Teacher and cover planner

Provider encounter 1 — technical education/apprenticeships

Tuesday 8 December 2026 · P3 · Year A

GROW · up to five learners · 40-minute classroom plan with flexible encounter window

Unit: Identity & Belonging — Belonging in work

Thread tags: SMSC S/So (M/C: none); British Values IL/MR (D/RL/T: none).

Exact source outcome

I can ask a purposeful question, record recruitment/entry information and evaluate one route against my own needs.

Weekly outcome: Students use a meaningful provider encounter to test assumptions about technical and apprenticeship routes.

Source: specialist Careers scheme, GROW Careers physical row 14, Autumn 2 row 6. E14 weekly outcome; F14 focus; G14 exact outcome; H14 sequence; I14 encounter window; J14 evidence; K14 access; L14 support; M14 end check; N14 F + S.

Question and success checks

What do I need to ask to judge whether one route could fit my needs?

1. Ask a question that has a clear purpose. 2. Record recruitment/entry information and gaps accurately. 3. Link evidence about one route to my own need, give a judgement and a next question.

Prepare

Books, pens, question menu, recording structure, normal reading/typing aids and fallback profiles A/B. Preview any approved local recording and arrange captions or a transcript. No recording, visitor or live link is supplied or assumed. If neither visitor nor recording is ready, use the complete profile simulation.

Source adaptation

I14 specifies an encounter window rather than the earlier fixed teaching sequence. The 5/5/20/7/3 classroom plan is an authoring guide, not a scheme timing claim. Arrange a reasonable period for the actual provider during the school day; extend or separate that window if needed. Visitor, recorded-talk and no-visitor routes share preparation and reflection. Profile practice and recorded information without provider interaction are not a completed real encounter.

Where this leads

This helps me ask useful questions before a training choice and decide what I need to check next.

Session modes and timing

Phase	Min	Action and evidence
Prepare	5	Recall entry versus skills learned. Choose one route or enquiry, one own need and one purposeful question from the menu.
Model and rehearse	5	Model a focused question and a fact/gap record. Rehearse privately or agree an adult relay in the learner's words.
Encounter or simulation	20	Use the chosen mode below. Gather recruitment/entry information. Keep time for learner questions, answers and follow-up. Record actual mode and response status.
Evaluate	7	Immediately judge one route against an own need. Use a source detail, a possible fit or concern and a limit. Give one next step and fade answer prompts.
Reflect	3	Keep the next question, actual evidence and support. Log real interaction separately from preparation or simulation.

5 + 5 + 20 + 7 + 3 = 40 minutes. This is a planning example. Do not cut meaningful questions to fit it. If the actual encounter needs a separate or longer window, prepare beforehand and evaluate immediately afterwards; record actual date and duration.

Visitor mode

Brief the visitor on content, assessment, employer links, support, entry/recruitment and progression. Explain learner questions and agreed access. Give every learner a way to ask or relay their question and receive a response. Allow a follow-up. Record what was actually said and any unknown detail.

Recorded talk mode

Use an already approved recording with captions/transcript. Pause to record facts and prepare questions. Arrange a genuine provider response opportunity through staff if possible. Until it occurs, mark questions pending and provider interaction not yet. A class discussion of a recording alone is not a provider reply.

No visitor or recording mode

Read profile A or B, then let an adult role-play answers from the printed response bank. Clearly label the activity simulated. Unknown answers remain unknown. Complete the same record and evaluation as skill practice. Keep a question for a future real encounter; do not award encounter completion for the role-play.

Routes and planned access

Independent

Choose a route/enquiry and an own need, ask a purposeful question, record recruitment/entry facts and gaps, then evaluate one route with evidence. Give a qualified judgement and next question. Check the source mode and whether a provider response actually occurred.

Supported

Use one profile or talk section at a time. Offer the six-topic menu, a separate model, vocabulary and record headings. Rehearse privately and allow a learner-authored written question to be relayed. Keep all three parts of the outcome; fade answer prompts where secure.

Floor

Use profile A and the short choices. Read aloud or scribe the learner’s own answers. Help them select, then actually ask or relay, a question in practice. Record the application step and an entry gap. Add one own need and a reasoned fit. Choice answers alone do not establish the full outcome or real encounter.

Cognition and Learning

Explicit instruction, worked model and guided practice. Chunk the talk/profile and use question, fact, gap, need and judgement headings. Repeat key points and allow processing time. Use the written profile as memory support.

Communication and Interaction

Pre-teach provider, recruitment, entry, support and evaluate. Rehearse privately. Accept speech, writing, pointing, scribe or adult relay of the learner’s own question. Check that the learner can access the response. No cold calling.

SEMH

Explain who will speak, how questions work and the right to pause. No public disclosure of grades, health, family work or income. A learning need may be shared privately. Offer a regulation break with an agreed return point. A route judgement can be tentative.

