Teacher and cover plan

Design and Technology LAUNCH Spring 1 Week 4 Thursday 28 January 2027 P1 Year A

Choose fabric for a useful pouch

Weekly outcome verbatim: TEXTILES: choose fabric and technique for a purpose.

LAUNCH Weekly Spring row 200. Year A. Resilience & Change. One 40-minute lesson for a small group aged 14 to 16.

Prepare

Read the purpose brief and design decision card. Provide generic felt, woven cotton and stretch knit samples if available, or the labelled model photo. Make or describe three paper cards 60 by 80 mm. Use a ruler to show 100 by 120 mm and 10 mm. No cutting or needle use is required for the choosing outcome.

A non-specialist cover adult can teach from the model descriptions and a paper or empty-hand shape. If any needle is demonstrated, the adult selects the tool and thread, supervises, counts it out and returns it to a container. No adhesive practical is required. Do not choose a cure time or introduce heat.

Timing

Stage	Minutes
Arrival	5
Starter	3
I do	5
We do	7
We do 2	5
Independent	8
Review	4
Exit	3

Total 40 minutes. Supporting samples, cards and models fit inside these stages. Pauses use tools down. Books first; oral or signed decisions can be confirmed by a scribe.

Purpose and fabric properties

Design and Technology LAUNCH Spring 1 Week 4 Thursday 28 January 2027 P1 Year A

Arrival 5 minutes

Say and do: Show three actual cards if available, or describe their written size. Read the purpose and distinguish a useful item from decoration alone. Ask who will use it and what it must hold. Explain the top stays open. No personal possessions need to be shown. Use the last minute for a calm settling pause.

Check and response: Ask what must be joined and what stays open. Expect sides and bottom joined, top open. Re-read the brief if the opening is unclear.

Starter 3 minutes

Say and do: Offer generic felt, woven cotton and stretch knit samples, or the labelled model photo and notes. Model gentle handling. Real samples may differ from the model descriptions. Read the three property checks. Choose one actual sample test if available; stop before any sharp tool is needed.

Check and response: Ask: Is a photo a test of your sample? No. Name actual sample evidence separately from model information.

Modelling and shared comparison

Design and Technology LAUNCH Spring 1 Week 4 Thursday 28 January 2027 P1 Year A

I do 5 minutes

Say and do: Model: I choose the felt model and hand running stitch because firm fabric may support the cards and stitch joins sides and bottom. Point to two rectangles 100 by 120 mm and the 10 mm side and bottom seam lines. This is a design plan, not a cutting demonstration. Compare adhesive approval and full cure against controlled needle use. A fastening closes an opening; it does not join our sides and bottom. Fade the example by leaving the final reason for the pupil to finish.

Check and response: Ask why a button alone is insufficient. Expect it does not join the sides and bottom. A quiz answer never authorises tool use.

We do 7 minutes

Say and do: Compare felt and woven cotton together. A softer fabric may need support; a fraying edge may need finishing. Accept a different conclusion if it follows an actual sample result and an approved design. Use the frame property, effect, decision. An adult can read back a pupil explanation. No invented tests. Pupils may rehearse in any language or point to one property row.

Check and response: Ask for a property and a reason tied to the cards. A colour preference can be included, but it does not replace evidence about holding the cards.

Hinge and own design decision

Design and Technology LAUNCH Spring 1 Week 4 Thursday 28 January 2027 P1 Year A

We do 2 5 minutes

Say and do: Hinge answer is no. A fastening has a different job. If any pupil confuses the two, use two pieces or empty hands to point to sides, bottom and top. Parallel check: adhesive feels dry; may you test the join before the label cure is complete? No. Adult label approval and full cure are required. Recheck after reteaching.

Check and response: Move on when the pupil distinguishes joining from closing and explains one control for the chosen technique. If not, use Supported with the taught hand-stitch model and adult-led comparison.

Independent 8 minutes

Say and do: Use one route and the design decision prompts. The core decision may use model information honestly. Default felt and running stitch is available; the pupil still gives an own-word reason. A revised fabric or method needs adult review of dimensions, joining and safe access before Week 5. Use the last minute to check and organise the record.

Check and response: Check fabric, source of property evidence, join, purpose reason and dimensions. Scribe exact words and read back where needed. Missing tests remain pending; a valid reason based on model information can still show choosing.

Review and the next maker

Design and Technology LAUNCH Spring 1 Week 4 Thursday 28 January 2027 P1 Year A

Review 4 minutes

Say and do: Offer a private adult check or a peer comment by consent. Review the plan rather than claiming the unmade item passed a load test. Confirm the actual design and any access changes for Week 5. The adult approves tools separately. Use the last minute for calm tidy and return any sample or tool.

Check and response: Pupil confirms their final choice and corrects any scribed words. Mark adult design review approved or pending. Record only actions that occurred.

Exit 3 minutes

Say and do: Ask for a short pupil-owned choice and reason, privately if preferred. Keep the book location and actual support. Return and count any needles if they were demonstrated. Next week retrieves this exact design; an unfinished decision remains marked unfinished.

Check and response: The final evidence is a design decision with a purpose-linked reason and honest source label. It is not a claim of making or testing an entire pouch.

Keep for Week 5

Retain the pupil’s actual fabric and joining choice, dimensions, reason, source and support. A change later must be recorded. Do not cut a different item without an adult-approved revised design.

Access and adult support

Design and Technology LAUNCH Spring 1 Week 4 Thursday 28 January 2027 P1 Year A

Cognition and Learning

Read one property at a time. Compare two options before three. Model property, effect and decision, then fade to a sentence start. Keep written dimensions beside the sketch. Offer a repeated checklist.

Communication and Interaction

Accept pointing, speech, signing and pupil-directed scribing. Give thinking time and a choice before an open question. Read the final choice back for correction.

SEMH

Keep choices about an invented useful item. No personal hardship, body or spending disclosures. Offer private review and a calm pause. Put tools down before a pause and agree the safe return.

Sensory and Physical

Offer no-touch comparison, a large view and adult handling of samples. Do not force texture contact. Plan the actual grip, tool and needle support before later making. A visual model does not prove a tactile test.

EAL

Plan in any language. Match fabric words to the sample or labelled model. Use property, effect and decision as short spoken chunks. Preserve the pupil meaning in confirmed scribing.

Materials free fallback

With no fabric, tools, paper or printer, hear the purpose and model descriptions. Point, speak or sign a choice. Explain one property and one reason. Rehearse the plan with empty hands. An adult records exact confirmed words when a recording method is available. Mark transcription pending until it exists. Keep actual sample tests and textile making pending.

Where this leads

Textile designers choose materials and joins to suit a user and a purpose. Testing a sample helps a maker explain a choice before cutting valuable material.
