Teacher and cover planner

Big feelings and helpful steps

Wednesday 13 January 2027 · P1 · 40 minutes · Year A

BUILD · three to four learners · Spring 1 Week 2 · formative

Theme: Resilience & Change. Six-week term; Week 6 assessing.

Thread tags: SMSC S/So (M/C none); British Values IL/MR (D/RL/T none).

Exact source outcome

Name a big feeling and a way to manage it.

Source: BUILD Weekly - Spring, PSHE & Citizenship, row 65. B65 Spr1·W2 and C65 exact. Named framework/resource context is rendered generically. No accreditation or therapeutic claim.

What this lesson teaches

Name cross, sad, worried or excited in calm invented scenes. Use a stated feeling rather than diagnosing a face/body clue. Choose a safe, already familiar school help step. Match by possibility, not one fixed pair. Practise “When I feel… I can…” with a fictional scene or picked words, not a personal disclosure.

Prepare

Books, pencils, Support Cards and Vocabulary Mat; usual aids and staff evidence record. Face cards are reference pictures. Body clues, help steps and scenes are editable text. Confirm the school’s familiar breath, movement and supported quiet-space options, available trusted adult and help route. No new technique, compulsory practice or public response.

Source and calendar

Wednesday 13 January 2027 P1, Year A. The owner supplies the date and timetable. Spring 1 Week 2 runs 11–15 January. Theme Resilience & Change; six teaching weeks, Week 6 assessing. The exact C65 outcome is used; identifying source resource labels are generic.

Where this leads

This helps me name a feeling in a story and choose safe help when a task or plan feels hard in learning or future work.

Forty minute sequence

Chunk	Minutes	Teaching
Chunk 1	0–12	3 calm arrival; 4 words; 4 model; 1 reset.
Chunk 2	12–25	6 guided match; 3 private hinge; 3 help choice; 1 reset.
Chunk 3	25–40	9 individual line/drawing; 3 feedback; 3 private exit.

Chunks last 12, 13 and 15 minutes. Two one-minute resets are included in the total. Reduce repetitions for access. Keep word bank, starter and visible model on every task. No question asks for a learner's own current feeling.

Chunk 1

0–3 calm arrival and starter: use story A words, choosing cross or sad privately. 3–7 pre-teach the four feeling words and four familiar school help steps. A picture/body clue may fit many feelings; story words state the feeling. 7–11 model A: cross, tight hands, tell a trusted adult; show the written line. Privately check feeling and help. 11–12 reset with familiar neutral option.

Chunk 2

12–18 guide B/C/D one short line at a time. Match a stated feeling and possible safe help; accept more than one safe match. 18–21 main private hinge B: a face/body clue may fit but does not prove a feeling; use the story words. Parallel A: choose a safe help step; do not claim the feeling must go away now. If unclear, point to the quote, re-model and check privately. 21–24 choose a familiar help step without requiring practice. 24–25 reset.

Chunk 3

25–34 each chooses one invented scene and names the feeling plus a safe help step. Use "When I feel… I can…" for the story/picked words, not personal history. Drawing a story face or help step with labels, pointing or exact scribe is valid. 34–37 one next step and response. 37–40 private exit names a feeling/help pair. A pass is unobserved. All seven task scaffolds remain visible on Support Cards.

Scaffolds and response routes

Level 2 on every task

Each of seven tasks has a short bank, starter and visible model in Support Cards. These stay on all routes: Starter, Model check, Guided match, Private hinge, Help choice, Individual line or drawing, Feedback and exit. Repeat exact model wording as a reference, never as prefilled learner evidence.

Supported

One short story line at a time. Keep word bank, sentence starter and visible model. Offer two feeling/help choices, pointing, aid, drawing or faithful scribe. Same name-a-feeling-and-help goal. Record any answer cue.

Independent

Use a chosen story, word bank, starter and visible model. Name the stated feeling and choose a safe familiar strategy. Normal reading, communication or scribing access remains. No personal story required.

Aspire

Keep all Level 2 aids. Explain a safe choice or show that more than one strategy might fit. Use the same short practice line; more writing or personal disclosure is not required.

