Source and exact outcome

Compare old and new objects (then & now). From BUILD Weekly - Spring!B41/C41. Thursday 14 January 2027, P3. Theme: Resilience & Change. This is formative. Week 6 is assessing under the owner brief.

Picture key and starter

Top row gives older designs; bottom row gives more recent designs. Left: kettles. Middle: telephones. Right: school bags. Any vertical object pair is a valid starter match. These are generic invented illustrations, not documented historical artefacts.

Valid similarities and differences

Kettles: both heat water and have a handle, lid and spout; the top-row handle sits above the body, while the bottom-row handle sits at the side. Phones: both allow talk with someone; one has a round dial and handset, the other has a flat screen. School bags: both carry things; one closes with a flap and buckles, the other has a zip. Accept any accurate shared feature and matched-feature difference supported by the two pictures or supplied context.

Visible clues and supplied information

Uses and older/more recent labels are given context. Pupils can see features, but cannot establish exact age, material composition, weight, price, safety or working condition from a picture. Do not claim a particular manufacturing date or maker. Both design styles may still be in use.

Misconceptions and reteaching

Old does not mean broken or bad; new does not mean best. Colour alone does not date an object. A kettle and a bag are not the matching pair for this task. Comparing a buckle with a screen mixes categories: return to the two bag closures. If a pupil names only one object, prompt for the second picture and a paired feature.

Record only what happened

Code	Pair and comparison	Actual help or gap
Pupil number: ____	_____	_____
Pupil number: ____	_____	_____
Pupil number: ____	_____	_____
Pupil number: ____	_____	_____

Use the fourth pupil-number field only if a fourth pupil attends. Leave absent pupils blank. Check one similarity and one paired difference for each pupil. A shared discussion does not establish each learner's response.

Scaffolds and scribing

Every task keeps a word bank, sentence starters and visible model. Scribe exact words or selected labels. Read back privately for keep/change, retaining who selected the ideas and actual prompts. No public questioning or required reading aloud. Use usual aids and quiet wait time.

Aspire

A second comparison can use the kettle handles. The visible model is "Both kettles heat water. Then has a top handle. Now has a side handle." An unanswered question can be "How heavy is it?" Do not invent a weight. A thoughtful question is not evidence that its answer is known.

Feedback and evidence

Use HUM-BUILD-S1-W02-E1. Offer authentic words or choices to the Communication portfolio. Actual audience reply, one NS and the pupil's own response precede R. Actual banking precedes E. [AWARD] / [QUAL] checks remain separate; no qualification completion is inferred.
