

Knowledge Organiser (BUILD W16): Then and now, and what is fair

Humanities Spr 1 · 2026–27 · Workbook outcome: Compare old and new objects (then & now).

Key Word	Definition
Watch me do it:	Watch me do it: I take the board and the button machine. What is the board made of? Wood. What is the machine made of? Plastic. Wood is older than plastic. So the board goes first. I say the material, then I place the card.
Now the harder pair:	Now the harder pair: the wringer and the handle machine. Both have metal. So material does not settle it. I look at how they work instead. One is turned by hand only. One has a handle that drives a drum. The simpler one comes first.
Ranking one together:	Ranking one together: a card says everybody in the game gets a turn. Another says only the quickest get a turn. Which is more fair? Ask the question: who is left out? That gives you the order.

Key Facts

- Some things are old. Some things are new. Some things are in between.
- You can often tell how old a thing is from what it is made of.
- Wood and iron are old. Plastic is newer.
- A thing can be new and still do an old job. A kettle is a kettle.
- Order means a line. Oldest at one end, newest at the other.
- Fair and not fair can be put in a line too. That is the second half of today.

Arrival Task

What we know about then and now

1) Some things are old. Some things are new. Some things are in between.

2) You can often tell how old a thing is from what it is made of.

3) Wood and iron are old. Plastic is newer.

4) A thing can be new and still do an old job. A kettle is a kettle.

5) Order means a line. Oldest at one end, newest at the other.

6) Fair and not fair can be put in a line too. That is the second half of today.

Two lines of the same four things

Here are two answers about the same four object cards. Answer A: board, wringer, handle machine, button machine. Answer B: button machine, handle machine, wringer, board.

Try it in your head: which is older, a thing you turn with your hand or a thing with buttons? Now you have started the order already.

We Do 1: Sequence the objects, oldest first

Card 1: the washing board. What is it made of?

Card 2: the hand wringer. What is it made of, and how does it work?

Card 3: the machine with buttons. What is it made of?

We Do 2: Put the two cards in order, more fair first

We rank one pair together first. Nobody writes yet. Everyone points to their more fair card at the same time, and we hold up the choices together. The pair for this one is the two turn taking cards. Your job is the reason. Who is left out on the card you put second?

Scaffolding – Standard

Word Bank

Watch me do it:, Now the harder pair:, Ranking one together:, Space, Voice, Audience, Influence

Your route

Four objects in order with one reason, then the two cards ranked with a reason.

Sentence frames

"Who ... what they do ... so that ..." | "... because ..."

The model

Watch me do it: I take the board and the button machine. What is the board made of? Wood. What is the machine made of? Plastic. Wood is older than plastic. So the board goes first. I say the material, then I place the card.

Now the harder pair: the wringer and the handle machine. Both have metal. So material does not settle it. I look at how they work instead. One is turned by hand only. One has a handle that drives a drum. The simpler one comes first.

Ranking one together: a card says everybody in the game gets a turn. Another says only the quickest get a turn. Which is more fair? Ask the question: who is left out? That gives you the order.

Check yourself

- Check yourself: is your oldest object at the start of the line?
- Check yourself: did you write what the object is made of, or how it works?
- Check yourself: does your fairness reason name who is left out?
- Check yourself: would somebody who has not seen the cards follow your order?

From the lesson sheet

Then and now, and what is fair

SoW: 'BUILD Weekly - Spring'!C41 · 'BUILD Weekly - Spring'!C53 — "Compare old and new objects (then & now). · Talk about what is right and wrong, simply."

Learning objective: I can put objects in order from oldest to newest with a reason, and rank two ways of treating a person from more fair to less fair.

No personal disclosure is required. The fairness scenes are written for this lesson and are about the people on the cards.

Order and ranking record

Objects: oldest → newest, with the reason under each. Cards: more fair → less fair, with who is left out.

The first row is done for you, from the pair we ordered together. It is in italics so you know it is not yours. Fill in as many rows below it as you can.

Independent Work – Standard

Four objects ordered with a reason, and the two cards ranked.

Four objects in order with one reason, then the two cards ranked with a reason.

What I ordered	My order	My reason
<i>board and button machine</i>	<i>board first</i>	<i>wood is older than plastic</i>

Choose a route

- 1. I chose my own route.
- 2. My reasons are in my own words.
- 3. Any adult help is written on the record.

5 · Learner confirmation

I confirm this is my own work.

Exit Ticket – Standard

1) Read one reason to a partner or an adult. The listener says back which card came first and why.

2) Did the listener put your line the other way round? Then change one word in your reason. That change is your influence. It belongs to you, not to them.

3) Did the listener follow your order first time? Write that down too. A reason that already works is worth noting.

Lundy Loop — this lesson

SPACE stays available. VOICE is received. AUDIENCE names back exactly. INFLUENCE changes one real next action.

Space	means you get room to join in.
Voice	means you get to say it.
Audience	means someone really listens.
Influence	means something changes because of what you said.
