Source and exact outcome

Talk about how my local area has changed. From BUILD Weekly - Spring!B43/C43. Thursday 28 January 2027, P3. Theme: Resilience & Change. Formative; Week 6 is assessing under the owner brief.

Picture key and valid comparisons

Top row then; bottom row now. Left high street: steps replaced by a ramp; shop fronts remain. Middle park: a bench added; tree and path remain. Right stop on a bus route: shelter added; pole and fence remain. Starter: the park pair both show the tree. Accept another accurate visible feature if linked to both views.

Declared invented examples

All scenes and changes are invented teaching examples. No real place, street, building, maker or date is identified. The label then/now is supplied context. Bus times, fares, route length and reasons for change are unknown. Do not infer them from the shelter picture.

Local area and evidence basis

Define local area as places near us and use the model town to practise change language. An optional already-known example can be described by type only, such as a park or bus stop. Never ask for names, addresses, routes home or personal details. Record pupil-stated experience separately from the invented model. Do not invent an actual local change to fill a gap.

Misconceptions and private hinge

A changed feature does not mean the whole place is new. Match the same tree/path or shop fronts before comparing. Bench added or removed? Added. Parallel check: shelter added or removed? Added. Reteach by pointing to the space then and new feature now. A possible effect is not proof of why a change happened.

Record only what happened

Code	Pair and change	Basis and actual help
Pupil number: ____	_____	_____
Pupil number: ____	_____	_____
Pupil number: ____	_____	_____
Pupil number: ____	_____	_____

Use the fourth pupil-number field only if a fourth pupil attends. Leave absent pupils blank. Record each pupil’s own selection and communicated then/now change. A shared model alone does not establish an individual response.

Scaffolds and scribing

Every task keeps bank, starters and visible model. Read labels quietly if wanted. Scribe exact words or selected labels and read back for keep/change. Record who supplied the ideas and actual prompts. No public questioning or required reading aloud. Talk may use speech, pointing or usual aid.

Aspire

One same feature: the tree remains. A possible effect: a bench may help people rest; a shelter may help people stay dry. These are possible uses, not verified reasons or views held by everyone. Word bank: same, tree, bench, rest, may. Starter: The __ is still here. A __ may help us __. Model: The tree is still here. A bench may help us rest.

Feedback and evidence

Use HUM-BUILD-S1-W04-E1. Offer authentic responses to the Communication portfolio. Actual audience reply, one NS and the pupil’s own response precede R. Actual banking precedes E. [AWARD] / [QUAL] checks remain separate; no qualification completion is inferred.
