## Resilience and a growth mindset

Wednesday 13 January 2027 · P3 · 40 minutes · Year A

GROW · up to five learners · Spring 1 Week 2 · formative

Theme: Resilience & Change. Spring 1 has six weeks. Week 6 is assessing.

Thread tags: SMSC S/So (M/C: none); British Values IL/MR (D/RL/T: none).

## Exact source outcome

Build personal resilience and a growth mindset.

Source: GROW Weekly - Spring, PSHE, row 65. B65 Spr1·W2; C65 exact outcome. The generic strand heading is PSHE & Citizenship in A64; D64–F64 supply shared context. Names are omitted.

## Lesson success check

Describe what resilience means and one way to keep going when something is hard.

Both task choices explain resilience, name a difficulty in an invented case, and give one useful next step with a reason. Add a realistic learning line and a private help route. These are lesson evidence, not proof of a lasting personal trait.

## Prepare

Books, pens, Support Cards and Vocabulary Mat for up to five learners. Optional editable Evidence Sheet for typing; no login or internet needed. Arrange private response turns. Confirm an available trusted adult, the school’s help route and a supported pause. The card stand, pattern and sorting task are written fictional examples; no practical equipment or real task performance is required.

## Teaching boundary

Use only invented stories. Do not ask for personal setbacks, trauma, family circumstances, stress scores or public examples. Resilience can include support, changing approach and a planned pause. Never require persistence in something unsafe or overwhelming. Avoid promises that effort or positive words guarantee success.

## Where this leads

This helps me use feedback, change a plan and ask for support when learning a skill or doing future work.

# Forty minute sequence

| Phase | Min | Teaching |
|---|---|---|
| Arrival and starter | 5 | Settle, confirm private help; choose an action or explain its fit. |
| Input | 5 | Read exact outcome; explain resilience and growth mindset. |
| Model and guided work | 7 | Model A, then match feedback or improve unhelpful advice. |
| Private hinge and choice | 5 | Check flexible persistence and help; choose task and response mode. |
| Individual task | 12 | Next step map B or support note C, in a book, typed, aided or scribed. |
| Review | 4 | Check work or improve a model; retain one next step and reply. |
| Private exit | 2 | Explain resilience or correct a myth about help. |

Total 40 minutes. Brief pauses and processing time sit inside these phases. Slides 7 and 8 are alternatives in one 12-minute work period. Optional help slide 11 and hidden staff slide 12 add no time.

## Starter choices

Retrieve Week 1 with an invented learner who has too many instructions. Choose “ask for one step” or “hide the problem”, or explain why asking for one step may help. Accept a private selection, typing or a scribe. If Week 1 was missed, read the full example without expecting recall.

## Model and fade

Read A. Name the difficulty and the useful feedback. Model: “Resilience means finding a way forward when things are hard, with support when needed. The stand falls over. They can ask for a wider-fold model, then try that change. It uses the feedback.” Add the realistic learning line. Check privately whether the model changes a step or just repeats it. For guided work, match feedback to the next step or improve “Try harder in the same way”. Reduce answer cues while keeping the model and word bank.

## Main task and review

Offer choice 1 next step map for B and choice 2 support note for C. Both meet the same success checks. Say and show Type instead. Learners may change choice. For review, use the checklist or improve “Just keep going. You will get it right.” Give one precise next step and retain the reply. No public performance is required.

# Access checks and private help

## Supported

Choose either main task. Read one short part at a time with the word bank, sentence starters and A model. Offer two strategy options if needed. Point, use an aid, type or use an exact scribe. Record answer cues apart from normal access.

## Independent

Choose either main task. Explain resilience, identify the barrier, give one fitting strategy with a reason, and add a realistic learning line and private help. Keep the model, bank and normal reading/typing aids available.

## Aspire

Choose either main task. Explain how to check whether the step helps, and what support or change may be needed if it does not. No extra personal disclosure or public speaking.

## Private hinge and parallel check

Main A: after an unsuccessful try, ask for feedback and change one step. B: repeat the same action without checking. Key A. Ask why privately. If unclear, return to A’s wider-fold feedback. Parallel A: help means the learner has failed. B: help can be part of resilience. Key B. Silence or a pass is unobserved.

## Adaptations and prompt ladder

Cognition and Learning: read one part, highlight the feedback and keep a visible model. Communication and Interaction: allow processing time, short choices, a communication aid and sentence frames. SEMH: calm predictable stages, pass, supported pause and neutral task. Sensory and Physical: accessible text, usual aids and comfortable response position. EAL: teach word meanings, read together and plan in any language. Colour carries no answer meaning.

Prompt ladder: 1 point to place/instruction; 2 ask a short question privately; 3 rephrase; 4 offer scaffold/choice; 5 model the first step only, then return the task. Log content help. In input, clarify the terms; in guided work, elicit the feedback link; in individual work, record access separately from an adult-supplied answer.

## Private help route

Ask a trusted adult privately or use the school’s help route. Point to HELP, write a request or say “Can we talk in private?” If one adult is busy or help is insufficient, use the route to another trusted adult. No need to keep trying alone before asking. Offer pass, a supported pause and a neutral task with a return plan.

# Evidence feedback and staff response

## Typed and scribed routes

Either choice can use the editable Evidence Sheet page 2, Type instead. Type in the blank prompts or the Support note if chosen cell. Save using the usual routine, lesson code and work reference; show the adult privately. Book or aid remains valid. A scribe records exact words or selections, reads back quietly and allows correction.

## Evidence and judgement

Judge the explanation of resilience and the chosen strategy separately. Secure explanation includes finding a way forward through difficulty, with support if needed. Secure application gives one feasible strategy linked to the case and explains its purpose. A realistic learning line shows growth-mindset understanding. Record help-route knowledge alongside these. Partial evidence is retained honestly. No response, including a pass, is unobserved. Do not grade personality, obedience, optimism or actual resilience from this fictional task.

## Misconceptions and feedback

“Resilience means never stopping”: a planned pause, support or a changed goal can be useful. “Try harder guarantees success”: useful feedback and access matter; outcomes are uncertain. “Not yet is enough”: add a concrete next step. “Help means failure”: adults can help remove barriers. Stop and seek help if a task is unsafe or overwhelming.

Give one NS: explain the word; use the feedback; make the step specific; add a reason. Keep first thinking and reply. VF verbal feedback; WS worked with support; I independent; // self-edit; ? read back; E actual banked evidence. R only after Voice, Audience, NS and response in own colour or usual recorded mode. Offer to the Communication portfolio.

## Staff response and scope

Confirm the available route before teaching. Listen calmly, avoid probing or public discussion, do not promise secrecy and follow the school’s usual procedure. Seek immediate on-site support for urgent concerns. Keep concerns out of shared work. No named services or helplines. This lesson teaches a concept and a strategy, not treatment or a proven change in wellbeing. Any accredited mapping needs actual evidence and staff confirmation. Next is GROW PSHE Week 3, row 66, after Downloaded.
