Sequence and evidence guide

Design and Technology LAUNCH Spring 1 Week 4 Thursday 28 January 2027 P1 Year A

Design and Technology LAUNCH Spring 1 Week 4. Use the dated cover plan, purpose brief and actual pupil book first. School and Public contain the same generic resources.

Design make evaluate

The first three weeks covered food planning, making and evaluation. Week 4 chooses fabric and method. Week 5 measures, cuts and joins the recorded design. Week 6 finishes and evaluates; it is the assessing week. Only Week 4 is included here.

One shared purpose

Design a small reusable pouch for three paper prompt cards. Each card is 60 mm wide and 80 mm high. Hold the cards upright. Join the sides and bottom; leave the top open. The pouch should be comfortable to handle, with no loose sharp parts.

Default plan: two fabric rectangles, each 100 mm wide and 120 mm high. This is 10 cm by 12 cm. Plan a seam line 10 mm inside the left, right and bottom edges. Leave the top open. These are written measurements, not a printed cutting template.

Evidence this week

Retain a pupil-owned fabric and joining decision with a property, effect, purpose reason and source. Record actual sample testing or model information used. Include actual date, support and book page. No made item, sample test or successful product test is invented.

Resources and routes

Select Supported, Standard or Stretch. Use the combined pupil pack or individual cards. Type instead starts closed; Save my responses creates a local text file. No work, photo or health data is uploaded. Plan in any language.

Models and safe making boundaries

Design and Technology LAUNCH Spring 1 Week 4 Thursday 28 January 2027 P1 Year A

Original teaching photo

The fabric strip is an original invented teaching model. It shows felt, woven cotton and stretch knit appearances. The knit has a finished edge. A photo cannot prove stretch, fraying, firmness or the result of an actual pupil sample test.

Adult controls

Actual material properties vary. Test gently or label model descriptions. The adult controls needles, scissors and any adhesive. Count and contain needles before and after any demonstration. No heat, iron or solvent route is taught. Adhesive requires actual label approval and full cure before testing.

If materials are missing

With no fabric, tools, paper or printer, hear the purpose and model descriptions. Point, speak or sign a choice. Explain one property and one reason. Rehearse the plan with empty hands. An adult records exact confirmed words when a recording method is available. Mark transcription pending until it exists. Keep actual sample tests and textile making pending.

Keep continuity

The default open-top pouch uses two 100 by 120 mm pieces and 10 mm side and bottom seam lines. Any change requires an actual revised design and adult check. Illustrations are not cutting templates; written ruler measurements govern.

Where this leads

Textile designers choose materials and joins to suit a user and a purpose. Testing a sample helps a maker explain a choice before cutting valuable material.
