Teacher and cover planner

Employer encounter — skills, recruitment and belonging

Tuesday 15 December 2026 · P3 · Year A

GROW · up to five learners · 40-minute classroom example · assessing week

Unit: Identity & Belonging — Belonging in work

Thread tags: SMSC S/So (M/C: none); British Values IL/MR (D/RL/T: none).

Exact source outcome

I can explain what the employer looks for, how recruitment works and one way the workplace supports people to succeed.

Weekly outcome: Students learn directly from an employer about work, valued skills, recruitment and workplace inclusion.

Source: specialist Careers scheme, GROW Careers physical row 15 / Autumn 2 row 7. E15 intention; F15 focus; G15 outcome; H15 sequence; I15 encounter structure; J15 evidence; K15 access; L15 support; M15 end check; N15 S.

Question and success checks

What can an employer tell me about getting work and being supported at work?

1. Explain one valued skill with evidence. 2. Explain recruitment steps and what is used to select people. 3. Explain one workplace support and how it helps someone succeed.

Prepare

Books, pens, profile A/B, question menu, vocabulary, evidence record and the seven weeks of work already held. Have the Autumn 1 personal career profile ready if available. Staff may use a visitor or approved local recording with captions/transcript. No visitor or recording is supplied. Without either, use the complete printed role-play.

Source adaptation

I15 calls for preparation, clear outcomes, two-way employer/employee interaction and structured reflection. It specifies no phase minutes. The 5/5/12/10/8 classroom example is an adaptation. Allow a longer or separate real encounter if needed; prepare before and reflect after it. Profile simulation and recording alone are learning sources, not proof of a real employer encounter. The user adds a seven-week portfolio close to J15.

Where this leads

This helps me prepare for an application, ask about support and choose a useful next step towards work.

Session modes and timing

Phase	Min	Action and evidence
Prepare	5	Retrieve a valued skill or working preference. Revisit the earlier personal profile privately. Choose a question about roles, skills, recruitment, progression or culture.
Model and rehearse	5	Model skill plus source clue, recruitment sequence and support plus effect. Rehearse a learner question privately; agree normal access.
Encounter or simulation	12	Use visitor, approved recording or profile role-play. Record source, question/reply status and evidence. Preserve time for questions and follow-up.
Explain and assess	10	Learners explain all three outcome parts. Link the new evidence to the earlier personal profile. Retain first response, support and one revision.
Portfolio and reflect	8	Locate Weeks 1–7 outputs. Record actual references, evidence status, gaps and one action. Close with a personal next step.

5 + 5 + 12 + 10 + 8 = 40 minutes. Collect earlier work before the lesson so the final check is realistic. Missing work becomes a dated catch-up action; do not recreate a half-term in eight minutes. A real event may need a separate or longer window.

Visitor mode

Brief the employer/employee on roles, valued skills, recruitment, progression and culture/support. Agree question methods, access and outcomes. Let each learner ask or relay a question and receive a response, with follow-up. Record the actual source, date, purpose and participation in the controlled school record. No named employer is placed in this pack.

Recorded talk mode

Use an approved local recording with captions/transcript. Pause for facts and questions. Record what was heard and what is still missing. If an actual employer response is later arranged, log it then. Playback or a teacher discussion alone does not show two-way employer interaction.

No visitor or recording mode

Read A or B. An adult answers from the printed response bank in a clearly labelled simulation. Learners ask, listen and follow up, then explain the same three outcome parts. Unknown facts stay unknown. Assess explanation skills from the profile; keep real employer encounter status not yet.

Routes and planned access

Independent

Select source evidence for a valued skill, explain the recruitment sequence and selection evidence, and show how one support helps. Compare with the earlier personal profile and keep a next question. Locate all seven portfolio outputs and identify any gap.

Supported

Read one profile section or talk section at a time. Use the question menu, separate model, word bank and three explanation headings. Rehearse privately. Fade answer frames where secure. Keep the learner’s own explanation and portfolio judgements.

Floor

Use A and short choices. Read or scribe the learner’s own response. Then ask them to explain the chosen skill with a clue, place recruitment steps in order, and say how a support helps. Choices alone are partial. Adult help finding work can support portfolio access without deciding the evidence judgement.

Cognition and Learning

Use explicit instruction, a worked model, guided practice and a visible sequence. Chunk the profile into role, skill, recruitment and support. Keep a checklist and use retrieval from actual earlier work. Allow processing time.

