

A game ready to test

I can test my game against clear expectations and explain one improvement.

Open your own W07_Challenge.sb3.

You can point, say or write. Quiet working is available.

Which report helps?

“It is broken” does not help.

“The down arrow moves Player up”
does help.

A fault report names the test and the
result.

A useful test report

Where did you start?

What did you press or do?

What should happen?

What actually happened?

A test with a clear setup

Reset Player to the safe start.

Predict one down-key press, then test.

Record the position you actually see.

Setup

Start: x -180, y -120

Action

Press down once.

Expected

x -180, y -130

Bug-hunt actual

x -180, y -110

Five checks for the game

- 1 Arrows Reset, then try each of the four keys.
- 2 Walls Try clear space and two different walls.
- 3 Finish Start away, make contact, then stay there.
- 4 Feature Watch a full journey; avoid it, then touch it.
- 5 Restart Win, click the flag, check start and play again.

Record passes too. Compare expected and actual results.

One repair, then retest

Change y by 10 to change y by -10 on the down-key script.

Repeat the same down-key test.

Then check the other controls and game rules.

On Player: repair the down key

when down arrow key pressed

change y by -10

Retest from (-180, -120).

After one press: (-180, -130)

Useful tester feedback

Choose a peer or teacher tester. Agree a quiet way to respond.

Ask which check they ran and what happened.

If all checks pass, test a clearer instruction or harder case.

“I did not know which keys to use.”

Add a clear playing instruction.

Ask the tester to try it again.

Test, improve, retest

Step by step

Use the five-check record. Say or point to each result.

Main task

Run all five checks. Record results and retest any change.

Challenge

After the core checks, investigate a corner or contact during a glide.

32–35: Show a test and what your idea or feedback changed.

A finished, tested game

Save as W08_Final.sb3.

Show your test record and a repair, improvement or agreed next step.

Review your six-outcome record.
