OPENING RESILIENCE AND CHANGE

Measure cut and join our pouch

I can use my checked design to measure, cut and join accurately with safe support.

Weekly outcome

TEXTILES: measure, cut and join accurately.

Thursday 4 February 2027 P1. Year A. 40 minutes.

ARRIVAL 5 MINUTES

Our checked design

Find your Week 4 design decision.

Confirm the fabric and join with the adult.

Wait for approved tools and support.

STARTER 3 MINUTES

The default measurements

Check	Default target
Two pieces	Each 100 mm by 120 mm
Seam line	10 mm inside left right and bottom
Join	Small even passes about 5 mm apart

Use the actual approved design if revised.

I DO 5 MINUTES

A safe demonstration

Measure, mark and recheck before cutting.

The adult demonstrates approved scissors and needle use.

Pass through both layers and pull thread gently flat.

WITHIN I DO JOIN MODEL

The running stitch sequence

Align layers and start with a knot between them.

Make small even passes through both layers along the line.

Secure with a small stitch loop twice. Leave the top open.

Count and return every needle.

WE DO 7 MINUTES

Mark and check together

Measure and mark two pieces from your plan.

Recheck all four sides before cutting.

Mark the three 10 mm seam lines.

WE DO 2 5 MINUTES

The 103 mm hinge

Target width 100 mm. Check range 98 to 102 mm.

Actual width 103 mm. Is it within range?

Remeasure from zero and agree a safe correction.

INDEPENDENT 8 MINUTES

My actual join

Align the two pieces.

Use the agreed join along three sides.

Keep the top open and check the thread lies flat.

WITHIN INDEPENDENT ROUTES

One route at a time

Supported: one action and measure with an adult.

Standard: follow the checked plan and record actual measures.

Stretch: explain and justify a real correction.

REVIEW 4 MINUTES

The real accuracy check

Put tools down and return counted needles.

Record actual width, height and seam margin.

Name one correction or next step.

WITHIN REVIEW SAFE CLOSURE

Safety and evidence

Return counted needles and agreed scissors.

Record pupil and adult actions separately.

Unfinished work or simulation stays clearly labelled.

EXIT 3 MINUTES

My making and next step

I measured or directed ___.

My actual join is ___.

Next time I need to finish or improve ___.
