Teacher and cover planner

Resilience and online safety review

Wednesday 10 February 2027 · P3 · 40 minutes · Year A

GROW PSHE · Spring 1 Week 6 · up to five learners · assessing week

Theme Resilience & Change. Six week term. Thread tags SMSC S/So and British Values IL/MR; other tags not claimed.

Exact outcome

Resilience & online-safety task; bank the unit award.

GROW Weekly - Spring B69 and C69. Exact scheme outcome checked. The owner supplies the date, period and group. This is the assessing week.

Purpose

Make a resilience plan and an online safety guide for an invented younger pupil. Explain a useful step and why it fits. Include private help and a next route if help is not enough. All people, cases and the younger audience are invented. The guide stays in class; there is no contact with real younger pupils. No personal story, device or account is used.

Cover preparation

Read Staff Answers. Prepare Support Cards, glossary, books, usual aids and optional typed Evidence Sheet. Agree the supervised pause route and available adult. Use the same model and two format choices if the teacher is absent. Both products remain required.

Where this leads

This helps me adapt a task, share clear advice and ask for help in learning and future work.

Forty minute sequence

Phase	Min	Action
Arrival and starter	5	Private help and pause route. Recall a helpful action or give its reason.
Input	5	Read exact outcome. Explain both products and the invented audience.
Model and guided work	7	Model one plan step and one guide step. Match a step or improve advice.
Private hinge and choice	5	Check both products and safe help. Choose a format and usual response mode.
Individual task	12	Complete BOTH products in one format. Allow about six minutes each.
Review	4	Check a reason, set one NS and retain the actual reply.
Private exit	2	Explain a safe help route or repair a myth. Close with support.

Total 40 minutes. Processing and short quiet pauses sit inside these phases. Both formats share one 12 minute task window; choose one format and make both products.

Teaching and response routes

Starter choices

Use the invented learner. Choose pause and ask for one small step, or explain why getting help can be resilient. Keep replies private. No question asks how the pupil feels.

Model and guided work

Read A and the worked plan and guide on Support Card 1. Show the link from feeling to safe action, reason and help. Then show privacy, consent, kindness, footprint limits and stop and tell. Match a step to one product, or improve the advice Keep trying alone and send the photo now.

Check after the model

Ask privately: What are the two products? A resilience plan and an online safety guide. Ask for a safe step from either. Revisit the visible model if either is missing.

Private hinge

Which response meets the task? A: make only a coping plan. B: make a resilience plan and a safety guide, both with safe help. C: use a real private account as proof. D: promise the plan stops all problems. Correct B. A misses a product, C breaches privacy, D promises too much. Re-model and use the parallel check if unclear.

Parallel check

A report tool is unclear. A: ask trusted school staff for help and another route if needed. B: send the content to more people. Correct A. Report or block tools may not resolve it at once. Support can continue. A pass is unobserved.

Two equivalent formats

Choose B: a plan map or list plus guide panels. Or choose C: a short plan note plus guide text. Both make both products with the same checks. No art skill or extra length is required. Learners may switch format, keep aids or use Type instead.

Supported

Choose either format. Complete both products. Keep word banks, the model, short frames and usual aids. Offer two possible steps if needed and record this content help.

Independent

Choose either format. Complete both products with story clues, feasible steps, reasons, support and a fallback. Keep the visible model and usual aids.

Aspire

Choose either format and complete both products. Explain a privacy limit and adapt the resilience or help plan if a first step does not help. Do not add personal detail or extra length for its own sake.

Cover fallback

Read A and use printed cases with books, usual aids or an exact scribe. No internet, phone, login, actual image or harmful wording is needed. Keep both products in the task. This assessing week is a learning check, not a test of personal coping or real online conduct.

Task aids and access

Starter

Words: feeling, step, help

Start: The learner could…

Model: Ask for one clear first step.

