

The maze gets controls

I can create and test all four arrow controls in my maze.

Open your own W03_Maze.sb3.

You can point, say or write. Quiet working is available.

The up-key mystery

The up key changes x by 10.

Predict the direction Player moves.

Which block would you inspect?

when up arrow key pressed

change x by 10

**Predict the result before
repairing.**

Horizontal controls

Right and left use x.

Use a separate event for each key.

Set a clear green-flag start.

when right arrow key pressed

change x by 10

when left arrow key pressed

change x by -10

A repaired direction

Choose the correct axis for up.

Predict, then test the repair.

Reset before each new test.

Up: x or y?

Model start: x -180, y -120

Reset before a fresh test.

Vertical controls

Up and down use y.

Up adds 10. Down adds -10.

Use change y in each script.

when up arrow key pressed

change y by 10

when down arrow key pressed

change y by -10

Back to the start

Reset Player.

Predict right, up, left, down.

Test and check the final position.

Right, up, left, down

Model start: x -180, y -120

Reset before a fresh test.

Four reliable controls

Step by step

Build and test one key at a time.

Main task

Build four keys and test a return to the start.

Challenge

Test whether sprite direction changes x/y controls.

32-35: Show your test and what your idea changed.

A fresh controls test

Save as W04_Controls.sb3.

Load it and test all four directions.

Show which support or idea helped.

What I said, and what it changed
