Three step dish for next week

Design and Technology LAUNCH Spring 1 Week 1 Thursday 7 January 2027 P1 Year A

Cold bean and vegetable wrap with fruit and plain yoghurt

For one person. Use the listed amounts. Total ingredient-use cost £1.40. No heat is required. This week, choose and rehearse the method. Prepare food only in the later supervised practical.

Ingredient	Amount
Wholemeal wrap	1 wrap
Ready-to-eat cooked beans	80 g drained
Carrot	60 g
Cabbage	40 g
Plain yoghurt	60 g
Apple	1 small

1 Prepare

With adult approval, wash the vegetables and fruit. Grate the carrot and finely slice the cabbage using the agreed tools. An adult can prepare these for you.

2 Mix

Use 80 g of ready-to-eat cooked beans, drained by an adult if needed. Mash with a fork. Mix in about 20 g of the plain yoghurt and the vegetables.

3 Assemble

Put the filling on the wrap. Fold it. Serve with the washed fruit and the rest of the yoghurt. Keep it chilled until eaten and follow the adult’s plan.

An adult opens tins and removes sharp lids before the activity. Use the approved allergy and access plan. Tasting is optional. Clean and clear the station at the end.

Adult practical readiness check

Design and Technology LAUNCH Spring 1 Week 1 Thursday 7 January 2027 P1 Year A

Complete this check before any Week 2 food is issued. The pupil plan can meet the planning outcome while practical approval remains pending.

Ingredient and dietary checks

The model contains wheat including gluten and milk. Soya is present in the optional alternative. All ingredients and alternatives need label checks for all relevant allergens and cross-contact. A plant alternative is not automatically suitable. If a safe substitution is unavailable, use the planning or simulation route. Never describe a meal as allergen-free.

Confirm dietary requirements privately, including vegetarian or other needs. Check every actual label and precautionary statement. Confirm ingredients, safe substitutions and the quantities to issue. If needs cannot be met safely, use planning or simulation.

Tools and supervision

Check room routines, first aid arrangements, staffing and safe tool access. Demonstrate and supervise any grater or knife use. An adult opens tins and removes sharp lids. Offer pre-cut vegetables and pupil-directed adult handling. No heat or raw animal food is needed.

Storage and disposal

Keep chilled ingredients at 0–5°C and out for the shortest preparation time. Follow use-by dates and storage labels. Plan same-day eating. If food goes home, agree safe chilled transport first. Refrigerate leftovers promptly and follow their labels; use within 48 hours or freeze if suitable. The adult decides storage or disposal.

Decision to record

Plan page ___. Dish ___. Actual labels and dietary plan checked ___. Tools and supervision agreed ___. Storage or disposal agreed ___. Status approved / pending ___. Date ___. Record only checks that actually happened.

If the practical cannot run

Use empty-hand rehearsal, verbal sequencing and a pupil-confirmed record. Keep practical competence and tasting evidence pending.
