Knowledge organiser

Choose one linked autumn science idea. Name the real evidence you used.

Explain how the evidence supports the idea. Do not claim more than it shows.

Use one response to make the work clear, fair or wider. Record what changed.

I can use real autumn science evidence to explain one linked idea, note a limit, and improve my work after feedback.

Find real work. Keep the page, date or source name. Say what it shows and how you know. Keep a fair limit.

Step	What I keep
Claim	One idea the record can support.
Clue	A real label, result or model feature.
Reason	How the clue fits the claim.
Limit	What this record cannot show.
Response	The actual words or choice I received.
Change	My first and new versions side by side.

Make clear: add a label or source. Make fair: narrow the claim. Make wider: add another real link.

If work is missing, write not found yet. Plan where to look. Do not make up a result.

Word page

Choose one linked autumn science idea. Name the real evidence you used.

Explain how the evidence supports the idea. Do not claim more than it shows.

Use one response to make the work clear, fair or wider. Record what changed.

Word	Meaning
Claim	The idea you want to show.
Evidence	A real clue that helps test a claim.
Locator	The page, date or label to find it.
Reason	How the clue fits the claim.
Limit	What the record cannot show.
Revise	Make a checked change to your work.

Use your own words. Point to the real record. Keep the first version.

Start with what is real

Choose one linked autumn science idea. Name the real evidence you used.

Explain how the evidence supports the idea. Do not claim more than it shows.

Use one response to make the work clear, fair or wider. Record what changed.

Get your first Week 7 record or real autumn work. Keep the page, date, file, lesson or card name with it.

Mark one strong link. Mark one point to check. Do not fix it yet.

Find the claim, the clue and the reason that joins them. A mark or label is enough.

Keep the first version beside an empty change box. If the source is missing, write not found yet.

You may point, sign, say, draw, type, write or use an exact scribe. You may pass or pause. Keep your own first words.

Made from the web lesson SCI-GROW-A2-W07-P2

What would count?

Choose one linked autumn science idea. Name the real evidence you used.

Explain how the evidence supports the idea. Do not claim more than it shows.

Use one response to make the work clear, fair or wider. Record what changed.

Read two accounts. Which one links the clue to the claim?

A. The model has arrows.

B. The arrows point from the food to the animal, so the model shows the direction of energy transfer.

Choose A or B. Point to the clue words and the reason words. Keep your first choice.

Topics to revisit: day and night; shape and space; climate; forces. Choose a genuine record.

FC-2 · a food-chain teaching model

Choose one linked autumn science idea. Name the real evidence you used.

Explain how the evidence supports the idea. Do not claim more than it shows.

Use one response to make the work clear, fair or wider. Record what changed.

This card is a teaching model. It is not a learner's result.

From	Arrow points to
Grass	Rabbit
Rabbit	Fox

The arrows show the direction of energy transfer in this model.

Claim: this model shows energy passed from grass to rabbit, then to fox.

Locator: card FC-2, the arrow labels.

Limit: this card does not show how much energy is passed on. It does not show every food a fox eats.

I do · claim, clue, reason and limit

Choose one linked autumn science idea. Name the real evidence you used.

Explain how the evidence supports the idea. Do not claim more than it shows.

Use one response to make the work clear, fair or wider. Record what changed.

State a claim that this record can answer.

Name the source and the exact clue. On FC-2, the arrow points from grass to rabbit.

Say how the clue supports the claim. The arrow shows the direction of energy transfer.

Add a fair limit. This model does not show the amount of energy transferred.

Keep the first version. After a response, change one part and say why.

Made from the web lesson SCI-GROW-A2-W07-P2
Version _____

Limit finder · source examples

Choose one linked autumn science idea. Name the real evidence you used.

Explain how the evidence supports the idea. Do not claim more than it shows.

Use one response to make the work clear, fair or wider. Record what changed.

Source model or record	Fair limit
Globe and lamp: day and night	Not to scale; the axis is simplified.
Rover test: two surfaces	Three repeats show a pattern, not a law.
Classroom ball: Earth	Smooth ball hides mountains and slight flattening.
Simplified climate figures	Real data varies more than a diagram.

Match each model to its limit. Use your real record for your own work. Do not claim you made these results.

Made by Matt · © Matt Roper · CC BY-NC-SA 4.0: free for classroom use, share and adapt with credit, no resale

We do · choose a revision move

Choose one linked autumn science idea. Name the real evidence you used.

Explain how the evidence supports the idea. Do not claim more than it shows.

Use one response to make the work clear, fair or wider. Record what changed.

Choose the move that makes the science more true. Give the clue for your choice.

Move	Use it when
1. Make clear	A source, label or word is missing.
2. Make fair	The claim says more than the clue shows.
3. Make wider	A second real record can add a link.

Keep the first version. Add your new version beside it. Name the response you used.

I do 2 · accuracy includes limits

Choose one linked autumn science idea. Name the real evidence you used.

Explain how the evidence supports the idea. Do not claim more than it shows.

Use one response to make the work clear, fair or wider. Record what changed.

First version: “The food chain proves all foxes eat rabbits.”

Response: “Make fair: say what this card shows, not what every fox does.”

Checked revision: “This card shows a possible grass to rabbit to fox feeding link.”

Keep the first words and the response. The response guides a change; it is not a score.

Keep your own choice. Do not copy an adult’s words as if they were yours.

