Vanilla trial batch

Recipe V · 12 small cupcakes or the staff-checked tray swap · Plain cakes for the trial

Oven: 180°C conventional / 160°C fan / gas 4. The adult preheats it and handles hot trays.

Ingredients	Kit
110 g soft butter 110 g caster sugar 2 large eggs ½ teaspoon vanilla extract 110 g self-raising flour A small pinch of salt	Scales; bowl; spoon; measuring spoons; adult-operated mixer if needed; cases and bun tin OR checked tray tin; rack; clean sealed box.

Expected allergens: WHEAT, EGGS, MILK. Check every actual pack for others and warnings. Keep all packs.

1. Beat butter and sugar until fluffy.

2. Mix in the eggs, one at a time.

3. Add vanilla, flour and salt. Mix until combined.

4. Divide into 12 cases, or use the checked tray swap.

5. Adult bakes. Start checking cupcakes at 15 minutes.

6. Adult checks the centre is baked, then cools the cakes.

SWAP POINT · step 4

Cupcakes: 12 paper cases in a bun tin. Traybake: use the same mixture in a lined 18 cm square shallow tin only after an adult trial. Cut the cooled tray into 12 trial portions. Write the checked tray baking time here: _____ minutes.

Do not taste raw mixture. The adult checks the centre with a clean skewer and continues baking if needed. Cool fully on Wednesday before sealing the box. No cream, custard or raw-egg topping is used.
