Use: Autumn Science: Show Your Thinking

Today I can… ☐ Say how friction helps in one case. Say how it hinders in one case. ☐ Say what we gain from a mechanism. Say what it costs. ☐ For a fair test, say what to change. Say what to measure. Say what to keep the same. ☐ Explain an orbit. Say why we see light from the Moon.

Feedback: ☐ VF ☐ WS ☐ I ☐ NS ☐ E ☐ R ☐ [//] ☐ [?] _____

Word page

Forces and mechanisms

Blue shows forces and mechanisms. Green shows fair tests and orbits.

friction — a force that acts against a slide, or a push to start a slide, where two surfaces touch

pivot — the point a lever turns around

Fair comparison and orbits

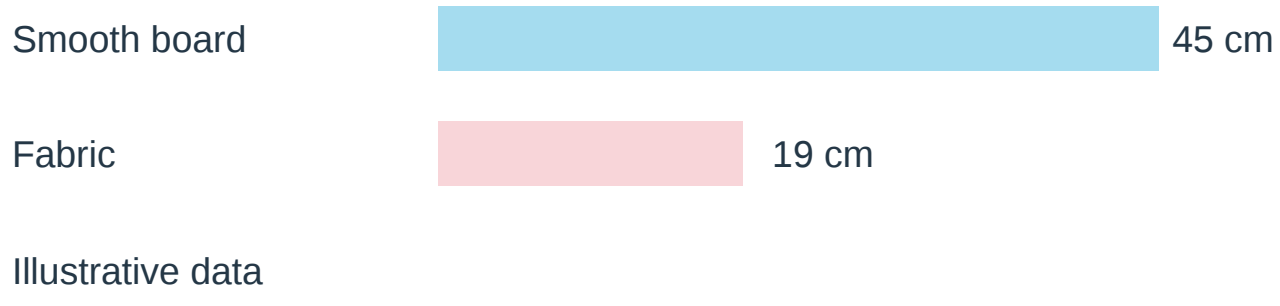

control — something kept the same in a comparison

orbit — a curved path around another body

Comparison

Here are data to think about. The same block went 45 cm on smooth board. It went 19 cm on fabric. These data are here as an example. They are not results from your own test.

Blue shows smooth board. Pink shows fabric.

Illustrative data
