TA brief · access, safety and pair roles

Two learners alternate chooser and reason-questioner, then speaker and listener. Each chooses a route and keeps independent evidence, an own exit and a pupil-owned question/measure card.

Point, say, sign, draw, write, exact scribe or adult-directed action are valid. Give processing time. No cold calling; a pupil may pass. Read exact words, do not improve the answer.

All live actions require staff approval. Pupils do not touch sockets, plugs, boilers, thermostats or site controls. Never interrupt safety/access equipment. Use paper scenarios and invented data only if needed.

No family travel, food or energy data are collected. Frame climate action as shared systems work, not blame. The adult hears each pupil and names back the science before a next move.

Prepare three scenario cards, before/after plan, five daily records each way, organiser and pencils. No live site change, special kit or public speaking is required.

TA brief · held five-step prompt record

Use the least prompt that gives access, then fade it. The staff prompt record stays separate from pupil marking.

1. Point to the relevant place / instruction.
2. Ask one short question: "What is it asking you to find?"
3. Rephrase the instruction in simpler language.
4. Provide a scaffold or limited choice.
5. Model the first step only, then return the task to the pupil.

Record pupil/date/task; response mode; prompt step1–5 or none; exact response; what support faded; next teaching step. Do not infer I · S · C from clicks, completion or saved responses.
