# Teacher and cover plan

Making from my resilience plan

Weekly outcome verbatim: Create my resilience-themed piece.

Year A · Resilience & Change · Explore · GROW Weekly Spring row 91

40 minutes: Arrival 3; Starter 3; I do 6; We do 6; Create 14; Review 5; Exit 3. Tidy in the final two Review minutes. Demonstration, route and stretch tasks use time within these stages.

## Prepare

For up to five pupils: five Week 3 plans, arts logs and actual Week 2 skill records; five pencils and small workspaces.

Check each plan materials list in advance. Drawing fallback: five sheets plus scrap and five familiar drawing tools. Paper route: clean scrap and shared glue sticks. Use familiar materials and local procedures.

For paint only if planned and approved: mats, stable water pots, brushes, a small amount of familiar washable paint and cloths. Keep wet work away from electrical equipment.

Sound needs no instrument: quiet fingertips and a stop signal. Silent movement or directed adult actions need no materials. Offer seated, quiet and private options.

Set aside five safe storage places for unfinished work with its plan and actual log. No phone or media recording is required.

## If prior work is missing

If prior work is missing, offer a brief honest restart: choose an invented idea and a small achievable form, state a first step and needed tools or no-materials route, then make a first version. Date it today and label it a new start. Do not claim missing earlier evidence.

# Arrival and starter

## Arrival · 3 minutes

Say and do: Retrieve the annotated plan, tool quantities, access notes and intended effect. Pupils may use an invented seed, a path or their own abstract idea. If the plan is missing, use the brief catch-up in the cover plan. Do not claim it was made last week.

Look for: Pupil identifies their actual plan and a first making step.

Materials-free: Read back the retained oral sequence. If absent, the pupil chooses a simple new sequence and confirms it.

Check and response: Resilience may involve help, rest or a different route. It does not mean ignoring discomfort.

## Starter · 3 minutes

Say and do: Check real supplies against the Week 3 plan. Its draft time split was provisional. Today the shared taught structure gives fourteen minutes of making, with a further fourteen next lesson. Scale the first section to fit; note this change in the log. Preserve the maker intention.

Look for: Pupil sets a manageable first section and confirms actual resources.

Materials-free: Choose a short silent sequence that can be made and repeated within fourteen minutes.

Check and response: A smaller piece can still express the whole idea. Record a changed time or resource choice honestly.

# Demonstration and shared practice

## I do · 6 minutes

Say and do: Use an original adult plan: a line meets a block and turns towards open space. Point to the start, block and new route on the plan. On paper make the first line and block, then test the turn. My line almost touches the block, so I leave a small gap to make the new route clear. I note: I left a gap because I wanted the turn to show. For silent movement, start a forward hand path, stop, turn sideways and continue. Explain which version is actually being made.

Look for: Adult shows plan-to-making links and a real practical decision. The adult sample is never used as pupil evidence.

Materials-free: Model the same sequence silently with one hand. Pupil can direct position, pause or route without moving.

Check and response: CfU: Which note records a decision: I worked hard, or I left a gap to show the turn? The second. Model a specific feature if the answer is vague.

## We do · 6 minutes

Say and do: Invite each pupil to identify one feature. Hinge: a planned material is unavailable. A: pretend it was used; B: choose an available method, keep the idea and record the change; C: copy another pupil piece.

Look for: Pupils select B and explain how an available method can keep the intention.

Materials-free: Offer silent movement or pupil-directed adult actions and ask which part still expresses the planned idea.

Check and response: B. If unsure, model an unavailable paint colour replaced with pencil marks. Parallel check: a larger sheet is unavailable; can a smaller sheet work if the layout is adjusted and logged? Yes. Start making once each pupil identifies an achievable next step.

# Making and evidence

## Create · 14 minutes

Say and do: Use the pupil chosen art form. Visual route: follow the labelled layout using familiar drawing tools, paper shapes or approved paint. Sound route: use the planned short original pattern below talking volume, stop on a raised hand. Silent route: use the planned order of actions, with comfortable movement. In the fourteen minutes, use about two to set up, nine to make and three to check and note a decision; adapt to access needs. Make a first version rather than expanding the task. Staff scribe only confirmed words.

Look for: A genuine first section or whole short first version follows the plan. The pupil records one decision, any change and the actual remaining work.

Materials-free: Perform or direct the planned silent sequence. Adult records exact actions, order, pauses, support and confirmed intention. No media capture is needed.

Check and response: Example only: I changed to a small sheet. I left more space round the turn to show another way forward. The final section is still to do.

## Optional next level stretch

Use your Week 2 skill goal while making. Compare two small versions of a feature. Ask for one useful comment. Explain which version fits your intention and why. Note a time, tool or access limit.

Keep the actual tests or witness descriptions, skill goal, feedback, pupil decision and reason.

Your Explore work is complete without this task. Retain additional evidence for a later level review; this task does not complete a higher award.

# Review and exit

## Review · 5 minutes

Say and do: A listener names a feature, then asks if it fits the maker idea. The maker can accept or decline a suggestion with a reason. Use the final two minutes for caps, water, scraps and safe storage. Keep the work with the plan; note any wet areas or loose parts.

Look for: Pupil states what is actually made and one manageable next step.

Materials-free: Repeat the actual sequence once, then read the witness description back for correction.

Check and response: A useful comment is: I notice a pause before the turn. The maker decides whether that helps their intention.

## Exit · 3 minutes

Say and do: Record the date, actual work, decision, plan change or no change, support and next making step. If the work is incomplete, keep that clear. Preserve the pupil first version or a precise witnessed description.

Look for: Dated record shows an actual making process rather than repeating last week planning entry.

Materials-free: Use oral responses read back to the pupil, then retain a dated witness note.

Check and response: A pupil may say I kept the plan because the new route was clear. Do not force a change that they do not need.

# Access and adult support

## Cognition And Learning

Give one step at a time, point to the current instruction and model the first step only. Keep the plan or test visible. Check understanding by asking the pupil to show the next step.

## Communication And Interaction

Allow pointing, sign, speech, gesture or an adult scribe. Give processing time. Read scribed words back for confirmation. Use I chose ... because ... .

## SEMH

Use invented or abstract ideas. Offer a quiet pause, private audience and a clear return cue. No personal disclosure, forced touch or public performance.

## Sensory And Physical

Offer seated silent movement, larger comfortable actions or pupil-directed adult making. Allow looking without touch. Keep sounds below talking volume.

## EAL

Plan in any language. Model the key words with objects or gestures; accept a drawing or oral sequence before fuller sentences.

## Prompt ladder

1. Point to the place or instruction. 2. Ask a short question. 3. Rephrase. 4. Offer a scaffold or choice. 5. Model the first step only, then return the task.

## TA focus

I do: Point to the demonstrated step. Check understanding without choosing the pupil meaning.

We do: Ask for a pupil choice, allow thinking time and use the least help needed.

Independent: Support access, retain actual work or a precise witness note, and confirm the pupil words and support used.

## Where this leads

Artists and designers test a method, follow and adapt a plan, and explain choices to other people.
