Supported route

Year A | Autumn 2 · Week 2 | 9 November 2026

I can update two score variables when the player touches a pickup or a hazard.

1. Open your maze file for project card A or card B.
2. Use the two-event scoring frame.
3. Add change pickup score by 1 inside the pickup check.
4. Add change hazard hits by 1 inside the hazard check.
5. Ask a partner to test both events and the start reset.
6. Save, close and reopen the file. Check both rules.

Planning frame

Card: Space maze A OR Deep-sea maze B

Pickup event: When touching pickup, change ... by 1

Hazard event: When touching hazard, change ... by 1

Check my work

[ ] I added a rule that changes the pickup score by 1 on contact.

[ ] I added a rule that changes hazard hits by 1 on contact.

[ ] I used change blocks for events and kept set blocks for start.

[ ] I tested both events and the start reset with a partner.

[ ] I reopened my saved file and checked both event scripts.

One reason to use change instead of set

_____

You may point, speak, build or ask for exact scribing. Each person keeps their own project file and check.
