

Our maze project

I can create a maze, a player and a finish as three sprites.

Start a new project with W03_Blank.sb3.

You can point, say or write. Quiet working is available.

A route that works

Look at the small player and the large player.

Which can fit through the gap?

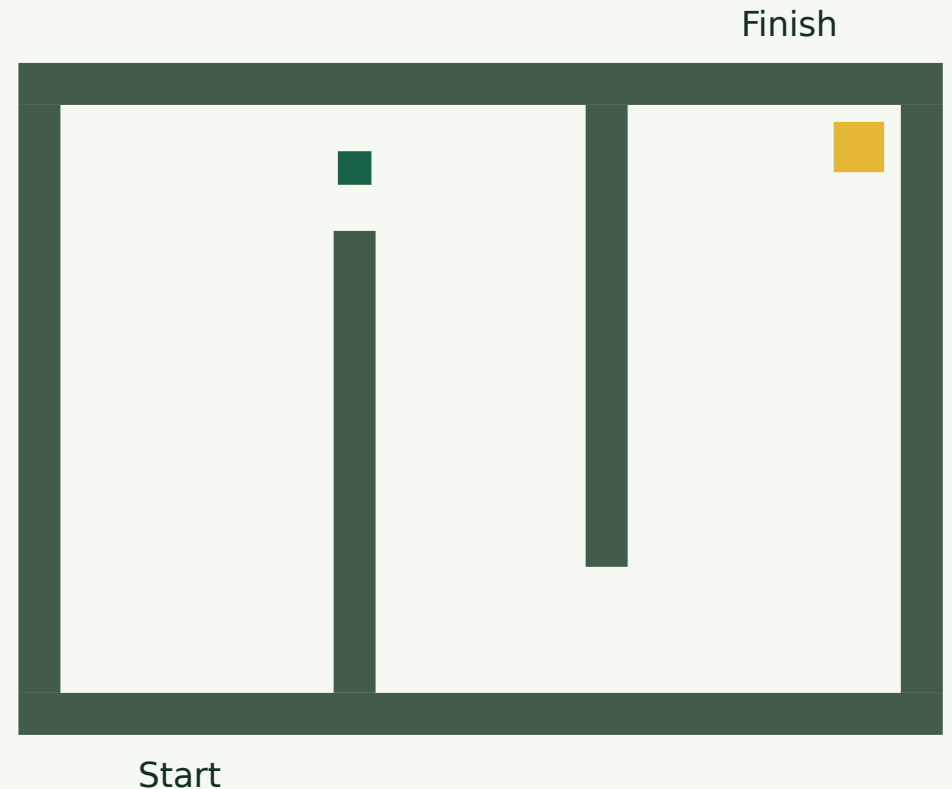

Point to what you would change.

16 units

80 units

Three sprites with three jobs

Maze holds the walls.

Maze

The walls

Player moves around the route.

Player

The moving object

Finish marks the goal.

