

A rule for the walls

I can make Player return to the start when it touches Maze.

Open your own W04_Controls.sb3.

You can point, say or write. Quiet working is available.

A check that comes too soon

The script checks only at the green flag.

Player touches a wall later.

Will the script check again?

when green flag clicked

if <touching Maze?> then

go to the start

This example checks once.

The wall rule

Keep checking while the game runs.

Ask: touching Maze?

If true, go to the safe start.

when green flag clicked

forever

if <touching Maze?> then

go to x: start x y: start y

Indenting shows which blocks fit inside.

A test with contact

Predict the result in clear space.

Test one wall, then a different wall.

Compare one check with repeated checks.

when green flag clicked

forever

if <touching Maze?> then

go to x: start x y: start y

Clear space, wall 1, wall 2

The blocks fit inside

Put if then inside forever.

Put touching Maze? in its question space.

Put the return action inside if then.

when green flag clicked

forever

if <touching Maze?> then

go to x: start x y: start y

Indenting shows which blocks fit inside.

Our script check

Point to the condition.

Point to the action that follows contact.

Check the chosen start is clear.

when green flag clicked

forever

if <touching Maze?> then

go to x: start x y: start y

Indenting shows which blocks fit inside.

Your wall consequence

Step by step

Use the nesting guide and build one block at a time.

Main task

Build the repeated wall rule and test two walls.

Challenge

Investigate and repair a start inside a wall.

32-35: Show your test and what your idea changed.

Exit 35-40 minutes

A saved wall rule

Save as W05_Walls.sb3.

Load it and test a wall again.

Show a pupil idea and its effect.

What I said, and what it changed
