No evidence during distress. Allow home-language planning with agreed access tools on the staff device.
