Emotions and ways to manage stress

Wednesday 6 January 2027 · P3 · 40 minutes · Year A

GROW · up to five learners · Spring 1 Week 1 · formative

Theme: Resilience & Change. Six weeks, 4 January–12 February 2027. Week 6 is assessing.

Thread tags: SMSC S/So (M/C: none); British Values IL/MR (D/RL/T: none).

Exact source outcome

Recognise emotions and healthy ways to manage stress.

Source: GROW Weekly - Spring, row 64, B64 Spr1·W1 and C64 outcome. The owner's PSHE line sits within the generic PSHE & Citizenship heading. Named alignments and resources in A64/D64/E64/F64 are not reproduced.

Success and task choice

Recognise a stated emotion using a story clue; identify two healthy ways to respond to the pressure and explain how each may help; identify a private help route. Choice 1 is a case map for B. Choice 2 is an advice note for C. Both meet the same checks. Offer typing for either choice.

Prepare

Books, pens, Support Cards, Vocabulary Mat and an adult evidence record. Offer an editable copy of the Evidence Sheet for the optional Type instead route. Keep its typed page on screen; printed pupil pages are references, not write-on worksheets. No internet, account or pupil phone is needed. Check the actual school help route and a supported pause space. All questions and feedback are private.

Teaching boundary

Stress is a response to pressure; emotion words describe how a person feels. One sign or behaviour does not diagnose stress or a condition. Use the fictional words, not guesses from appearance. Healthy strategies protect the person and others, allow support and address the pressure where possible. They may help; none is a guaranteed cure. No personal-disclosure prompts, clinical checklist or forced calming exercise.

Where this leads

This helps me recognise pressure, choose a useful next step and ask for support in learning or future work.

Forty minute sequence

Phase	Min	Teaching
Arrival and starter	5	Settle, show private help route; choose matching or word finding.
Input	5	Read outcome; distinguish emotion, stress and helpful action.
Model and guided work	7	Model A; choose two steps or improve advice.
Private hinge and choice	5	Check help-seeking and strategy limits; choose main task and response mode.
Individual task	12	Case map B or advice note C, with book, typing, aid or scribe.
Review	4	Check a response or repair a missing link; one next step and reply.
Private exit	2	Explain a strategy or correct a myth.

Total 40 minutes. Brief pauses and processing time sit inside the phases. Reduce repeated examples when extra access time is needed. No time is added for optional slide 11 or hidden staff slide 12.

Starter choices

Read two fictional quotes: “I feel worried about starting” and “I feel frustrated when steps are unclear”. Choose matching the two words to the quotes or finding and labelling the feeling words. Pointing, a book or typing is valid. Do not ask how anyone in the class feels.

Model and fade

A: worried is stated in the quote. Three tasks create an organising pressure. Model one small first step and asking a trusted adult to agree priorities. Explain the reason for each. Then offer guided choice: choose two useful steps for A, or improve “Just do all three at once” using two helpful steps. Keep the model but reduce answer cues.

Main task and review

Both main choices require emotion/clue, two strategies/reasons and a private route. Learners may change choice without penalty. Offer Type instead aloud and on paper. Review choice: use the four-part checklist, or improve the model “They feel bad. Take a break” by adding a precise clue or reason. Give one NS and retain the response.

Access checks and private help

Supported

Choose either main task. Read one part at a time with the word bank, sentence starters and A model. Offer a narrowed strategy menu when needed. Allow pointing, an aid or exact scribing. Record answer cues separately from usual access.

Independent

Choose either main task and supply the emotion clue, two suitable strategies with reasons and help route. Keep the word bank, model and normal reading/typing aids available.

Aspire

Choose either main task. Explain which strategy fits first and why another may be needed. State a limit: a strategy may help without removing the pressure or feeling at once. No personal disclosure or extra public speaking.

Private hinge and parallel check

Main: A the person must stop feeling stressed before asking for help; B the person can ask while still feeling stressed. Key B. Parallel: A a strategy may help but more support may be needed; B one strategy always removes stress. Key A. Accept a point, word, typed answer or scribed explanation privately. If unsure, re-model A’s help request and limit before the main task.

Adaptations and prompt ladder

Cognition and Learning: break down the case, keep a visible model and checklist. Communication and Interaction: literal words, quiet rehearsal, wait time and an aid. SEMH: predictable sequence, two choices, pass/pause and supported return. Sensory and Physical: clear print, usual aids and comfortable response position. EAL: word meanings, read together and plan in any language. Colour carries no answer meaning.

Prompt ladder: 1 point to place/instruction; 2 ask a short question privately; 3 rephrase; 4 offer scaffold/choice; 5 model the first step only, then return the task. Log content help. Normal typing, reading or scribing access does not reduce independence of thought.

Private help route

Ask a trusted adult privately or use the school’s help route. A learner may point to HELP, write a short request or say “Can we talk in private?” They need not explain to the group. If the first adult is busy or support is not enough, use the route to another trusted adult. No requirement to try every strategy before asking. Offer pass, a supported pause and a neutral task with a return plan.

Evidence feedback and staff response

Typed and scribed routes

For either main choice, open the editable Evidence Sheet and use the optional Type instead page. Type in the blank fields or write the advice note below the prompts. Use the usual save routine with the lesson code and work reference. Show the response privately. No login or online sharing is required. A scribe captures exact words/selections, reads back quietly and allows correction.

Evidence and judgement

Secure: a plausible emotion supported by the case, two suitable healthy strategies with reasons, and recognition of a private route. For the exact outcome, judge emotion recognition and healthy strategy recognition separately. Help-route knowledge is recorded alongside them. Partial: feeling without clue, or strategy without fit/reason. Unobserved: no response collected, including a pass. Do not grade a learner’s own feelings or claim real-world coping from a fictional task.

Misconceptions and feedback

“Worried means weak”: emotions are not a character grade. “Everyone shows stress the same way”: one behaviour does not establish the cause. “A pause fixes everything”: it may help when agreed with a next step; task changes or more support may still be needed. “Help is only for later”: it is available while feelings are present.

Give one precise NS: add the clue; explain how the step fits; add a second healthy way. Keep first thinking, actual access and answer prompts, one NS and reply. VF verbal feedback; WS worked with support; I independent; // self-edit; ? read back; E actual banked evidence. R only after Voice, Audience, NS and response in own colour or usual recorded mode. Offer to the Communication portfolio.

Staff response to a concern

Confirm an available trusted adult before teaching. Listen calmly, avoid probing or group discussion, do not promise secrecy and follow the school’s usual procedure. Seek immediate on-site support for an urgent concern. Keep private concerns out of shared work and public evidence. The lesson is education, not treatment.

Source and scope

Original unnamed scenarios replace named source resources. This week focuses on C64 emotions and stress; later online-safety and relationship work is not authored. Any accredited mapping requires staff confirmation from actual work. Next is LAUNCH D&T Spring 1 Week 1 after Downloaded.
