Teacher and cover planner

Peer pressure and safe choices

Wednesday 10 March 2027 · P3 · 40 minutes · Year A

GROW PSHE · Spring 2 Week 3 · up to five learners · formative

Spring 2 runs 22 February to 25 March 2027 for five weeks. Pressure and choices is an original lesson grouping.

Thread tags: SMSC S/So; British Values IL/MR. Other tags not claimed.

Exact outcome

Understand peer pressure and assertiveness.

GROW Weekly Spring row 72 C72. Exact outcome checked. Owner supplies date, period, group and five week calendar. This lesson is formative.

Purpose

For all three invented cases, show the pressure type, a clue, a fitting phrase and a safe next step. Types can overlap. Both main formats have the same checks. All three phrase trials are offered in the learner usual mode. All scenes are invented, mild and offline. No personal pressure, account or story is requested.

Cover preparation

Read Staff Answers. Prepare books, Support Cards, glossary and usual aids. Offer the typed Evidence Sheet. Agree private help and the supervised pause route with an available adult before teaching. No pupil plays a persuader. Staff cue the three phrase trials calmly.

Forty minute sequence

Phase	Time	Action
Arrival and starter	0–5	Settle, agree private help and supervised pause; recall free choice.
Input	5–10	Teach direct, indirect and online pressure; types can overlap.
Model and guided work	10–17	Model case A and a clear phrase. Match a clue or improve advice.
Private hinge and choice	17–22	Check indirect pressure and free choice; choose task and mode.
Individual task and trials	22–34	22–27 map or advice for A to C; 27–32 offer all three phrases aloud with access alternatives; 32–34 optional private exit card.
Review	34–38	Use common checks; set one NS and retain the pupil response.
Private exit	38–40	Explain a help route or repair a pressure myth. Close with support.

Total forty minutes, including processing and quiet pauses. Main work 22–27, three phrase opportunities 27–32, optional private card 32–34. No extra time is added.

Where this leads

This helps me state a choice, respect another person's choice and seek support in a group or future work.

Teaching and response routes

Starter choices

Choose whether the invented learner may choose drawing. Or explain a safe way they could ask for support. No public question round.

Input

Peer pressure is feeling pushed by people of a similar age to do or choose something. It can be direct, felt without a spoken demand, or happen online. A person can choose differently and ask for help. Other people's harmful behaviour is not their fault. Being assertive means making a clear, respectful choice or request. It can use words, a note or a usual aid. It does not require a loud voice, eye contact or a confident feeling. A clear no should be respected. A person can seek help without saying no first.

Model A

An invented learner wants the quiet drawing task. Another learner keeps asking them to choose a group task instead. The learner wants to keep their own choice. In A, repeated requests are a direct pressure clue. A clear phrase is: No, I am choosing my own task. The learner may ask trusted school staff for help. Help is valid before a refusal too.

Guided choices

Match repeated requests to a direct pressure clue. Or improve the advice Everyone must copy the group. A person may choose freely. Group members choosing the same task are not automatically doing something wrong. Fade answer cues, keeping the visible model and usual aids.

Two equal main choices

Choose pressure map B or short advice C. Both use cases A, B and C, the same checks and all three phrase opportunities. A map may be a list. Advice needs no extra length. Keep books, typing, aids or exact scribing available.

Supported

Choose map B or advice C. Keep the short bank, starter and visible model. Offer two type or phrase choices if needed. Point, type, use a usual aid or exact scribe and readback. Offer all three phrase trials without pressure. Record content cues apart from usual access.

Independent

Choose either format for all three cases. Explain type, clue, fitting phrase and safe next step. Offer all three phrase trials. Keep normal aids and the model. No personal story or public speech is needed.

Aspire

Choose either format for all three cases. Explain why online pressure can be direct or indirect, and why a group sharing a choice is not always applying pressure. Adapt the help route if the first adult is busy. Offer all three phrase trials with usual access. No extra personal detail.

Private keep card

The exit-line card is optional, private and pupil kept. Use a role, never a name. It may use the invented learner, stay blank or be passed. No personal pressure, account, worry or experience is needed. Do not collect, photograph, display, compare or copy it into learning evidence. An agreed scribe returns it to the pupil. A blank card is supported without pressing. Offer within 32–34 minutes. Assess fictional learning without looking at the private card.

Task aids and access

Starter

Words: choice · group · pressure · help

Start: The learner could choose…

Model: They can choose drawing and ask for help.

Types of pressure

Words: direct · indirect · online · clue

Start: This may be… because…

Model: Repeated requests are a direct pressure clue.

Model A

Words: clear · choice · respect · adult

Start: A fitting phrase is…

Model: No, I am choosing my own task.

Private hinge

Words: copy · free choice · fit in

Start: The clue is…

Model: They feel they must copy to fit in.

Main task choices

Words: type · clue · phrase · next step

Start: For case… I suggest…

Model: For case C, stop replying and ask staff for help.