Finish

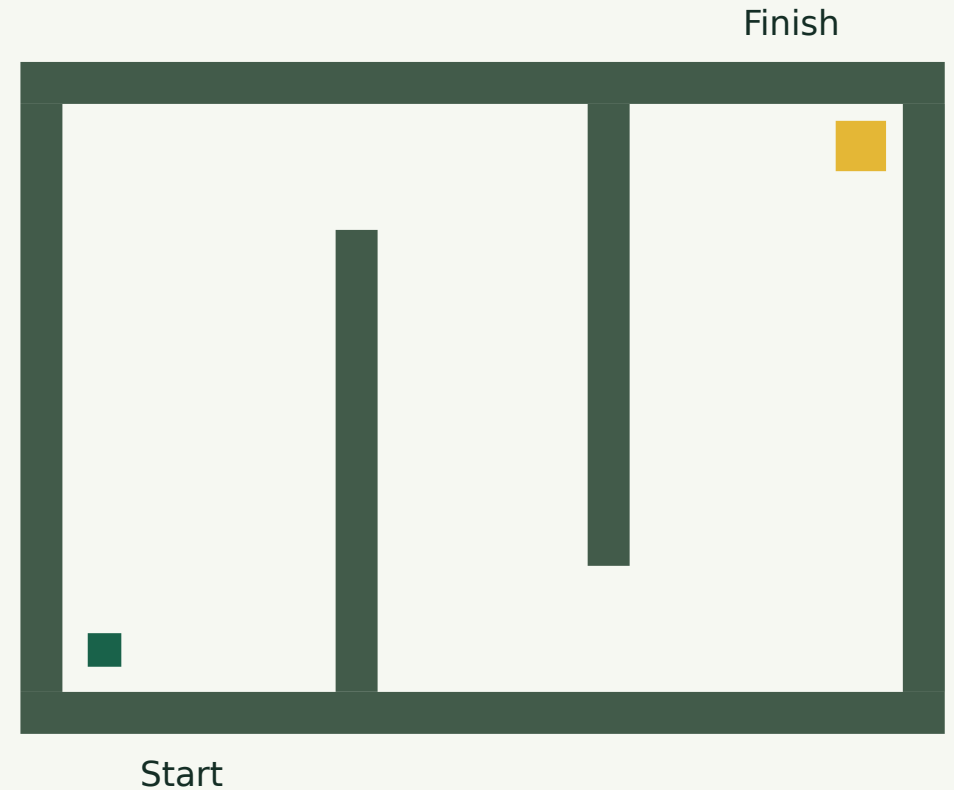

The goal

The gap test

Trace a route together.

Try a larger player. Predict the problem.

Choose one repair and test it.

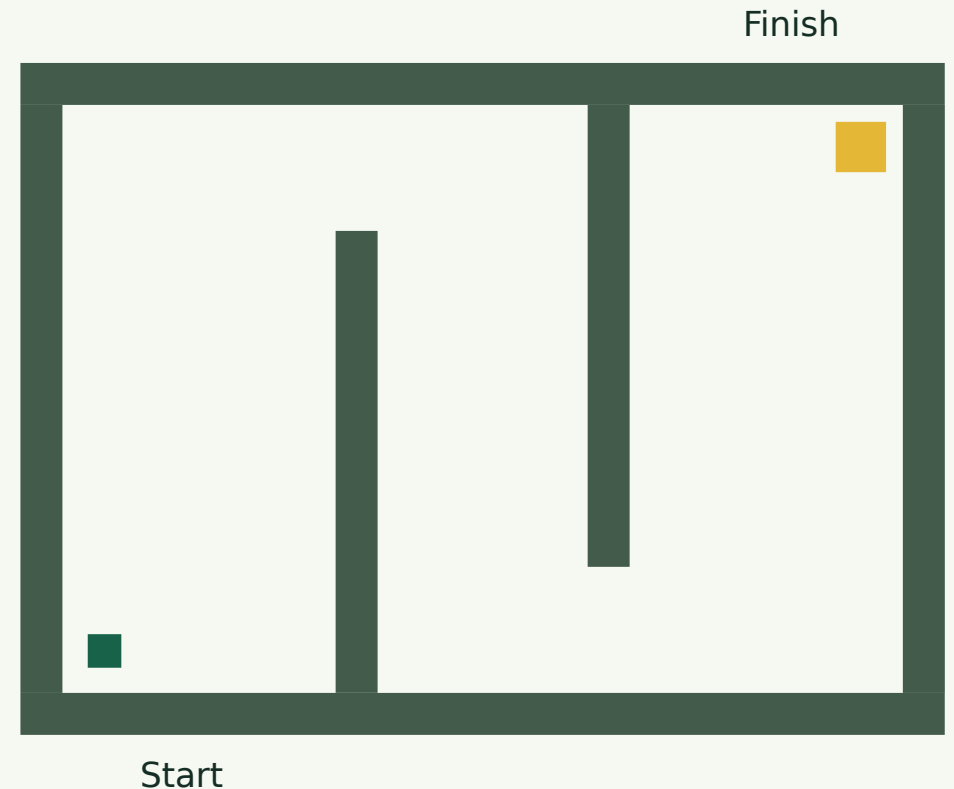

A clear start and finish

Place Player away from a wall.

Place Finish where Player can reach it.

Look at the start x and y.

Our design check

Name each of the three sprites.

Check the first passage with a token.

Agree one useful layout change.

Maze

The walls

Player

The moving object

Finish

The goal

Your maze design

Step by step

Create one sprite at a time using the role cards.

Main task

Create three sprites and check a clear route.

Challenge

Compare player sizes and repair a narrow gap.

32-35: Show your test and what your idea changed.

Exit 35-40 minutes

A saved maze

Save as W03_Maze.sb3.

Load it and select each sprite.

Show what your design idea changed.

What I said, and what it changed