Worked example and fade

Read A's quote "I feel cross." Point to cross. Tight hands are a stated possible clue, not proof or a diagnosis. Model "When I feel cross I can tell someone." For B/C/D offer a bank, short frame and A model; reduce answer cues only. Normal reading, drawing, communication and scribing aids stay available.

Scribed route

Let the learner point to a story feeling/help word, use an aid, draw or speak. Record exact selection, read back quietly and permit correction. Label a drawing through the learner's choice; do not grade art or infer feeling from a face. Record access separately from supplied thinking.

Prompt ladder and TA focus

1 Point to place/instruction. 2 Ask a short question privately. 3 Rephrase. 4 Offer scaffold/choice. 5 Model first step only, then return task. Allow processing. Input: point to the stated word; guided match: accept safe options; individual work: keep all Level 2 aids and log actual help.

Book first

Pupil pages are reference cards, not write-on sheets. Use a book, usual aid, drawing or faithful scribe. Do not copy all source text. Plan in any language. No task asks for personal/current feelings or a public account.

Checks access and private help

Check after the model

Offer A feeling choices cross/sad, and safe help choices tell someone/breathe. Key feeling cross from the quote. Either familiar safe help can fit; model tell someone. Ask privately or use pointing. Re-model the quote and line if needed.

Main and parallel hinge

Main key B: a face/body clue may fit a feeling; it does not prove it. Story words state cross. A false option says the face proves the feeling. Parallel key A: choose a safe help step. The false option says the feeling must go away now. Leave bank/starter/model visible. Pass/silence unobserved; re-model and recheck privately.

Planned adaptations

Cognition and Learning: one line, labelled images, four simple words and short choices. Communication and Interaction: literal text, wait time, familiar aid, pointing/drawing or exact scribe. SEMH: calm third-person scenes, private turns, predictable resets/pass/return. Sensory and Physical: uncluttered print, comfortable seat, normal aid and agreed supported space/movement. EAL: plan in any language. Numbers and words carry meaning; colour optional.

Private help route

Point to HELP, write or ask to talk in private with a trusted adult through the school's help route. If one adult is busy, use the route to another. Pass, pause and supported return available.

Staff response

If a pupil discloses, listen calmly, reassure and pass the concern to the safeguarding lead through the school's procedure. Do not probe or promise secrecy. Keep details out of this pack and shared evidence.

Misconceptions

A face proves the feeling: correct with the story quote and body-clue rule. One feeling has one right help step: offer more than one safe possibility. A step must make the feeling go away: it may help, with support/time. A big feeling is wrong: acknowledge it; judge naming and safe help, not the feeling itself.

Lesson resource · CC BY-NC-SA 4.0: free for classroom use, share and adapt with credit, no resale

Evidence and feedback

What to keep

One dated individual story response or drawing/selection with the chosen feeling and safe familiar help step. Keep story reference, first response, usual access, supplied thinking, next step and reply. A faithful point/aid/scribe record is valid. Do not infer a real-life coping performance from a story line.

Judgement

Secure: names a stated big feeling and a safe familiar way to manage it. Partial: names feeling or help but not both. Not yet: needs further modelling. Unobserved: pass or no collected response. Alternative safe matches accepted with a short explanation/selection. Drawing skill, disclosure and practising a technique are not conditions.

Feedback and marking

One next step: name the story feeling or add a safe help step. Keep first try and reply separate. VF verbal feedback; WS with support; I own thinking; NS next step; // self-edit; ? read back; E actual saved evidence. R only after Voice, Audience, NS and response in the same colour, on the same page or usual mode.

Evidence record

Evidence Sheet page 1 is a book-task reference; page 2 private staff record with blank entries. No prefilled answers or personal concern details. Read exact scribing back. Offer to Communication portfolio; staff confirm any accredited mapping.

Continuity

Spring 1 Week 2 is formative; Week 6 assessing. Builds on recognising that change can feel hard by naming a big feeling and safe familiar help. No clinical advice, treatment claim, promised emotional outcome or requirement to demonstrate coping.

Scope

Only BUILD RSHE Spring 1 Week 2 authored. No later weeks or separate RSE content. Pause for Downloaded.
