Staff checks and model answers

BUILD Spring 1 Week 6 Monday 8 February 2027 P5 Year A Explore

Arrival

An original work, actual log or precise earlier witness note can support a claim. A new recollection is labelled as recollection.

Starter

A useful comment names a real feature, such as a soft beat or wide gap. Nice alone does not tell us what the pupil noticed.

I do

Check: Which tells us more, it was good or I made the pause longer? The second identifies an actual change. Ask what changed in the model.

We do

If A is chosen, show the one change again. Parallel check: Can one silent sequence prove every piece was perfect? No. Use one observed feature instead.

Create

Possible pupil wording: I used a soft sound. I changed the last pause. I learned to try my idea twice. Accept different wording when the work supports it.

Review

The pupil can change a scribe’s wording. Support does not remove ownership, but the record must name the help used.

Exit

A short review can be sufficient when it captures the pupil’s own choices, learning and evidence. Length is not the assessment target.

Misconceptions and evidence

BUILD Spring 1 Week 6 Monday 8 February 2027 P5 Year A Explore

An adult scribe means it is not my review.

The ideas remain yours when the adult records your words, reads them back and notes the help.

A tick means the whole award is complete.

The grid records these six weekly outcomes only. Wider requirements and genuine evidence need a separate judgement.

A good review says everything was perfect.

Name a real strength, change or learning point and an achievable next step.

Cold call with choice of response

Foundation: Point to the source or piece you used.

Middle: What does this feature tell you?

Higher: Which evidence supports your view, and what remains uncertain?

Evidence rule

Keep the pupil’s dated own-word review or research, actual source or work reference, accurate support and the six-outcome tick-and-comment grid. Mark missing or unfinished evidence honestly. No completed award is inferred.
