Chart step cards

Tuesday 1 December 2026 | P6 | 40 minutes

Today I can

I can make a clear chart and use its data to explain a comparison.

1 Check the data

Open Task. Compare the three item values with the data card.

2 Choose the range

Select A3:B6. Include headings and the three items. Leave the whole total out.

3 Make the chart

Insert a simple column chart. Add a clear title, item labels and the unit points.

4 Check and test

Use a scale from 0 with equal steps. Predict, then change B4 from 20 to 12. Check the paper column changes.

5 Explain and save

Use two values to make a comparison. Keep B4 at 12. Save, close and reopen your workbook.

Private responses

Plan and write in your book or type privately. Point or speak quietly to an adult. No reading aloud is required.

Words for charts

Tuesday 1 December 2026 | P6 | 40 minutes

chart

A picture that shows data.

category

A group or item being compared.

column

An upright bar in this chart.

axis

A line that helps you read a chart.

scale

The numbered steps along an axis.

comparison

A statement about how two values are alike or different.

A useful comparison

... uses ... points. This is ... points more than ...

_____

_____

Knowledge organiser

Tuesday 1 December 2026 | P6 | 40 minutes

The aim

I can make a clear chart and use its data to explain a comparison.

Choose a chart

A column chart compares separate items using upright bars. A horizontal bar chart can also work.

Choose the data

Use the item names and their points. Do not plot the whole total as another item.

Make it clear

Use a clear title and labels. Show the unit points. Start the number scale at 0 with equal steps. Avoid 3-D effects.

Check a change

Change one source value and check the matching column. The other columns should stay the same.

My success checks

[ ] I chose the three items and their points.
[ ] I used a clear title, labels and a scale from zero.
[ ] I checked a change, explained a comparison and reopened my file.

Where this leads

Office and stock roles use charts to explain resource needs. A clear chart and a checked comparison can show a digital skill in an application.

Practice data card

Tuesday 1 December 2026 | P6 | 40 minutes

The task

Which item uses the most practice points? These are fictional practice points, not prices or pack counts.

Use the Task sheet

These are the final kit totals from the Week 4 example. Use this fresh table so the cell addresses match.

Row	A	B
3	**Item**	**Total points**
4	Paper packs	20
5	Card packs	10
6	Fastener packs	8
7	Whole total	38

Chart range

Select A3:B6. Row 7 adds all three items. Do not include it as a fourth item.

Change test

Predict the new chart. Change B4 from 20 to 12. Check only the paper column changes. Keep B4 at 12 when you save.

Explain

After the change, compare paper and card points using both values. What can the chart show? What can it not tell you?

Supported route

Tuesday 1 December 2026 | P6 | 40 minutes

The aim

I can make a clear chart and use its data to explain a comparison.

Steps

1. Open Task. Check the three values on the data card.
2. Select A3:B6, including headings but not the total.
3. Insert a simple column chart. Use three columns.
4. Add a title and labels. Check the scale starts at 0.
5. Predict, then change B4 from 20 to 12. Check the chart.
6. Write one checked comparison. Save, close and reopen.

In your book or private file

My title is ...
My chart compares ...
After the change, ... points is ... more than ...
I checked ...

Success

[ ] I chose the three items and their points.
[ ] I used a clear title, labels and a scale from zero.
[ ] I checked a change, explained a comparison and reopened my file.

Private responses

Point, write, type or ask for exact scribing. No public answer is needed.

Independent route

Tuesday 1 December 2026 | P6 | 40 minutes

The aim

I can make a clear chart and use its data to explain a comparison.

Steps

1. Check the Task data and choose the chart range.
2. Make a column chart to compare the three items.
3. Add a clear title and labels that show points.
4. Check the scale starts at 0 with equal steps.
5. Change B4 from 20 to 12 and explain what changes.
6. Give a comparison with two values. Save and reopen.

In your book or private file

My title is ...
My chart compares ...
After the change, ... points is ... more than ...
I checked ...

Success

[ ] I chose the three items and their points.
[ ] I used a clear title, labels and a scale from zero.
[ ] I checked a change, explained a comparison and reopened my file.

Private responses

Point, write, type or ask for exact scribing. No public answer is needed.

Aspire route

Tuesday 1 December 2026 | P6 | 40 minutes

The aim

I can make a clear chart and use its data to explain a comparison.

Steps

1. Complete the Independent task first.
2. Compare paper and card points before and after the change.
3. Explain why a scale starting above 0 can mislead.
4. State one thing this chart cannot tell us.
5. Keep B4 at 12 and check all three columns.
6. Save a v2 copy and keep your earlier v1.

In your book or private file

My title is ...
My chart compares ...
After the change, ... points is ... more than ...
I checked ...

Success

[ ] I chose the three items and their points.
[ ] I used a clear title, labels and a scale from zero.
[ ] I checked a change, explained a comparison and reopened my file.

Private responses

Point, write, type or ask for exact scribing. No public answer is needed.

My evidence record

Tuesday 1 December 2026 | P6 | 40 minutes

Record in your book or private file

Use these prompts to keep your own evidence. Show it quietly to the adult.

My file and chart

File and folder: ...
Title: ...
Data range: ...
Unit: ...

Before and after

Before B4 changes: paper = ... points.
After B4 changes: paper = ... points.
Other columns: ...

My comparison

... uses ... points, which is ... more than ... at ... points.

My checks

Three items; title; labels; scale starts at 0; equal steps; chart updates; saved file reopened.

My response to the next step

My next step was ...
I responded by ...
