RE and Worldviews · LAUNCH · Spring 1 · Week 3 · LAUNCH-RE-S1-W03 · Date _____

How can different worldviews support care and justice?

Today I can… ☐ explain one similarity and one difference in reasoning without assuming every member agrees.

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R ☐ [//] ☐ [?] _____

RE learns about ethics and worldviews; this activity is not worship. Reflection is optional and never worship.

STAFF ANSWERS

Arrival · Supported

1. It repaired the material damage.
2. No. The group could decline a meeting; forgiveness was not compelled.
3. It was temporary, linked to safe use and had a review point.
4. Yes; different values or authorities can support a shared action.

Arrival · Standard

1. Repair addressed the damaged panel; the pause addressed safe use/accountability pending review.
2. An apology alone did not repair the lost item/time or show that safety and trust had been restored.
3. It had to relate to the checked action and purpose, and change if safe-use evidence changed.
4. The actions, reasons, source of authority and relevant case facts, rather than only labels.

Arrival · Stretch

1. Replacing an item does not establish that safe-use concerns or trust have been addressed; a proportionate review may still be needed.
2. Forgiveness is a possible personal response. It does not by itself repair damage or remove a justified consequence; accountability concerns the admitted action, repair and safe-use review.
3. A temporary reviewed opportunity to return can show mercy while keeping repair and a justified boundary. Mercy need not remove every consequence.
4. Attribute claims to the supplied accounts or some people, compare reasons and acknowledge variation within each worldview.

Exit · Supported

1. Both support changing the entrance to make access possible.
2. One explicitly cites a sacred teaching about care; the other cites evidence of exclusion and equal access.

STAFF ANSWERS · continued

Exit · Standard

1. Both support accessible entry and concern for people excluded; explain the shared action or concern.

2. The stated authority differs. This does not show the first ignores evidence or the second lacks values.

Exit · Stretch

1. A sacred teaching and evidence-based equal-access argument can converge on changing the entrance; shared action does not make grounds identical.

2. No. X3 gives two supplied positions, not evidence about every member. Acknowledge within-worldview variation.

Starter

Answer (adult): No. The action can be shared while the grounds or source of authority differ.

We Do

Answer (adult): Both applications attend to need and care; A explicitly appeals to a Christian sacred teaching, B to evidence/reason/empathy. Both may consider consequences and hear people. Knowing whether the first household has another safe source matters to urgency and harm. Use some believers/this account; do not assert all Christians or all humanists choose identically.

You do routes

Starter: No. The action can be shared while the grounds or source of authority differ.

We Do shared check: Both applications attend to need and care; A explicitly appeals to a Christian sacred teaching, B to evidence/reason/empathy. Both may consider consequences and hear people. Knowing whether the first household has another safe source matters to urgency and harm. Use some believers/this account; do not assert all Christians or all humanists choose identically.

You Do common criteria: relevant source detail; an explained link to the weekly outcome; accurate terminology; a precise qualification or ethical check; pupil-owned response and review. Independent, Supported and Choice test the same core thinking. Choice requires the pupil's own word, phrase or reason. Record actual support; an adult-selected answer is not pupil evidence.

Starter: TA action — Read the single question once and allow private thinking. Avoid — Do not provide the response or turn this into a second retrieval grid. Feedback script — "Tell or show me the reason for your choice."

You Do staff guidance: Credit shared care/need with different stated authorities, correct V1/V2 attribution, relevant V3 application, missing-alternative uncertainty and within-tradition diversity. Do not require identical judgements or label either group more ethical. Both accounts can use reason and care; the difference is not reason versus no reason.
