Teacher and cover plan

Tuesday 15 December 2026 | P6 | 40 minutes

Lesson

My final ICT task | Tuesday 15 December 2026 | Tuesday P6 | 40 minutes
Year A. LAUNCH pair. Assessing week.

Aim

I can use my ICT skills to make and check a clear kit update.

Theme

Identity & Belonging: communicate a fictional kit plan so others can use it. No personal profile or access disclosure is required.

Careers

A short account of checked work can support an application. Use a saved example to explain a skill and the help you used.

Prepare

Use the fourteen-slide lesson or HTML and the Assessment_Start spreadsheet. Prepare each pupil earlier outputs from Weeks 1-6 for private access. Make document and slide copies available, keeping originals. Missing work is logged. Offer the task brief, one route and the evidence sheet in ordinary or pink print. Two devices are preferred.

Participation

Model first on different data. Use private answers, pointing, typing, books or quiet talk. No cold calling, required reading aloud or public presentation. The paragraph frame is available to all. Record access support separately from supplied reasoning.

Success

I used the right source and checked my results.
I made clear files for the reader.
I gathered evidence and recorded the help I used.

Lesson sequence

Tuesday 15 December 2026 | P6 | 40 minutes

0 to 3 minutes Arrival

Slides 1-2. Find earlier outputs, protect originals and choose task labels. Adult preparation is not pupil file-management evidence.

3 to 6 Starter

Slide 3. Private source choice from the two task cards. Capture the first response and support used.

6 to 10 Model calculation

Slide 4. Use strip packs 2 at 3 and tab packs 1 at 4. Model products 6 and 4, total 10 and chart range excluding total.

10 to 12 Model paragraph

Slides 5-6. Model a short explanation on the separate data. Explain how evidence and support will be recorded.

12 to 15 Guided checks

Slides 7-8. Model copy-save-reopen, image description and order. Private hinge: whole total is not another item. Re-model if needed within the slot.

15 to 33 Assessed task

Slides 9-12. Formulas and chart about 7 minutes; document 5; one updated slide and saving 6. Keep answer reveals closed until first attempts are recorded.

33 to 38 Evidence

Slide 13. Gather seven weeks of work through the index. Inspect current files and record observed actions, prior evidence and gaps separately.

38 to 40 Exit

Slide 14. One success, one next step, private response and acknowledgement. Keep unfinished checks pending.

Assessment and adaptations

Tuesday 15 December 2026 | P6 | 40 minutes

Before support

Observe and retain the first attempt before giving a reasoning prompt or correcting a result. Do not count copying a supplied answer as an independent skill. Routes are access choices, not attainment grades.

Record for each skill

Use on own, access support, reasoning prompt, or not yet seen, with the actual action, date and file or book location. Exact scribing can preserve pupil reasoning but does not prove independent typing. Adult-made files do not prove pupil editing.

Cognition and learning

Show one chunk at a time. Keep the brief and word page visible. Fade the separate model. Use the prompt ladder: point, short question, rephrase, scaffold or choice, model first step only.

Communication and EAL

Use the paragraph frame, quiet talk, pointing and planning in any language. Staff may read privately on request. Keep meaning and digital action evidence distinct.

SEMH and physical access

Offer predictable stages, a quiet pause within the task time, pink paper, zoom and uncluttered views. Avoid comparison between pupils. Record exact adult typing and any further prompts.

One device or missing files

Use two nine-minute device turns with book planning alongside. If this prevents completion, prioritise formula and chart evidence, then the document and slide. Record the remaining actions for a later check. A blank document or slide may replace a missing starter but is dated today, not backfilled as earlier work.

Evidence and follow up

Tuesday 15 December 2026 | P6 | 40 minutes

Seven week collection

The evidence sheet indexes all seven weeks. Record actual pupil file paths or book pages, original dates, found or missing status and support. Referencing an earlier output does not make it a new independent observation.

Assessed checks

Inspect safe file handling and source choice; document title and heading; row and total formulas; chart range and meaning; slide readability, image description and order; paragraph reasoning. The staff guide gives criteria and answers. Use qualitative evidence, not an invented accreditation grade.

Saving

Use ICT_Practice/W07_Final. Kit_A_v1 or Kit_B_v1 may be used for the document, spreadsheet and presentation because their extensions differ. Keep originals. Reopen each saved file. Aspire uses v2 and keeps v1.

Feedback

Give one specific success and one NS. Record VF, WS or I only as observed. Allow the pupil to respond in the same colour, on the same page or usual mode. Use R after the response and adult acknowledgement.

Limits and absence

Paper work can show source reasoning and planned calculations, not software edits. If an image-description or order control is unavailable, record that check not yet. Native playback and screen-reader checks need the intended application. Arrange a later check for missing or incomplete evidence.

End of sequence

Week 7 closes the approved ICT half-term. Retain the evidence index with the outputs. Creative Arts Spring 1 begins only after the next owner brief.
