

Explain day and night with a rotating earth

I am learning to explain day and night with a rotating Earth.

Picture idea

A lamp representing the Sun and a globe with one marked place, with a rotation arrow.

Can you find...?

1. What does Earth do?
2. When does a place have day?
3. Why does the Sun seem to move?

How I'll know I've got it: I can find all three answers and use one source detail to explain a choice.
