Evidence and mid-project review

Lesson 5 · SoW Autumn 1 Week 7 · Calendar Week 10 · 40 minutes

Date: _____ Local time: _____

Objective and evidence

Choose and caption three pieces of individual evidence, compare progress with shared success criteria and record one improvement for Autumn 2. L5-E1 holds captions or exact references; L5-E2 reviews the learner's own plan. Practice stays in books.

L5-E1 and L5-E2 link to Project learning link: [QUAL]; [AWARD] unit awards: [QUAL]; [QUAL]. This mid-project review records the learner's own evidence and next step; no award completion is claimed.

Before the lesson

Bring each learner's project plan, books, trial records, labels, staff tally and permitted photos. Gather real ingredient costs, yield, proposed prices and plausible staff demand. Prepare two or three feasible net-donation target choices using these figures; no invented group data. If data are absent, keep the target provisional and name the L6 check.

Kit: printed evidence, pens, glue, reference cards, calculator, visualiser or staff device, timer, individual project evidence sheet. No cooking, tasting or pupil phone use in this lesson.

Change from SoW and why

SoW C180 says "Record evidence (photos/notes) of our contribution." C175 says "Agree our project goal and success criteria." GCS-1 folds W2 goal-setting into this W7 review because it was not delivered as a dedicated lesson. Date goals as first agreed now; do not rewrite history or claim the trial met targets that were never set.

Access and adult support

Verified general SoW adaptation: "Structured roles, visual planners." GCS-1 C adds caption frames what / when / my role / result and adult typing or voice. Use short steps, evidence choice cards, quiet seating and a private response. Staff may read, rephrase, scribe and read back; the learner owns every assessed idea and reason.

Lesson run sheet

Fixed stages · 40 minutes total

Stage	Min	Elapsed	Action
1. Title + big question	0	Reference	Display big question
2. Arrival & regulation check	3	00–03	Private check-in and evidence choice
3. Retrieval	4	03–07	Recall own work; pre-teach vocabulary
4. Today: objective + "I can" statements with evidence links	2	07–09	Objective, criteria and ownership
5. I DO	5	09–14	Model four-part caption on a real item
6. WE DO	8	14–22	Agree goals/name; vote, hinge, individual reason
7. YOU DO — in your book	5	22–27	Draft three captions in books
8. YOU DO — evidence capture	8	27–35	Complete or reference L5-E1/E2
9. Evidence check before hand-in	2	35–37	Check personal evidence and feedback
10. Exit ticket	3	37–40	Best evidence and next step
11. Key vocabulary mat (EAL)	0	Reference	Reference vocabulary
12. TA / staff brief	0	Reference	Hidden staff brief

AfL and response

Retrieval checks real contribution and vocabulary. Hinge: a dated net-donation target is checkable; a broad wish is not. Expected errors: ignoring costs, choosing the largest number without checking capacity, or claiming a group vote shows each learner’s contribution. Re-model with the actual figures and ask each learner for their own choice, tool and reason.

If evidence is missing, record a gap and an actual completion date. An adult can capture concise spoken captions. Do not manufacture three items to fill the form. Exit: “Which piece of evidence best proves your contribution, and why?”

Our goals and decisions

Operational group record · Complete live and copy agreed goals into books

First agreed on: _____ Teacher / recorder: _____

Use checked trial figures. Potential donation = realistic takings less agreed costs. Costs/quantities remain subject to the full L6 costing review. The chosen target is an aim, never an actual total.

Money option	Net donation target	Votes	Reason / feasibility check
A	£____		
B	£____		
C optional	£____		

Tool: ☐ compare information ☐ ranking ☐ vote tally ☐ other: ____
Tie resolution / reason for choice: _____

Money goal: Donate £____ after agreed costs by ____.

_____

Awareness goal: ____ staff can tell us one agreed campaign fact by ____.

_____

Check by asking staff one agreed fact and tallying their responses. Use the verified campaign facts from L3; never invent visitor quotations.

Safe-practice goal: Every item has an adult-checked ingredient/allergen label.

_____

The group chooses how to show completion (for example, a staff-initialled checklist). Mandatory safety controls stay in place. Before-sale sign-off remains required.

Sale name chosen by the group:

_____

Goal status: ☐ agreed with checked figures ☐ provisional, needs data
If provisional: missing data ____ Owner ____ Check date ____
What changed after learners spoke? _____

Project evidence links

Project learning link: [QUAL]; [AWARD] unit awards: [QUAL]; [QUAL].

Offer to the Communication portfolio

Speaking: explain an evidence choice and give a reason during the goal vote. Listening: respond to another learner's reason and the teacher's feedback. Writing: caption real work and record a personal next step. Presenting: show an evidence item and explain the contribution it records. The other teacher can select these moments and map the evidence against her Communication booklet.

Review the learner's captions, target, contribution, feedback and planned improvement. If evidence is missing, record the gap and agree when to complete it. Keep the learner's own words and date each record.

Project history

Lessons 1–2 were mapped by cover to a unit the learners are not registered on; their evidence is retained as project history.

Before the later sale

Staff sign-off must cover handler food-safety training, allergy checks on every ingredient, a label on every item, agreed display space and a named cash supervisor. Use the B checklist and the later readiness review. FSA distinguishes food-business legal duties from non-business charity events; the project checklist remains the owner's requirement.

Mid-project review record

Half-term-equivalent checkpoint · Complete actual outcomes after teaching

Date: _____ Recorded by: _____
Group goals/name record reference: _____ Trial feedback reference: _____

What evidence shows real progress?

_____

_____

Which goal is not yet testable or has a gap?

_____

Improvement / missing evidence	Owner	Check date

Individual evidence check: learner / ID ____ Project plan reference ____
L5-E1 caption / item references ____ L5-E2 improvement ____
Support / feedback / next step ____ Staff initials ____ Date ____
Complete separately for each learner; a shared product needs an individual contribution.

Lundy and Cold Call

Space: speech, pointing, writing, scribe or quiet response. Voice: each learner chooses evidence and an improvement. Audience: the project teacher and assessor hear it. Influence: update the goal/next-step record and explain any safety limit.

1. What did you do in this piece of evidence?
2. Why can our group reach this target?
3. What will you change in your plan, and why?

Feedback: VF · WS · I · NS · E · R. Evidence: the evidence app. Use the centre's agreed code definitions.

Next teaching step: keep actual evidence, group goals, provisional checks and individual improvements for the problem-solving lesson.