Made by Matt · © Matt Roper · CC BY-NC-SA 4.0: free for classroom use, share and adapt with credit, no resale

We do 2 · build the route

Choose one linked autumn science idea. Name the real evidence you used.

Explain how the evidence supports the idea. Do not claim more than it shows.

Use one response to make the work clear, fair or wider. Record what changed.

1. Locate a real record. Keep its page, date or card name.
2. Connect a clue to a claim. Explain the link.
3. Limit the claim. Say what you cannot show.
4. Receive one response: clear, fair or wider.
5. Revise one part. Keep the first version.
6. Check each claim. Leave not found yet where needed.
7. Hand forward the record, your meaning and next action.

In a pair, explain and check. In a trio, a third person finds the source. Swap roles. Each keeps their own choice.

Independent · Supported

Choose one linked autumn science idea. Name the real evidence you used.

Explain how the evidence supports the idea. Do not claim more than it shows.

Use one response to make the work clear, fair or wider. Record what changed.

Make one account from real autumn science work. Keep a claim, locator, clue, reason, limit and one checked change.

Use one real evidence item and the claim, clue and reason frame.

Point to one box at a time. Ask for one private response. Make one clear or fair change.

Use genuine work, local cards, labelled models or real results. Keep shared talk and adult help separate.

Write, draw and label, use the approved audio route, or explain in private to an adult.

Choose one route in the full 16 minutes. Keep your own record.

You may point, sign, say, draw, type, write or use an exact scribe. You may pass or pause. Keep your own first words.

Independent · Independent

Choose one linked autumn science idea. Name the real evidence you used.

Explain how the evidence supports the idea. Do not claim more than it shows.

Use one response to make the work clear, fair or wider. Record what changed.

Make one account from real autumn science work. Keep a claim, locator, clue, reason, limit and one checked change.

Use two real evidence links for one linked idea. Give a locator for each.

Compare what the records show. Keep one limit. Save a clear, fair or wider change.

Use genuine work, local cards, labelled models or real results. Keep shared talk and adult help separate.

Write, draw and label, use the approved audio route, or explain in private to an adult.

Choose one route in the full 16 minutes. Keep your own record.

You may point, sign, say, draw, type, write or use an exact scribe. You may pass or pause. Keep your own first words.

Independent · Aspire

Choose one linked autumn science idea. Name the real evidence you used.

Explain how the evidence supports the idea. Do not claim more than it shows.

Use one response to make the work clear, fair or wider. Record what changed.

Make one account from real autumn science work. Keep a claim, locator, clue, reason, limit and one checked change.

Judge two accounts or two pieces of evidence. Which is more useful for this claim, and why?

Use the same reasoning for a new linked question. Keep a fair limit. Do not invent a result.

Use genuine work, local cards, labelled models or real results. Keep shared talk and adult help separate.

Write, draw and label, use the approved audio route, or explain in private to an adult.

Choose one route in the full 16 minutes. Keep your own record.

You may point, sign, say, draw, type, write or use an exact scribe. You may pass or pause. Keep your own first words.

My first account

Choose one linked autumn science idea. Name the real evidence you used.

Explain how the evidence supports the idea. Do not claim more than it shows.

Use one response to make the work clear, fair or wider. Record what changed.

My name _____ Date _____

My linked idea and claim: _____

First source: page, date, file, lesson or card: _____

Exact clue: _____

Second source and clue, if used: _____

The clue supports my claim because: _____

It does not show: _____

Source not found yet? Where I will look: _____

Made from the web lesson SCI-GROW-A2-W07-P2
Version _____

Made by Matt · © Matt Roper · CC BY-NC-SA 4.0: free for classroom use, share and adapt with credit, no resale

My response and checked change

Choose one linked autumn science idea. Name the real evidence you used.

Explain how the evidence supports the idea. Do not claim more than it shows.

Use one response to make the work clear, fair or wider. Record what changed.

Keep the first version on the page before this.

My receiving adult or agreed audience: _____

The actual response was: _____

My move: make clear / make fair / make wider.

My new version: _____

What I changed and why, or why I kept it: _____

Shared work and adult help I used: _____

Next action, responsible role and report-back: _____

Made by Matt · © Matt Roper · CC BY-NC-SA 4.0: free for classroom use, share and adapt with credit, no resale

Check the trail

Choose one linked autumn science idea. Name the real evidence you used.

Explain how the evidence supports the idea. Do not claim more than it shows.

Use one response to make the work clear, fair or wider. Record what changed.

Can I find each source I named? Does the claim fit the source?

Have I shown the clue and the reason? Is the limit still clear?

Can a reader see my first version, response and change?

Have I kept shared work and adult help separate?

If one answer is no, return to that box. Keep the rest of the real record.

Do not backdate, stage an event or make up a result or quote. Missing work stays missing until found.

Exit · one link, one limit, one next step

Choose one linked autumn science idea. Name the real evidence you used.

Explain how the evidence supports the idea. Do not claim more than it shows.

Use one response to make the work clear, fair or wider. Record what changed.

Show the first and new versions.

My evidence supports _____.

It does not show _____.

I changed _____ because _____.

Ask the adult to name back your link, limit and change.

Next check: _____. Who: _____. Report-back: _____.

Your work may go to a centre review. A lesson does not decide an award.

You may point, sign, say, draw, type, write or use an exact scribe. You may pass or pause. Keep your own first words.