Model

Words: plan, adapt, safe

Start: If the task feels hard…

Model: Try a smaller step with help.

Private hinge

Words: both, plan, guide

Start: Both products show…

Model: The plan shows support. The guide shows safe sharing.

Resilience plan

Words: feeling, pause, ask

Start: They could… because…

Model: They could ask staff to show the first step.

Online safety guide

Words: private, copy, kind, report

Start: Before sharing…

Model: Leave private details out. Ask before sharing someone else.

Review

Words: check, reason, next step

Start: My next step…

Model: Add why copies may remain.

Private exit

Words: help, adult, support

Start: They can ask…

Model: Ask another trusted adult if help is not enough.

Response modes

Books are the first route. Type instead on Evidence Sheet page 2 has fields for both products. Point, draw, use an aid or use an exact scribe with readback and correction. Keep usual reading and language aids. Plan in any language. No public questioning.

Prompt ladder

1 Point to the place or instruction. 2 Ask a short private question. 3 Rephrase. 4 Offer a scaffold or choice. 5 Model the first step only, then return the task. Allow time. Keep content prompts apart from usual access.

Evidence and safe teaching

Adaptations

Cognition and Learning: one product part at a time, model and short frames. Communication and Interaction: processing time, private choices and usual aid. SEMH: predictable mild cases, pass and supervised pause. Sensory and Physical: clear print, comfortable position and normal access. EAL: teach key words and plan in any language.

TA focus

Input: check that both products are clear. Guided work: fade the model and hear a reason. Task: record actual pupil words, usual aids and content cues separately. Support the supervised pause. Never ask for a real worry or account.

Private question bank

F: Who could the story learner ask? M: Why does that strategy fit? H: How could the plan change if a first step or report route is not enough? No public questioning.

Evidence and six outcome grid

Use Evidence Sheet page 3. Each outcome has blank review boxes and a comment field. Tick only a judgement supported by actual work or a valid prior record. Add a work reference, support and what it shows. Not observed is different from more learning needed. The two products may show some learning from several weeks; they do not prove every outcome by themselves.

The unit award

The unit award is conditional on staff checking actual saved evidence against its current requirements through the usual process. This task does not create criteria or guarantee the unit award. Keep missing or unobserved learning visible and plan a further chance. Do not tick every outcome from one product. No claim of future coping or real account safety follows from classroom work.

Review and feedback

Check both products or improve one weak reason. Set one precise NS and retain the learner reply. Exit can explain a safe help route or correct Coping means doing it alone. Keep first thinking, one specific NS and the learner reply in the same colour, on the same page or usual mode. VF verbal feedback; WS worked with support; I independent; // self edit; ? read back; E actual work saved. R only after Voice, Audience, one NS and the actual reply. Offer to the Communication portfolio; staff confirm any mapping.

Safe support and privacy

Privacy

Do not collect private cards from earlier weeks. This task uses invented people only. Do not ask for personal symptoms, worries, accounts or actual incidents. Record safeguarding concerns separately from learning evidence.

Private help

Ask a trusted adult or school staff privately. A family doctor can discuss health and help find care. A suitable helpline can offer listening or advice; staff help find an age-appropriate route. Use words, a note, HELP or the usual aid. If the first adult is busy or help is not enough, ask another trusted adult. For an urgent concern get school staff at once. No service, website or number is named.

Discreet step out

Before teaching, agree the discreet pause signal, available adult and familiar supervised quiet route. Staff acknowledge it privately. No public explanation is needed. Offer a neutral task, supported return or private catch-up. Do not send a learner away alone. Pass is not failure.

Safeguarding

Any disclosure goes to the safeguarding lead through school procedure. Listen calmly, reassure, do not probe, investigate or promise secrecy. Follow the immediate school route for urgent concerns. Keep real concerns and personal details in the separate safeguarding record, not shared learning evidence. A pupil unable to identify a trusted adult is supported privately, not pressed.
