Feedback privacy and arts evidence notes

This week reviews original pupil work and makes a real revision. No visit, visitor, public display, compulsory performance or live encounter is confirmed or claimed.

Private peer route in GROW

Ask the maker first, then the prospective peer separately. Agree the small part that may be shared. Keep the exchange private and at most one peer comment. Either pupil may stop. Use feature-based language without marks, rankings or personal judgement. Do not record peer names in the supplied template.

If the peer route is not used

Record declined, unavailable or not used honestly. Staff feedback or self-review supports the same core task. Do not write a staff observation as if a peer said it.

Materials free response

Replay or direct a short original silent sequence, change one feature and retain precise witnessed before-and-after notes. A pupil may speak, sign or use a scribe. No photograph or audio recording is required.

What good looks like

Evidence keeps the real work, two stars or structured review, actual revision, result, support and pupil voice distinct. A changed version is not automatically a better one. Record what happened and the next step.
