Support adult brief

Year A | Autumn 2 · Week 2 | 9 November 2026

Term theme: Identity & Belonging. Careers: game testers checking that player actions update the right counters.

Aim: each pupil updates two score variables from two distinct maze contact events using fictional project cards.

Use card A or B only. Keep real personal details out.

Ask which variable matches the pickup before choosing the block.

Point to change versus set and let the pupil select the block.

Keep instructions short and allow time to test each event.

Read a card rule back exactly if asked.

Switch shared-device roles after six minutes.

Check each pupil’s own saved and reopened project file.

Record real prompts, adult typing and scribing.

At the exit, ask the pupil to trigger both events and explain why change by 1 is used instead of set to 1. Give one next step and hear the response. Paper work is rehearsal for the digital checks.
