

Week 7 Add one challenge

Step by step · GROW computing · 40 minutes

Name: _____ Date: _____

I can add one new feature that changes how the game is played.

Point, say, draw or write. Someone may record your exact words.

Arrival > Starter > I Do > We Do

I Do 2 > We Do 2 · Task > Independent Task > Exit

Arrival 0 to 3 minutes

Open your own W06_Win.sb3. Save a copy as W07_Challenge.sb3.

Starter 3 to 6 minutes

Which one changes what the player must do?

My prediction

I Do 6 to 11 minutes

Watch the model. Point to the sprite or block that matters.

We Do 11 to 18 minutes

Predict. Ask a partner or adult to check your idea. Test together. Explain what changed.

I Do 2 18 to 21 minutes

The consequence belongs to Player.

We Do 2 · Task 21 to 25 minutes

Show your next action. Choose a task route with your teacher.

Test a run with no contact.

My coding task

Step by step · Independent Task 25 to 35 minutes

- ☐ Save a copy as W07_Challenge.sb3.
- ☐ Click Choose a Sprite. Paint or pick one object.
- ☐ Rename it Hazard.
- ☐ On Hazard join when green flag clicked, then go to one end of the corridor.
- ☐ Join forever under the go to block.
- ☐ Inside forever join glide 2 secs to one end, then glide 2 secs back.
- ☐ Select Player. Build when green flag clicked, forever, if touching [Hazard]? then go to your safe start.
- ☐ Test no contact and contact. Restart. Check controls, wall and win. Save.

My safe start: x _____ y _____

Shared test	We expect	We see
Ordinary run, no contact	Player reaches Finish as before	
Contact with my feature	A consequence the player can see	
Fresh green flag	The feature starts moving again	
One test I ran	Expected result	Actual result

Exit 35 to 40 minutes

- ☐ Save as W07_Challenge.sb3.
- ☐ Load the saved file.
- ☐ Run one check from the list above.

File > Save to your computer. Then File > Load from your computer. Keep the .sb3 file in your school folder.

Help for the next step

Step by step reference · Keep beside your device

Use this reference beside your device. Explain what you expect before the test.

Find this	Use it like this
First	Save a copy before changing anything. W06_Win.sb3 stays as the working game.
New sprite	Choose a Sprite, then Paint or the library. Rename it in the sprite pane, not in the code.
Movement	glide [2] secs to x y, twice, inside forever. Compare both timings from the same positions; slower is not always easier.
Consequence	The check belongs to the sprite that must react. Player checks touching [Hazard]?
A different feature	An optional collectible needs its own complete instructions and tests. Agree extra teaching time first.

My help signals

NOW	NEXT	HELP
Show one action.	Show the next block.	Read or model it.
PAUSE: I need a break.	RETURN: same action.	CHECK: watch my test.

Paper rehearsal prepares the idea. Complete the code, tests and save on a device.

My voice

Tell someone your idea. Ask what changed.

“What I said, and what it changed”

My idea and the reply
