Make — A small light artwork

Today I can… ☐ make bright marks contrast with a dark ground. ☐ repeat a shape or pair of shapes. ☐ show one strength and one change.

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R ☐ [//] ☐ [?] _____

STAFF ANSWERS · Arrival

Supported

1. Ground: Dark; very dark blue.
2. Mark: A yellow ring.
3. Contrast: A. Its dark ground contrasts more clearly with the yellow outline.
4. Stop: Stop.

Use one tier. Keep these answers out of pupil view until after the first response.

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R ☐ [//] ☐ [?] _____

STAFF ANSWERS · Arrival

Standard

1. Pattern: Yellow ring, then orange dot.
2. Colour group: Warm colours. The dark blue ground belongs to the cool group.
3. Contrast: The ground changed from dark blue to pale yellow; the marks stayed the same. A's yellow rings are clearer against the dark ground.
4. Repeat: Three times, making six marks.

Use one tier. Keep these answers out of pupil view until after the first response.

STAFF ANSWERS · Arrival

Stretch

1. Comparison: They share the same yellow-ring/orange-dot repeat, size and spacing. Their grounds differ, changing the yellow rings' visibility. Accept one accurate shared feature and one difference.

2. Contrast: Yes, if the marks are sufficiently light and distinct from the ground. Cool colours do not have to be dark or faint.

3. Strength: For example, its bright yellow rings stand out against the dark ground, or the ring/dot order repeats clearly. Require a feature rather than a general approval word.

4. Change: Make all gaps wider or narrower while retaining the three ring/dot pairs; another clearly specified spacing change is valid if the repeat remains identifiable.

Use one tier. Keep these answers out of pupil view until after the first response.

STAFF ANSWERS · Exit ticket

Supported

1. Contrast: Any accurately located light-dark contrast in the pupil's artwork or directed plan.

2. Strength: A located strength consistent with the artwork, such as clearly visible bright rings or a repeated ring/dot pair. Accept a brief symbol or selected phrase linked to the feature.

3. Change: Any accurately located or described planned/tested change, with the feature identified; do not count an unexplained point as a complete review.

Use one tier. Keep these answers out of pupil view until after the first response.

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R ☐ [//] ☐ [?] _____

STAFF ANSWERS · Exit ticket

Standard

1. Contrast: A relevant account of the artwork's contrast, such as light yellow marks against dark blue paper. Record when the pupil notices a weak contrast and plans a change.

2. Strength: A specific positive feature linked to the task, such as the same ring/dot order being easy to follow. General praise alone needs a feature.

3. Change: A specific planned/tested change with a fitting reason, such as wider gaps separating marks or brighter colour strengthening contrast.

Use one tier. Keep these answers out of pupil view until after the first response.

Stretch

1. Contrast: Test a lighter/brighter mark or a clearer, thicker light outline against the dark ground, then compare. A colour-group label alone does not guarantee contrast.

2. Strength: A precise, observable feature linked to the claimed strength, such as three visible repeats of the same pair with clear dark gaps. Different supported strengths are valid.

3. Change: A reasoned comparison naming a revised feature and an identifiable retained repeat, such as thicker outlines making rings clearer while the ring/dot order stays fixed. A proposed further change can be explained without requiring another completed artwork.

Use one tier. Keep these answers out of pupil view until after the first response.

Make — A small light artwork

Today I can… □ make bright marks contrast with a dark ground. □ repeat a shape or pair of shapes. □ show one strength and one change.

Feedback: □ VF □ WS □ I □ NS □ E □ R □ [//] □ [?] _____

STAFF ANSWERS · teaching and routes

Starter: A meets this task's aim. Bright marks can contrast with a dark ground, and the chosen shape or pair can be repeated. Accept either feature as the short reason.

I do: Bright marks contrast with a dark ground, and the ring/dot pair repeats. Pupils may locate each feature without naming the technical words.

We do: Both choices are valid. An orange dot makes a warm-colour pair; a light blue dot makes a warm/cool pair. Both can contrast with dark paper. Accept either linked effect; do not fill the pupil's choice in advance.

We do: Two identifiable repeats of the chosen pair on a dark ground, with a located contrast and an order check. An imperfectly drawn circle can still show the intended repeat. A spotted mismatch plus a correction is valid evidence of checking.

You do · Independent: A small artwork on dark paper with identifiable light-dark contrast and at least three repeats of a chosen shape or pair. Accept intentional, uneven hand-made marks; identical motor execution is not the test. The pupil locates one strength and proposes one specific change with a fitting reason, then tests/directs part of it. For example, bright rings contrast clearly, while larger dark gaps could make the repeat easier to follow. A pupil may direct the marks instead of making them.

You do · Supported: Either pair is valid, repeated three times on a dark ground. Look for a located strength, a specific suitable change and a simple reason, such as thicker outlines helping the rings stand out. Record the precise adult support and pupil-owned decision, including a directed test of the change.

You do · Choice: Any chosen response/material mode meets the task if the resulting marks contrast with the dark ground and an identifiable pair repeats at least three times. Accept one accurate, located strength and one specific reasoned change with a small test. For example, repeated light blue rings stand out, and wider gaps may separate neighbouring pairs more clearly. All these choices may be communicated without speech or writing.

STAFF ANSWERS · teaching and routes

You do · Aspire: An identifiable first artwork with contrast and a ring/dot repeat; a located strength; and a specific one-feature revision tested on a second strip while retaining the ground and shape order. For example, thicker yellow ring outlines may strengthen their visibility while the ring/dot sequence stays recognisable. Accept another justified choice. Compare the pupil's intended effect, not the adult's taste; precision of hand control is not a condition of success.

Staff: mark I, S or C beside the You do response for actual independence, support or choice.