Sensory and Physical

Use clear print, captions/transcript, normal aids and an accessible question method. Check hearing, sightlines and processing in advance. Do not infer route suitability from diagnosis or support needs; ask which support could help.

EAL

Plan in any language. Pre-teach the topic words and offer short frames. Pause or replay a recording where helpful. Separate language access from evaluation. Retain normal access while answer scaffolds fade.

A hypothetical need can support practice without disclosure. Label it hypothetical; the own-needs component remains unconfirmed until the learner offers an own need privately. Do not count a prepared but unasked question as asked.

Staff prompts and checks

Worked example and fade

Practice need: I learn best with written steps. Purposeful question: “How can I get written steps for a task?” Profile A offers written steps and weekly tutor check-ins. Record the source as simulated A. Evaluation: “This could fit the practice need, but other support and travel are unknown. I would ask how support is agreed.” Recruitment: application, discussion and short task; exact grades not given. Fade to the learner choosing a different need or profile and making their own judgement.

Check after the model

Which is more useful: “Is this good?” or “What happens in the entry task?” Expected: the second gives a specific recruitment detail. Does an unanswered question mean a place or support is guaranteed? No. Record pending or not stated.

Hinge during recording

The speaker did not give entry grades. Which record is accurate? A: Make a likely grade up. B: Write “not stated” and keep a question. Answer B. Ask for the source clue. If insecure, separate known, assumed and missing, model again and use the parallel hinge.

Parallel hinge

A recorded talk is played but no provider answers learner questions. Which log fits? A: Real two-way provider encounter complete. B: Recorded information used; provider reply pending. Answer B. Re-model activity mode versus actual response. Retain supported recording if insecure.

Speaking frames

F: “What do I need to ... ?” M: “I ask this because ... . The source says ... . It does not say ... .” H: “I need ... . This route could fit because ... , but ... . Before deciding I would ask ... .”

TA focus and prompt ladder

Model: check the question’s purpose. Encounter: help access/relay the learner’s question, record actual words and response without inventing. Evaluation: prompt the evidence-to-need link and fade. Ladder: 1 point to place/instruction; 2 ask a short question; 3 rephrase; 4 scaffold/choice; 5 model the first step only, then return the task.

Misconceptions and corrections

“An unanswered detail can be guessed.” Keep it as a gap. “Watching a talk or teacher role-play proves a real encounter.” Record actual provider interaction separately. “Offered support guarantees every adjustment.” Confirm the specific arrangement. “A positive judgement means I am eligible.” It is a reason to investigate, not admission.

Evidence and encounter record

What this lesson can evidence

N14 is F + S: formative preparation/questioning plus retained evaluation evidence. Week 7 remains the assessing week. J14 requires an encounter log with evaluation and next question. Keep the question, whether/how it was asked, actual recruitment/entry information, source/mode, own need, evidence-based judgement, limit and next question. Record support and revision. In fallback mode this is simulated skill evidence; the actual encounter end check remains not yet.

Response and feedback

Book first. Type instead gives the same record. Private own-needs responses are available. A hypothetical need can show rehearsal but not the own-needs component. Reader, scribe, typing and adult relay of a learner-authored question are normal access, with actual answer prompts logged separately.

VF verbal feedback; WS worked with support; I independent; NS next step in green pen; // self-edit; ? read this back to me; E evidence recorded; R responded. Set one precise next step. R requires Voice and Audience, NS and learner response in own colour. A private adult may be the audience. E only for actual banked evidence.

Meaningful encounter and entitlement

M14: Was the encounter meaningful, two-way and linked to a real decision or enquiry? Record actual provider involvement, accessible question/response opportunity, date, duration and the learner’s enquiry. A prepared question, recording alone or simulation does not confirm this. Responsible staff track year-group entitlement and the source’s Year 9/11/13 timing separately; this pack does not certify statutory completion.

Portfolio

Keep the log, evaluation, next question, source status, support and revision in the Careers Portfolio/action plan. Offer to the Communication portfolio. Staff confirm any accredited mapping from actual work; no completion inferred. Record a follow-up owner/role and review date for unanswered questions, without inventing a response.

Boundaries

No named provider, organisation, institution or live address in the pack. Profiles are invented and cannot verify actual eligibility, pay, grades, places or support. Use actual session information only when heard and attributable to the selected source; keep gaps. No application, contact or disclosure is required from pupils. No recording or visitor is claimed to have occurred.

Calendar and sequence

Year A. Autumn 2 Week 6, 7–11 December 2026. Tuesday 8 December, P3. Flexible encounter window; 40-minute classroom example. Actual event date/duration recorded separately. Week 7 follows after Downloaded and is assessing.
