

Knowledge Organiser (LAUNCH W8): Maps, symbols and grid references

Humanities Aut 1 · 2026–27 · Workbook outcome: Use maps, OS symbols & grid references.

Key Word	Definition
Modelled:	Modelled: the symbol sits in square 3421. Across, it is six tenths into the square, so 342 becomes 3426. Up, five tenths, so 21 becomes 215. Reference: 342 215.
Annotated together:	Annotated together: symbol four is a place of worship. What it does not tell us is whether it is in use, or how large the building is.

Key Facts

- Read along the bottom first, then up the side. Along the corridor, then up the stairs.
- On this sheet one grid square is one kilometre across, so a tenth of a square is a hundred metres on the ground. That is what the sixth figure is worth.

Arrival Task

Retrieving how the grid works

1) Read along the bottom first, then up the side. Along the corridor, then up the stairs.

2) On this sheet one grid square is one kilometre across, so a tenth of a square is a hundred metres on the ground. That is what the sixth figure is worth.

Two references for the same feature

Two learners give a reference for the same circled symbol. Reference A: four figures, naming the square. Reference B: six figures, naming a point inside it.

We Do 1: Label the symbols. Annotate with references.

Symbol 1: what does the key say it is?

Symbol 3: four figures or six, and why?

Symbol 5: what does this symbol not tell you about the feature?

We Do 2: Write what one symbol does not tell you

Everyone writes one limit on a whiteboard and we hold them up at the same time.

Scaffolding – Stretch

Word Bank

Modelled:, Annotated together:, Space, Voice, Audience, Influence

Your route

Five labelled with six-figure references and one annotated limit.

Sentence frames

"Who ... what they do ... so that ..." | "... because ..."

Reference Zone — keep this beside your work

The model

Modelled: the symbol sits in square 3421. Across, it is six tenths into the square, so 342 becomes 3426. Up, five tenths, so 21 becomes 215. Reference: 342 215.

Annotated together: symbol four is a place of worship. What it does not tell us is whether it is in use, or how large the building is.

Check yourself

- Check yourself: did you go along the bottom before up the side, every time?
- Check yourself: is your resolution right for the size of the feature?

From the lesson sheet

Maps, symbols and grid references

SoW: 'LAUNCH Weekly - Autumn'!C53 — "Use maps, OS symbols & grid references."

Learning objective: I can label map symbols from the key and give a grid reference at the right resolution that another person can use to find the feature.

Nobody marks where they live. The extract is a licensed teaching sheet with its key attached.

Annotation record

Symbol → feature → reference → what it does not tell you. Along the bottom, then up the side.

The first row is done for you, from the symbol we annotated together. It is in italics so you know it is not yours.

Independent Work – Stretch

Five with six-figure references and one annotated limit.

Five labelled with six-figure references and one annotated limit.

Symbol	Feature	Grid reference	What it does not tell me
<i>tower with a cross</i>	<i>place of worship</i>	<i>342 215</i>	<i>whether it is still in use</i>

Choose a route

1. I chose my own route.
2. My annotations are in my own words.
3. Any adult help is written on the record.

5 · Learner confirmation

I confirm this is my own work.

Learner name (print)	Signature
Date	

Exit Ticket – Stretch

1) Read one reference to a partner without the label. They say what they landed on.

2) Did they land elsewhere? Recheck along before up and change your figures. That change is your influence.

3) SPACE stays available, VOICE is received, AUDIENCE names back exactly and INFLUENCE changes one real next action.

Lundy Loop — this lesson
