Trial bake and product test

Lesson 4 · Two 40-minute periods · SoW Autumn 1 Week 6 · Calendar Week 9

L4a date/time: _____
L4b date/time: _____

Objective and evidence

Make a safe trial batch, test it with staff and use my plan to make and record a decision.

L4-E1 links to Project learning link: [QUAL]; [AWARD] unit awards: [QUAL]; [QUAL]. Use one sheet with two dated sections; book practice comes first. Keep each learner's own contribution. This practical does not claim completion of an award.

Before learners arrive

Bring each learner's project plan. Retrieve the actual L3 product family and chosen recipe(s). There is no invented group decision in this pack. Prepare clean stations, labelled ingredient packs, scaled ingredients where needed, equipment and risk controls. Test the tray swap in the actual tin/oven before teaching, or use the verified cupcake format if that is the group's agreed product.

Chosen family: ☐ traybake ☐ cupcakes Recipe: ☐ V ☐ C Batches: ____
Actual recipe/tin trial checked by: _____ Checked bake time: _____
Oven adult: _____ Wednesday completion/storage adult: _____
Staff tasters arranged for Thursday, about 13:54–14:00: _____

Roles and kit

Choose/share the four role cards: baker/prep; hygiene/allergen checker; finance/costing; photographer/evidence. Match strengths and regulation needs. Offer a non-food-handling role. Kit: recipes, ingredient packs, scales, bowls, spoons, measuring spoons, cases/tin, rack, sealed boxes, labels, tongs, supervised cutting board/knife, soap, clean towels, cleaning materials, timer, calculator, books, project plans and the single project sheet. Staff device only for agreed evidence capture.

Change from SoW and why

SoW C179 says "Carry out an early project task in the community." GCS-1 applies this to an in-school trial bake for the community fundraiser. A1 expands the practical to Wednesday plus Thursday so making, safe overnight storage and testing are distinct. W3 roles are recovered here; full W4 costing remains due in Lesson 6. No actual teaching or assessment is claimed.

L4a · practical run sheet

12 stages · 40 minutes · Most teaching and rehearsal occur at the bench

Slide and stage	Min	Clock	Bench / evidence action
1. Title + big question	0	Reference	Display the question
2. Arrival & regulation check	2	00–02	Role cards and private reset
3. Retrieval	2	02–04	Own target/tool and product
4. Today: objective + "I can" statements with evidence links	1	04–05	Safe batch + L4-E1
5. I DO	4	05–09	Hygiene model and practise
6. WE DO	5	09–14	Weigh together; tare hinge
7. YOU DO — in your book	2	14–16	Own target/choice/tool in book
8. YOU DO — evidence capture (project sheet)	19	16–35	Mix, fill, bake; break; clean; E1-A
9. Evidence check before hand-in	2	35–37	Check individual record
10. Exit ticket	3	37–40	Safe handover and exit
11. Key vocabulary mat (EAL)	0	Reference	Reference word mat
12. TA / staff brief	0	Reference	Hidden staff brief

Practical block and transition

19-minute bench block, approximately 11:16–11:35. Mix and fill 11:16–11:22; adult loads the preheated oven by about 11:22. Recipe V cupcakes need about 15 minutes; C about 20 minutes, so completion may extend past the period. Staff test the chosen tray format in advance. At about 11:27 offer a two-minute movement break in the agreed safe zone while the oven adult remains at the oven. Learners then clean the cold zone, log counts/costs and dictate a concise personal record to section A of L4-E1. Scribe can record at the bench without handling food. Do not rush baking to fit a bell; the named handover adult completes baking, cooling and storage on Wednesday.

Stage 8 contains the practical and brief evidence capture; it is not a 19-minute writing task. Staff can scribe the learner's own words. Staff slides are hidden and add no teaching minutes.

L4b · practical run sheet

12 stages · 40 minutes · Most teaching and rehearsal occur at the bench

Slide and stage	Min	Clock	Bench / evidence action
13. Title + big question	0	Reference	Display the question
14. Arrival & regulation check	2	00–02	Role/reset check
15. Retrieval	2	02–04	Storage release; target/tool
16. Today: objective + "I can" statements with evidence links	1	04–05	Portion/test + L4-E1
17. I DO	4	05–09	Model actual ingredient label
18. WE DO	4	09–13	Label/portion check; hinge
19. YOU DO — in your book	2	13–15	Own choice/tool/reason in book
20. YOU DO — evidence capture (project sheet)	19	15–34	Portion, label, taste, tally; E1-B
21. Evidence check before hand-in	3	34–37	Evidence and contribution check
22. Exit ticket	3	37–40	Agree a change; clean; exit
23. Key vocabulary mat (EAL)	0	Reference	Reference word mat
24. TA / staff brief	0	Reference	Hidden staff brief

Practical block and transition

19-minute practical block, approximately 13:45–14:04. Portion 13:45–13:49 with supervised knives/tongs. Label and arrange 13:49–13:54; adult release gate before samples. Invite pre-arranged consenting staff tasters at about 13:54–14:00. Show the full-portion size and proposed price when asking value. Offer small individual samples; no double dipping or shared tasting tools. Tally 14:00–14:02, then clean and finish section B of L4-E1. A short stretch/private break is available while another role covers safely. If no tasters attend, leave the tally blank and rehearse presentation; do not fabricate feedback.