Communication and Interaction

Pre-teach employer, recruitment, evidence and belonging. Use private rehearsal, written questions, a scribe or relay of the learner’s own words. Check access to replies. No cold calling. Accept speech, writing, pointing with explanation, or normal communication aids.

SEMH

Explain who will speak and how the session will run. No forced public disclosure of grades, diagnosis, family employment or income. Allow a private view, a regulation break and a clear return point. Missing portfolio work is an action to plan, not a public judgement.

Sensory and Physical

Use clear print, captions/transcript, accessible seating and normal aids. Check hearing, sightlines and comfort. The lesson uses source reading only; no bakery equipment, lifting, machinery or practical workplace task is required.

EAL

Plan in any language. Use the vocabulary and short frames, pause the source and check key meanings. Separate language access from careers understanding. Normal reading/scribing aids continue while answer scaffolds fade.

Teaching checks and assessment

Worked example and fade

Profile A: the bakery values care. The shop assistant checks an order, which can prevent a wrong item. Applicants send an application, staff select people to meet, then use an interview and task before an offer decision. Written steps can help new staff learn a routine. Model A, then let learners use B or actual source evidence without copying.

Check after the model

Ask privately: which explains support, “they are nice” or “written steps help staff learn a routine”? The second names a support and its effect. Keep the source clue.

Hinge during explanation

A learner says “I applied, so I have the job.” A agree, or B staff still select and check evidence before an offer decision? B. If any learner is unsure, sequence the profile steps with them before independent explanation. If secure, ask why the task provides relevant evidence.

Parallel hinge

“A checklist means nobody can make a mistake.” A agree, or B it can help someone spot a missed check but does not guarantee success? B. If insecure, model support plus likely effect and a limit, then revisit a different example.

Misconceptions and corrections

A skill label alone is not an evidence-based explanation: link care to checking an order. Applying is not a job offer: include selection stages. Support is not a guarantee: explain how it can help. A copied practice profile is not proof of an actual encounter. A file present is not automatically secure portfolio evidence.

Speaking frames

Floor: “They value ... . The card says ... .” Medium: “First ... then ... . Staff use ... to choose.” High: “This support may help because ... . My earlier profile said ... . I now think ... because ... .”

TA focus and prompt ladder

Model: check vocabulary and source clue. Encounter: help access questions/replies, without supplying answers. Independent explanation: retain the learner’s thinking and actual prompts. Portfolio: help locate work, then ask the learner to judge it. Prompt ladder: 1 point to place/instruction; 2 ask a short question; 3 rephrase; 4 provide scaffold/choice; 5 model the first step only, then return the task.

Evidence and portfolio close

What this lesson can evidence

N15 S: assess the three exact outcome parts using actual source evidence. Record secure, partial or not yet for valued skill, recruitment and workplace support separately. M15 checks a recruitment insight and valued skill with encounter evidence; the exact outcome also requires workplace support. The new reflection links to the earlier personal career profile.

Earlier personal profile

Compare one earlier strength, interest or work preference with a detail from the encounter. State a match, a changed view or a question with a reason. If the Autumn 1 profile is unavailable, record missing and date a brief current baseline; do not invent a past view or claim the comparison is complete.

Seven week portfolio check

The Evidence Sheet indexes all seven scheme outputs with work references, held/missing/partial status, quality check and next action. Keep Weeks 2–3 prepared-source labels and Week 6 real/simulated mode. Check actual work rather than ticking attendance. A portfolio can be reviewed and closed with clearly recorded gaps; do not mark all outcomes secure because the folder exists.

Meaningful encounter status

I15 requires preparation, clear outcomes, two-way employer/employee interaction and reflection. Record actual employer/source reference, date, purpose and participation in the school record. Simulation can show explanation skills; it cannot establish an actual employer encounter. Recorded-only replies may remain pending. Keep real contact status separate from learning evidence.

Boundaries

Generic employer types only. Profiles are invented, not offers, universal recruitment rules or support guarantees. No actual learner history or attendance is prefilled. No public personal disclosure or real practical work. Use controlled references instead of adding named employers to the distributed pack.

Response and feedback

Book first. Optional Type instead carries the same demand. Record usual access separately from answer prompts. Set one NS, allow a learner revision and preserve first thinking. Offer to the Communication portfolio. Staff confirm any accredited mapping from actual work.

VF verbal feedback · WS worked with support · I independent · NS next step in green · // self-edit · ? read this back · E actual banked evidence · R only after Voice, Audience, NS and a response in the learner’s own colour.

This closes Autumn 2 Careers. Spring 1 work awaits the owner’s acceptance and new brief.
