Staff answers and cover notes

Exact outcome

Resilience & online-safety task; bank the unit award.

Assess both products. All cases and the younger audience are invented. Accept safe, reasoned alternatives. Do not contact real younger pupils.

Resilience

Adapting when something feels hard or changes. It can include rest, a smaller step and help. It never means staying in harm or coping alone.

Mental health

Everyone has mental health. It links to thoughts, feelings and how we cope with daily life. A sign may suggest support, but does not prove a diagnosis.

Privacy

Think about who can see personal details. Share less, ask before sharing another person, and follow school rules.

Digital footprint

Traces from online actions and sharing. Other people may copy or share a post. Deleting it may not remove every copy.

Report

Tell a trusted adult about a concern. With adult help, use suitable report or block tools. Do not forward harmful or private content to prove it.

Model A

The younger learner could feel cross after the model falls. They could try one smaller step and ask school staff, Can you show me the first step? A safe pause or a familiar gentle move may help. If one step does not help, they can ask for another way. Before sharing, leave out private details and ask before including someone else. Use kind words. A private setting may limit the audience, but someone may copy the post. Stop replying to a concerning message and ask a trusted adult for help to report or block it. Do not send it on.

Starter guided work and hinge

A small step with help is resilient. A plan is product 1; privacy, footprint and response advice form product 2. Improve Keep trying alone and send the photo now: adapt the task and seek support; check details and consent before sharing. Main B meets both products. A misses one, C exposes private data, D promises too much. Re-model then parallel A: ask staff rather than send it on.

Two formats with equal checks

Choice B plan and guide

Plan: the learner may feel cross after the changed order and fallen model. A familiar pause, one smaller part and a clear first step from staff can help. A fairer thought is I can try one part and ask. If not enough, use another trusted adult or the agreed supervised pause. Guide: remove routine details, do not post another person without asking, use kind words, and explain that private settings cannot prevent every copy. If a message causes concern, stop engaging and tell school staff for report or block help. Do not send the content on.

Choice C plan and guide

Plan: for the same shared story, the learner may feel cross after the card model falls. A smaller build step, a model of the first part and trusted staff support may fit. If one step does not help, adapt it with staff or ask another trusted adult. Guide: keep routine details out and ask before sharing another person. A post can leave traces or copies even after deletion. Use kind words. If a message causes concern, stop engaging and ask an adult privately for safe report or block help.

Equal demand

Both choices require a resilience plan and an online safety guide. Same checks: a possible feeling, safe strategy, reason, support and fallback; privacy, consent, kindness, copying limit and safe response. A map needs no art skill and a note needs no extra words. Do not treat normal aids or an exact scribe as content help.

Supported

Choose either format. Complete both products. Keep word banks, the model, short frames and usual aids. Offer two possible steps if needed and record this content help.

Independent

Choose either format. Complete both products with story clues, feasible steps, reasons, support and a fallback. Keep the visible model and usual aids.

Aspire

Choose either format and complete both products. Explain a privacy limit and adapt the resilience or help plan if a first step does not help. Do not add personal detail or extra length for its own sake.

Review and exit

Accept a safe help route with a reason, or a correction of Coping means doing it alone. Keep one NS and actual reply. Do not infer improved mental health, future resilience or account safety from this work.

Evidence and safe support

Six outcome review

Use the blank grid on Evidence Sheet page 3. Match claims to actual saved work, including a valid prior record where appropriate. Add a work code, observation, usual access and actual content prompts. Mark more learning needed or not observed honestly. A missing response or pass is unobserved, not proof of lack of knowledge. Do not tick all outcomes because both products exist.

The unit award

The unit award is conditional on staff checking actual saved evidence against its current requirements through the usual process. This task does not create criteria or guarantee the unit award. Keep missing or unobserved learning visible and plan a further chance. Do not tick every outcome from one product. No claim of future coping or real account safety follows from classroom work.

Access and feedback

Books are the first route. Type instead on Evidence Sheet page 2 has fields for both products. Point, draw, use an aid or use an exact scribe with readback and correction. Keep usual reading and language aids. Plan in any language. No public questioning. Keep first thinking, one specific NS and the learner reply in the same colour, on the same page or usual mode. VF verbal feedback; WS worked with support; I independent; // self edit; ? read back; E actual work saved. R only after Voice, Audience, one NS and the actual reply. Offer to the Communication portfolio; staff confirm any mapping.

Privacy and recording

The plan and guide use invented people, with no pupil health details or real accounts. Personal cards from earlier weeks remain pupil kept. Do not request screenshots or ask pupils to copy, forward or investigate harmful content. Trusted staff decide safe recording through school procedure. Tools may not resolve a concern at once; support can continue.

Private help

Ask a trusted adult or school staff privately. A family doctor can discuss health and help find care. A suitable helpline can offer listening or advice; staff help find an age-appropriate route. Use words, a note, HELP or the usual aid. If the first adult is busy or help is not enough, ask another trusted adult. For an urgent concern get school staff at once. No service, website or number is named.

Discreet step out

Before teaching, agree the discreet pause signal, available adult and familiar supervised quiet route. Staff acknowledge it privately. No public explanation is needed. Offer a neutral task, supported return or private catch-up. Do not send a learner away alone. Pass is not failure.

Safeguarding

Any disclosure goes to the safeguarding lead through school procedure. Listen calmly, reassure, do not probe, investigate or promise secrecy. Follow the immediate school route for urgent concerns. Keep real concerns and personal details in the separate safeguarding record, not shared learning evidence. A pupil unable to identify a trusted adult is supported privately, not pressed.

Source and scope

GROW Weekly - Spring B69 and C69. Exact scheme outcome checked. The owner supplies the date, period and group. This is the assessing week. Exact outcomes for rows 64–69 remain on the staff grid. All cases, tasks and models are original. This lesson closes the half term; no later lesson is built here.
