Card 1 Model and guided choices

All examples are made up. You may point, write, type or ask for a scribe. No private story is needed.

Two starter choices
Quote 1: “I feel worried about starting.” Quote 2: “I feel frustrated when steps are unclear.”

Choose matching the words worried and frustrated to the quotes, or finding and labelling the emotion words in the quotes.

Story A
A young person has three short tasks to finish. They say, “I feel worried. I do not know where to start.” They keep reading the list but have not chosen a first step.

Visible model
Emotion: worried. Clue: “I do not know where to start.” Pressure: several tasks to organise. One healthy way is one small step. It can make the task clear. Another is talking to a trusted adult. They can help agree what comes first.

Two guided choices
Choose two useful steps for A and give a reason for each. Or improve this advice: “Just do all three at once.” Replace it with two useful steps.

Words and starters
worried · pressure · first step · plan · help

“One way is ... . It may help because ... . Another is ... .”

Use the model and Card 4. A private trusted adult can help. You may pass or take a supported pause.

Card 2 Choice 1 Case map

Story B
A young person gets several instructions at once. They say, “I feel frustrated. I keep missing a step.” They want to finish the task but are not sure which instruction comes next.

Your choice
Make a case map in a book or use the Type instead page. Use four parts: emotion and clue; healthy way 1 and why; healthy way 2 and why; private help route.

Words to use
frustrated · instructions · one step · pause · ask

Sentence starters
“They may feel ... . The clue is ... .”

“One healthy way is ... . It may help because ... .”

“Another way is ... . They could ask ... in private.”

Visible model from A
They feel worried. The clue is not knowing where to start. One small step can make the task clear. Talking to an adult can help agree the order.

Check the fit
Use Card 4. Choose two different healthy ways. Link each to B. A strategy may help while the feeling is still there.

You can change to the advice note for C. Both meet the same goal. Ask a trusted adult in private for help.

Card 3 Choice 2 Advice note

Story C
A young person will explain a project to a small group. They say, “I feel worried about speaking. I cannot choose my first sentence.” They know the project facts but need a way to begin.

Your choice
Write a short advice note in a book or use Type instead. Include an emotion and clue, two healthy ways with reasons, and a private help route. The note stays about the made-up person.

Words to use
worried · first sentence · rehearse · plan · support

Sentence starters
“You may feel ... because ... .”

“One healthy way could be ... . This may help because ... .”

“You could also ... . You can ask ... in private.”

Visible model from A
You feel worried about where to start. One small step may make the task clear. A trusted adult can help agree what comes first.

Check the fit
Use Card 4. Choose two different healthy ways. Link each to C. A typed note or private rehearsal may help the person start. There is no promise that worry will go at once.

You can change to the case map for B. Both meet the same goal. Ask a trusted adult in private for help.

Card 4 Healthy ways and private help

Healthy way	What it can do
One small step	Make a task easier to start.
An agreed short pause	Give time, with support and a plan to return.
A private talk with a trusted adult	Help adjust the task or find more support.
A plan or private rehearsal	Make an unclear start easier to follow.

People may need different kinds of help. A strategy is not a promise that stress will stop. Ask for support if the pressure continues or the steps do not help.

Two review choices

Check the four parts of your own work. Or improve this model: “They feel bad. Take a break.” Add an emotion clue or explain a helpful step.

Two exit choices

Explain why one healthy strategy may help a story person. Or correct the myth: “A person must stop feeling stressed before they ask for help.”

Words and model

clue · healthy · because · may · support

Start: “It may help because ... .” Model: “A small step may make the task clear.”

Help in private

Point to HELP, write a request or say “Can we talk in private?” Ask a trusted adult or use the school’s help route. If one adult is busy, ask another trusted adult. You do not have to try every strategy first. You can pass, pause and return with support.