Three phrase trials

Words: say · aid · type · observe · pass

Start: A clear request could be…

Model: Please stop asking. I want to keep my work private.

Review and exit

Words: help · role · safe route · reply

Start: They can ask…

Model: They can ask another trusted adult if help is not enough.

Response modes

Books are the first route. Evidence Sheet page 2 offers Type instead for both formats. Point, draw, use a usual aid or exact scribe. Read back privately and allow correction. Keep reading and language aids. Plan in any language. No public questioning.

Prompt ladder

Point to the place or instruction. Ask a short private question. Rephrase. Offer a scaffold or choice. Model the first step only, then return the task. Allow time. Record content cues apart from usual access.

Checks and planned access

Main private hinge

A group chooses the same task. One learner feels they must copy it to fit in. What is the best explanation? A The group must be doing something wrong. B The learner may feel indirect pressure. They can choose differently or ask for help. C The learner must copy the group. D The learner must argue until everyone changes. Check privately. B or safe equivalent with a reason: proceed. A labels the group without evidence; C removes choice; D asks for control or conflict. Re-model and use parallel A. Pass or no response is unobserved and revisited with support, not failure.

Parallel check

Repeated online requests push a learner to share private work. A This can be online and direct pressure. Ask a trusted adult for help. B Online pressure cannot be direct. Correct A. Online and direct can overlap. A pass is unobserved.

Questions in private

F Who could the invented learner tell? M What is the clue in B? H Why can C be online and direct, while a group making one choice is not always applying pressure? Use a note, pointing, typing or usual aid. No public questioning.

Misconceptions

Being assertive does not require a loud voice, eye contact or a confident feeling. A person can get help without saying no first. Online pressure may also be direct or indirect. A group sharing a choice is not always applying pressure.

Planned adaptations

Cognition and Learning: short parts, visible model and two choices. Communication and Interaction: wait time, usual aid, typing or exact scribe with private readback. SEMH: predictable mild cases, no pupil applying pressure, private response, pass and supervised pause. Sensory and Physical: clear print, usual tools and comfortable position. EAL: explain the key words and plan in any language.

TA focus

Input: model a clue and phrase, without acting out pressure. Guided: offer a match or advice repair. Independent: check chosen work privately, offer all three phrase opportunities, record mode, access and content cues. Keep supervision on the pause route. Do not fill missing answers or press for personal details.

Evidence cover and safe support

Evidence judgement

Use fictional learning only. Check each case type, clue, fitting phrase and safe next step. Record all three phrase opportunities honestly. Hearing a model does not prove spoken performance. A pass is unobserved. Do not infer future confidence, safety or real life assertiveness.

Review and exit

Use common checks or repair the myth You must refuse three times before asking for help. Help is valid at any point, even when unsure. Set one precise NS and keep the actual reply. Exit: give a safe adult route or repair a pressure myth. A learning self-check does not rate confidence or wellbeing.

Feedback and portfolio

Retain actual fictional learning evidence, usual access and content prompts. Record each phrase opportunity as spoken, aided, typed, pointed, model heard, observed, passed or not observed. A pass is not failure. Set one NS and allow a reply in the pupil's own colour or usual mode. E only for actual saved work. R only after Voice, Audience, one NS and the actual pupil response. Offer to the Communication portfolio; staff confirm mapping. Private cards and real concerns are not learning evidence.

Non specialist cover

Use supplied definitions and cases only. If display or typing fails, read the cards with books, an aid or exact scribe. Do not open accounts, show real content or ask learners to pressure each other. Offer all three phrases with a neutral cue, not a persuasion scene. Ask for adult help at once if anything feels unsafe. Do not require confrontation, repeated refusal or remaining in harm.

Exit route

The line I am going to ask a trusted adult for help is a reminder to use the agreed adult-supported route. Staff acknowledge the usual signal, keep supervision and support the familiar place or private conversation. A pupil does not leave alone. No one must say a line to the person applying pressure or remain in an unsafe situation.

Private help

Tell a trusted adult or school staff privately if pressure continues, feels confusing, makes someone uncomfortable or involves an unwanted online request. Help is valid even when unsure and before a refusal. Use words, a note, HELP or the usual aid. The safeguarding lead helps staff act through the school procedure. If the first adult is busy or help is not enough, ask another trusted adult. For an immediate safety concern, get adult help at once. Do not wait to repeat a phrase. An adult may need to share information with people who can help; no secret or fixed outcome is promised.

Discreet step out

Before teaching, agree a discreet HELP or PAUSE signal, available adult and familiar supervised place and route. Staff acknowledge it quietly. No public reason is needed. Offer a neutral task, supported return or private catch-up. Do not send a learner away alone. Pass and a pause are not failure.

Safeguarding

Any disclosure goes to the safeguarding lead through school procedure. Listen calmly, reassure, do not probe, investigate or promise secrecy. Follow urgent school procedures for immediate concerns. Keep real concerns and identifying details in the separate safeguarding record, not learning evidence. A pupil unable to identify a trusted adult is supported privately, not pressed.
