Teacher and cover plan

New marks from texture

Weekly outcome verbatim: Try a new expressive technique.

Year A · Resilience & Change · Explore · BUILD Weekly Spring row 91

40 minutes: Arrival 3; Starter 3; I do 6; We do 6; Create 14; Review 5; Exit 3. Tidy in the final two Review minutes. Demonstration, route and stretch tasks use time within these stages.

Prepare

For four pupils: four books or arts logs, eight small sheets of thin paper, four broad wax crayons and four clear table spaces.

Provide four clean pieces of ridged card and four smooth pieces of card, with safe edges. Shared trays can be used in pairs. No cutting tools, wet paint or adhesive are needed.

Prepare two small real rubbings for demonstration, four storage trays and spare paper. Check that the surfaces give a visible mark before teaching.

No-materials route: seated or standing silent hand movement. No device, body contact or personal story is required.

If prior work is missing

If prior work is missing, offer a brief honest restart: choose an invented idea and a small achievable form, state a first step and needed tools or no-materials route, then make a first version. Date it today and label it a new start. Do not claim missing earlier evidence.

Arrival and starter

Arrival · 3 minutes

Say and do: Show a safe piece of ridged card and a smooth card. We will put paper on top and rub a crayon across it. The bumps can make marks show through. This is a new way of making marks for our lessons. You may watch, direct me or use the silent option.

Look for: Pupil chooses an invented feeling or confirms one. No personal story is needed.

Materials-free: Offer two silent hand textures: a smooth glide or small uneven stops. Pupil can direct the adult.

Check and response: Any chosen feeling is valid. A texture has no fixed emotional meaning.

Starter · 3 minutes

Say and do: Show the two surfaces. Ask permission before offering touch; do not place a pupil hand on an object. Describe flat and ridged. Ask how a rough-looking mark might suggest an invented feeling.

Look for: Pupil notices an actual surface feature before suggesting a feeling.

Materials-free: Adult makes a smooth hand path and a path with small stops; pupil identifies the difference.

Check and response: Ridges are raised lines. Either texture can express calm or energy if the maker gives a reason.

Demonstration and shared practice

I do · 6 minutes

Say and do: 1. Put a clean, dry, flat piece of ridged card on a clear table. 2. Lay a small sheet of thin paper on it. Hold the paper at the edge, outside the rubbing area. 3. Lay a broad wax crayon on its side. Move it gently back and forth for four short sweeps. 4. Lift the paper and show the pattern. Make a second test on smoother card with the same crayon. If little shows, check paper contact, use thinner paper or try a little more pressure. Stop before paper tears. Heavy pressure can hide the pattern. Keep the two real tests.

Look for: Adult demonstrates each step slowly and compares the actual prints, even if one is faint. This is rubbing over a surface, different from drawing each line or moving loose shapes.

Materials-free: Model a new texture translation: one continuous hand glide, then four small stop-start moves. Hold each end pose for a slow count of two. Pupil chooses the movement texture. Call this silent movement, not a completed rubbing.

Check and response: CfU: Is the textured card above or below the paper? Below. If unsure, lift the paper and reset it together, then ask again.

We do · 6 minutes

Say and do: Pupils direct where the paper and crayon go. Compare the ridged and smoother tests. Ask each pupil for one choice. Hinge: the paper is tearing. A: press harder; B: stop and try lighter pressure. Show hands or point.

Look for: Each pupil makes a choice and identifies a feature. They choose B for the tearing paper.

Materials-free: Compare the smooth glide and stop-start motion. Pupil directs a lighter or smaller version if the movement is uncomfortable.

Check and response: B. If A is chosen, show a gentle sweep on fresh scrap. Parallel check: to protect the next sheet, press hard or lightly? Lightly. Proceed when the pupil can choose a gentle action or direct one.

Making and evidence

Create · 14 minutes

Say and do: Give each pupil two small sheets and two safe flat surfaces, or let them take turns at a stable shared tray. Repeat the four rubbing steps. Keep the colour the same while testing textures so the texture difference is clearer. The pupil chooses the preferred test. Adult help may hold paper or move the crayon under the pupil direction. Do not rub on skin, walls, fittings or sharp objects. Use familiar materials and the setting procedures.

Look for: Two actual tests with a pupil-selected texture and a reason, or two witnessed silent movement textures with the same choice and reason. Completion does not require a tidy or dark rubbing.

Materials-free: Make a smooth glide and a stop-start hand path, with a still end pose. Choose one texture for the invented feeling. Pupil may direct the adult or use eye-pointing. Staff record the actual movement method, not rubbing.

Check and response: Example only: I chose ridges because the broken marks feel busy to me. A different reading is valid. Record what was actually tried.

Review and exit

Review · 5 minutes

Say and do: Share privately if preferred. Ask the pupil what the texture suggests to them. The listener says I notice, then checks the maker meaning. In the last two minutes collect crayons, stack clean card, collect scraps and keep tests in each pupil tray.

Look for: The choice stays with the pupil; both tests are stored and no private feeling is inferred.

Materials-free: Pupil repeats or directs the two motions. Adult notes their sequence and chosen version for tomorrow.

Check and response: A useful observation names repeated ridges, faint patches or smooth movement rather than judging the maker.

Exit · 3 minutes

Say and do: Date the real work. Scribe the pupil own words if requested, then read them back. Note the actual help and method. Keep the tests for the next lesson. If only a rehearsal happened, record rehearsal honestly.

Look for: Dated entry retains technique, two trials, choice, reason and support actually used.

Materials-free: Pupil gives or confirms an oral log. Staff record it at the next opportunity with the true activity date.

Check and response: Example only: I tried texture rubbing. I chose the ridged test because it feels full of energy.

Access and adult support

Cognition And Learning

Give one step at a time, point to the current instruction and model the first step only. Keep the plan or test visible. Check understanding by asking the pupil to show the next step.

Communication And Interaction

Allow pointing, sign, speech, gesture or an adult scribe. Give processing time. Read scribed words back for confirmation. Use I chose ... because ... .

SEMH

Use invented or abstract ideas. Offer a quiet pause, private audience and a clear return cue. No personal disclosure, forced touch or public performance.

Sensory And Physical

Offer seated silent movement, larger comfortable actions or pupil-directed adult making. Allow looking without touch. Keep sounds below talking volume.

EAL

Plan in any language. Model the key words with objects or gestures; accept a drawing or oral sequence before fuller sentences.

Prompt ladder

1. Point to the place or instruction. 2. Ask a short question. 3. Rephrase. 4. Offer a scaffold or choice. 5. Model the first step only, then return the task.

TA focus

I do: Point to the demonstrated step. Check understanding without choosing the pupil meaning.

We do: Ask for a pupil choice, allow thinking time and use the least help needed.

Independent: Support access, retain actual work or a precise witness note, and confirm the pupil words and support used.

Where this leads

Artists and designers test a method, follow and adapt a plan, and explain choices to other people.
