Staff answers and decision rules

BUILD Spring 1 Week 1 Tuesday 5 January 2027 P1 Year A Explore

Examples are adult models. They are never prefilled pupil evidence.

Arrival

Either continuing or making a fresh trial is valid. Log the actual work and date.

Starter

The pause changed. It might create calm, waiting or surprise. The maker's reason determines the intended effect.

I do

The log may contain a sketch, written pattern, work-only image or witnessed description. A recording device is not needed.

We do

For example: We kept the growing gaps because they feel open. Other justified choices are valid. Hope does not have one fixed colour or sound.

Create

A complete lesson response may be four soft taps and a pause repeated twice, with a simple beat plan and reason. A painting can use only a few intentional marks.

Review

For example: I chose a long pause because the character is waiting. I notice the pause comes after each four taps.

Exit

Example only: I made a calm sound piece. I kept slow taps because they feel still. Next I would like to try two sounds.

Teacher example

Teacher model only: I made a small painting. I chose spaced curves for calm. I kept the gaps because they feel still.

Teacher model only: I made a sound piece with four taps and a pause. I changed to a longer pause because the character is waiting.