Stage 8 contains the practical and brief evidence capture; it is not a 19-minute writing task. Staff can scribe the learner's own words. Staff slides are hidden and add no teaching minutes.

Food safety and overnight handover

Complete this operational record before the batch is released

Before food handling: check group allergies and individual risk plans; complete the school's handler training; inspect every ingredient, warning and use-by date; wash hands and clean/sanitise equipment. Keep raw ingredients separate from ready-to-eat food. No raw mixture tasting. Adults manage ovens/hot trays, electrical equipment and supervised knives. Pause the practical if safe cover is absent.

Wednesday record	Name / time / action
Batch, recipe and actual packs kept	
Adult responsible after 11:40, if needed	
Oven in / out; bake-centre check and result	
Cooling location; adult transfers to rack	
Fully cool and boxed at; box/batch label	
Storage location and any required temperature	
Thursday release: storage/labels checked by/at	

Plain cakes are used for this trial. Cool fully on Wednesday, then place in clean, sealed, labelled containers away from raw foods. FSA permits airtight storage for suitable high-sugar cakes; the food lead checks the actual recipe and any ingredient storage instructions. No cream or custard is added. Any perishable substitution requires a reviewed chilling plan before use. Thursday is the cool-check/portion stage, not the start of cooling.

Bake times depend on the oven and format. Cupcake sources give about 15 minutes for V and 20 for C. The tray swap is an authored adaptation, not a verified source timing. Write a checked time before the session. A named adult continues baking/cooling after the bell where needed; no unattended oven or unfinished storage handover.

Before a staff sample: verify the complete ingredient list, actual allergens, batch and storage; use tongs/cake slice and separate clean samples. Tasting is voluntary. Do not serve an uncertain batch. Follow the school emergency/allergy response procedures if needed.

Assessment, access and learner voice

Project contribution evidence

Record what each learner did in their role, the choices they made and what changed after feedback. A scale or calculator may support the task; the record should explain the learner's own thinking and contribution. Keep individual evidence alongside the shared product.

One L4-E1 sheet holds both periods. Each section names the learner's own target, choice, technique, reason, result and evidence reference. Date it. Photos require an individual contribution note; shared products alone are insufficient. Record reading/scribing/voice support and read back the learner's words. Support must not supply any assessed idea, target, tool, situation or reason.

Link the completed individual evidence and feedback in the evidence app. Use only VF, WS, I, NS, E, R; code definitions and technical measurement are delegated to Code under the current ruling.

SEND, EAL and AfL

Verified general SoW adaptation: "Structured roles, visual planners" (GROW - Autumn!K22). GCS-1 adds one job at a time, visual recipe, timers, pre-weighed option, safety roles and movement break. Pre-teach the picture mat; use frames, short prompts, home-language rehearsal, scribe/voice support and a private reset. Retrieval, two hinges with expected errors, evidence checks and exits are in the run sheet and notes.

Three Cold Calls across the lesson

Which part of your plan are you using?

What information will help you choose?

What changed because of your decision?

Lundy

Space: Choose speech, writing, pointing or a scribe. Use a quiet role or planned break.

Voice: Choose a suitable role; own the target, decision, tool and reason. Safety limits are fixed.

Audience: The project teacher hears each learner; staff tasters give feedback; the assessor hears the evidence.

Influence: Record a named change to the recipe, portion, presentation or label before the sale. Explain any safety limit.

Before-sale checks and next steps

Staff planning record · The trial does not authorise the later sale

☐ Food-safety training for every handler Checked by / date: _____

☐ Ingredient and allergy check for every product Checked by / date: _____

☐ Allergen label on every item Checked by / date: _____

☐ Display space agreed Checked by / date: _____

☐ Named cash-handling supervisor for sale day Checked by / date: _____

These are the project's staff requirements. The FSA charity-event guidance says safe handling is required and a hygiene certificate is not automatically required for charity events. Whether legal allergen duties apply depends on food-business status; the food lead confirms the status and applicable rules. Keep complete ingredient information for every trial sample and sale item. A 14-box checklist alone is not a complete product label.

Use the actual trial feedback

Record a recipe/portion/label/presentation change with an owner and deadline. Keep ingredient costs, portion yield and proposed-price responses for Lesson 6. Leave missing taster responses blank; do not claim a staff test happened if it did not. Lesson 5 will review evidence and set project success criteria.

Offer to the Communication portfolio

Speaking: explain a role choice, ask a staff taster a question and suggest an improvement. Listening: follow a safety instruction and respond to taster feedback. Writing: record a choice, label or feedback tally. Presenting: introduce the trial product and explain one checked ingredient fact. The other teacher can select these moments and map the evidence against her Communication booklet.

Local coverage record

One-page coverage record · Complete actual dates and evidence after delivery

SoW coverage	Delivered / planned	Effect on coverage
W2 goal	Actual date/activity: _____	Coverage/evidence needed: _____
W3 roles	Actual date/activity: _____	Coverage/evidence needed: _____
W4 resources	Actual date/activity: _____	Coverage/evidence needed: _____
W5 partner/plan	Actual date/activity: _____	Coverage/evidence needed: _____
W6 early task	Actual date/activity: _____	Coverage/evidence needed: _____
W7 evidence	Actual date/activity: _____	Coverage/evidence needed: _____

Project history

Lessons 1–2 were mapped by cover to a unit the learners are not registered on; their evidence is retained as project history.

Record checked by: _____ Date: _____
